Technical Information

Model	306
Operating Voltage	10 ~ 30 Volts AC or DC
Housing	Mounts Inside Carefree Metal Housing
Dimensions	1.000" diameter X 6" wire leads
Weight	.5 oz.
Environment Humidity	5 - 98% Relative Humidity

The Model 306, Lightning & Surge Suppression add-on provides an extra level of protection, in addition to the robust on-board protection, against surges, spikes and lightning that may infect the signal or power wires.

Please make sure your keypad mount and equipment are properly grounded.

A proper ground is necessary to provide a safe path for the over-current/over-voltage to travel to.

Carefree Security Access Controls

CAREFREE SECURITY has been manufacturing fully sealed outdoor ALL WEATHER digital keypads and access controls for over 40 years. Our customers are assured of a trouble free product that is easy to install, user friendly and easy to operate.

CAREFREE SECURITY keypads and products are designed as a stand-alone programmable digital keypad entry with self-contained electronics. All of our keypads are designed for heavy-duty commercial and industrial use. This product is ideal for adverse environment conditions. Keypads are field programmable and can be changed in seconds. A user can pass through an entry point secured by the Carefree keypad by entering a correct code into the keypad. If an incorrect code is entered the keypad will deny access. The built in relay can switch power to an electric door lock, gate, overhead door operator and much more. The keypad metal housing can be mounted to a pedestal or bolted directly to a wall. The keypad has a high-grade anodized aluminum faceplate, which protects it against any corrosion, it is also weather proof and vandal resistant. All of our products will compliment any opening and will provide total user satisfaction.
