## SterlingCool-Swiss 100AMNC

**SterlingCool-Swiss 100AMNC** is a premium non-chlorinated best-in-class Swiss cutting oil known for providing outstanding results and finishes on all metals. It is formulated with a unique combination of mineral oil and excellent lubricity components designed for use in Swiss style CNC turning machines that are equipped with high pressure delivery systems. **SterlingCool-Swiss 100AMNC** contains an extremely robust lubricity package using extreme pressure lubrication that will achieve excellent tool life in tough machining applications. Formulated to be bright and clear, it has exceptional visibility, while allowing optimum operating speeds and stock removal. It is an ultra-low foaming product and therefore is ideal for high-pressure coolant delivery systems. **SterlingCool-Swiss 100AMNC** excels on both ferrous and non-ferrous metals including tough alloys, stainless steel, aluminum, titanium, brass, bronze and copper. It is also non-chlorinated making it an excellent choice for the medical industry.

LAB DATA	
Appearance	Amber, Clear
Specific Gravity	0.88
Flash Point	380 °F
Fire Point	400 °F
Viscosity @ 40 °C	21.3
Solubility	Insoluble in water
