

Introducing a new concept in wireless vehicle detection. The inground e-Loop replaces traditional wired inductive loops, saving time and money while increasing reliability.

KIT CONTENTS

- 1 x e-Loop wireless inground module.
- 1 x single channel transceiver.
- 1 x magnet.

Wireless Vehicle Detection System

Installation in 3 simple steps

1. Code in the e-Loop.
2. Core bore 89mm hole 70mm deep and secure using flexible mastic.
3. Calibrate the e-Loop... and you're ready to operate in less than 30 minutes.

Save many hours of installation time compared to wired loop systems.

IP68

FEATURES

- Dual sensing technology. (EL00IG-RAD only).
- High security 128 bit encryption.
- Quick and easy installation.
- Recesses into the driveway.
- Not affected by ground movement.
- 14500 mA battery giving up to 10 years battery life.
- Top access for changing battery.
- Up to 50 metres range.
