

About Mountain Ice Sports Recovery Muscle Therapy Gel

Sports Recovery Gel is the latest addition to our Mountain Ice brand of analgesic topical pain relief gels that combine the active ingredient of menthol with powerful natural plants and extracts to create a specially designed formula that reaches the pain at the source.

Camphor is the other main ingredient in the Muscle Therapy Gel that has been activated to improve blood flow and detoxify muscle tissue. In addition to the potent antioxidants used in Mountain Ice Arthritis Pain Gel, other rich oils and extracts have been added for their antispasmodic, antimicrobial, antifungal, and antiviral properties.

Sports Recovery Gel is a unique blend that not only reduces inflammation and improves circulation, but also reduces oxidative stress that can prevent muscle damage, builds proteins that increase muscle mass, and provides a moisture barrier that protects the skin, reduces infections, and promotes healthy skin renewal for healing recovery.

When applied prior to physical activity, the Sports Recovery Gel is thought to enhance longevity and athletic performance, provide greater stamina, increase endurance, and protect muscle tissues that create soreness. Regular usage can improve joint flexibility and promote healthy muscles. The roll-on allows for convenient application.

Sports Recovery Gel Benefits

- ▶ **ANALGESIC**
Provides immediate pain relief to joints and muscles
- ▶ **ANTISPASMODIC**
Detoxifies muscle tissue and prevents spasms
- ▶ **ANTI-INFLAMMATORY**
