SterlingCool

SterlingCool-AR502

SterlingCool-AR502 is a phenomenal non-chlorinated, high lubricity metal-working fluid that is formulated with sulfur and is suited for all machining applications. It is especially great for tapping, broaching, threading and other severe machining functions. It is a light-transparent color which allows clear viewing for the operator.

LAB DATA	
Appearance	Light to Transparent
Viscocity (cSt @ 100 Deg. C)	6.0
Flash Point (@ 0 Deg C)	205
Chlorine	0
Sulfur, Active	1.6

Advantages

- High lubricity results in extended tool life
- Light color allows for clear viewing of tool and work piece
- Great for broaching, tapping and threading
- Extremely low mist product

SterlingCool AR501-CL is available in 5 gallon pails, 55 gallon drums and 275 gallon totes.
