HySecurity's advanced HyProtect™ breakaway barrier arms provide reliable and uninterrupted traffic control in high-capacity corporate parking lots, low clearance garages, gated communities and rental car facilities. StrongArmPark DC easily partners with large and small scale revenue control systems.

Revenue Control Benefits

- Accurate vehicle counts
- Protect your revenue stream – continuous duty even after AC power loss
- Reduce vehicle damage liability – lighted arm, resilient bumper, breakaway arm bracket, kill switch, integrated traffic light

Parking Management Benefits

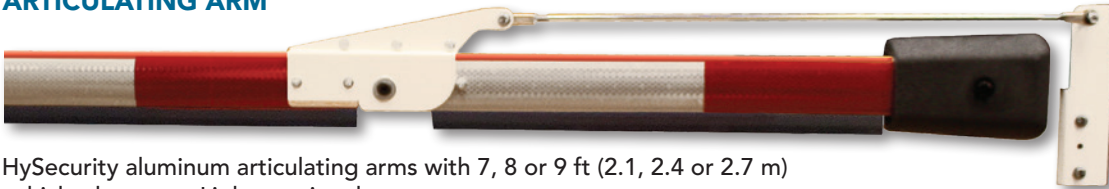

- Loop activated or time-specific open and close
- Easy to configure to site specific requirements
- Numerous relay functions available
- Solar power option

STRAIGHT ARM

HySecurity lighted aluminum arms up to 14 ft (4.3 m)

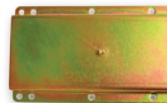

ARTICULATING ARM

HySecurity aluminum articulating arms with 7, 8 or 9 ft (2.1, 2.4 or 2.7 m) vehicle clearance. Lights optional.

Use aftermarket wood or PVC arms with HySecurity's attachment plates.

(Arms not supplied by HySecurity)

1" x 4" (2.5 x 10 cm) wood attachment plate

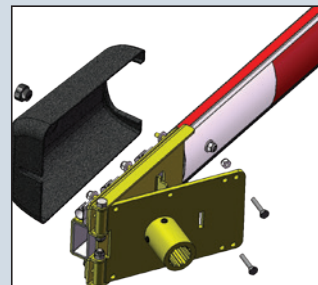

2.5" (6 cm) square PVC attachment plate

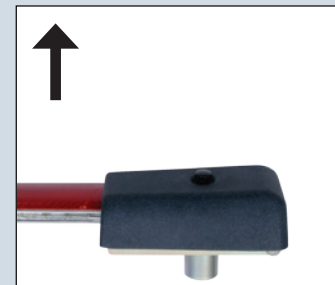

HyProtect™ Breakaway Arm Bracket

Every StrongArmPark DC operator includes an advanced HyProtect breakaway arm bracket and kill switch. If a vehicle hits a straight arm, the nylon bolts in the mount break allowing the arm to swing out of the way, lessening damage to the vehicle and operator and reducing the cost of arm replacement. Refit the arm in less than a minute!

The breakaway arm bracket adapts easily to typical aftermarket arms such as 1 x 4 inch wood or 2.5 inch square PVC.

HyProtect breakaway arm bracket assembly.

If vehicle strikes arm...
