

GETTING STARTED GUIDE

C2 JUICER + BLENDER

Blending

Multi-functional

Our blender was designed to offer a variety of blending options to maximize your experience. Select one of the integrated programs or blend in manual mode to easily and quickly make smoothies, soups, sauces, nut butters, crushed ice, or milled grains.

Powerful

The blender's standout technology allows you to power through frozen ingredients with ease to create delicious and nutritious blends.

Interchangeable Blender + Juicer

Our patented design allows for seamlessly switching between juicer and blender functions utilizing one single power base.

Hold your device over the QR code to access our product video.

Juicing

Whole Recipe Juicing

With the extra-wide juice hopper you can simply load all ingredients at once, turn the juicer on, and have approximately 16 ounces of cold-pressed juice in 2 minutes.

Time-Saving

Hands-free juicing allows you to load your ingredients and walk away so you can multitask in the kitchen.

Nutrient Dense

Our Pure Press Technology™ maximizes the amount of micronutrients extracted from fruits and vegetables to optimize your health.

Maximum Juice

Get every last drop of nature's liquid sunshine out of your fruits and vegetables.

Blending Starter Guide

For more detailed instruction on blending, please refer to User Manual.

1

Rinse well then reassemble jug, lid, and cap. Attach power cord to base and plug into outlet.

2

Place jug on base.

3

When installed correctly, "BLEND" is illuminated on display.

4

Load jug with recipe of choice. Refer to page 39 of User Manual for guidance on layering ingredients. Securely attach jug, lid, and cap.

5

To begin blending, rotate control knob clockwise to desired speed and press **Start/Stop** button.

Note: For details on auto program modes, refer to page 37 of User Manual.

6

To stop, press **Start/Stop** button or turn control knob to center position.

Juicing Starter Guide

For more detailed instruction on juicing, please refer to User Manual.

1

Chamber set arrives preassembled. Take apart, rinse, and reassemble. Attach power cord to base and plug into outlet.

Note: Refer to page 12 of the User Manual for assembly instructions, if needed.

4

Place containers under pulp and juice outlets.

2

Place chamber set on base by aligning triangle on front of chamber with triangle on top of base.

Note: If chamber does not drop onto base snugly, rotate chamber slightly to connect with the drive shaft, then rotate chamber back into alignment on base.

5

Load hopper with recipe of choice.

Note: Refer to page 21 of User Manual for guidance on layering ingredients.

3

When installed correctly, "JUICE" is illuminated on display.

6

To begin juicing, rotate control knob to "ON" position and press **Start/Stop** button.

Note: To stop juicing, rotate control dial to center position or press Start/Stop button.
