CUTTING FLUIDS DIRECT

SterlingCool-Swiss 122

A perfect replacement for Blasomill 22!!!

SterlingCool-Swiss 122 is a premium mineral oil based cutting fluid formulated with high quality base oils and a unique combination of lubricity additives. With a viscosity of 22, it is an excellent product for use in Swiss style CNC turning machines equipped with high pressure delivery systems. SterlingCool-Swiss 122 is formulated exceptionally clean and has a bright and clear appearance which achieves exceptional visibility. It is a low foaming product making this fluid ideal for high pressure coolant delivery systems. SterlingCool-Swiss 122 is recommended for stainless steel, tough alloys, titanium, brass, and aluminum.

LAB DATA

LAB DATA	
Physical State	Light Amber Liquid
Odor	Mild
Pounds/Gallon	7.6+
Flash Point	Over 380 Degree F

Advantages

- High Flash Point, Safer to Use
- Low Mist/Smoke levels
- Extremely Clean
- Multi Metal/Can be used on all metals
- Excellent heat dissipation
- Greater Penetration for micro-parts
