

**OPEN, CLOSE, STOP and monitor your Garage Doors from anywhere in the world!**

The GarageSmart™ GS100-CR is the world's first universal Wi-Fi 3-button garage door controller, to remotely and conveniently Open, Close or Stop any commercial door, while keeping you alerted from any smartphone, tablet or PC, from anywhere in the world.

The GarageSmart™ GS100-CR does not interfere with any existing wall controls, and can even work with or replace your existing 3-button mechanical controller.

Integrates easily into the GarageSmart™ control panel where administrators, managers, or supervisors can easily add multiple devices or multiple users for garage door operation. Each users remote key can be on its own custom schedule and be enabled or disabled at the click of a button.

 **UNLIMITED USERS:** Grant access rights to property and/or buildings to as many users as needed by allowing them to easily open Garage Doors via a simple and intuitive app.

 **UNLIMITED REMOTE KEYS:** Provide unique remote keys and have them expire whenever you want. All keys are completely customizable and can expire or be active from a schedule that you create.

 **MAXIMUM SECURITY:** GarageSmart™ is completely safe and secure using top of the line enhanced multi-layer encryption protocols.

 **LOG HISTORY:** Every command or action of your Garage Doors are logged into its history, that can be viewed from within the GarageSmart™ app or Online and you will always know who is accessing your doors.

 **AUTO SHUT:** Set your Garage Doors to close automatically at night for security or after a set-time of being opened.

 **AUX OUTPUT:** NO/NC outputs for controlling external buzzers, lights or electronic door locks with the use of the AUX OUTPUT.
