

MUSCLE THERAPY GEL MOUNTAIN ICE

SPORTS RECOVERY GEL

Mountain Ice Sports Recovery Gel not only contains effective analgesic, anti-inflammatory, and antioxidant properties, but also combines antispasmodic, antimicrobial, and antifungal agents. We have made the perfect combination that not only provides pain relief, reduces inflammation and improves circulation, but also reduces oxidative stress that can prevent muscle damage, builds proteins that increase muscle mass, reduces infections, and promotes healthy skin renewal for healing recovery. When applied prior to physical activity, the Sports Recovery Gel is thought to enhance longevity and athletic performance, provide greater stamina, increase endurance, and protect muscle tissues that create soreness. Regular usage can improve joint flexibility and promote healthy muscles.
