SterlingCool Waylubes

SterlingCool Waylubes are best-in-class lubricants that are uniquely designed by our team of chemists to meet the extreme lubrication requirements for both machine slides and ways. Formulated to meet the specific needs for both slides and ways, SterlingCool's Waylubes are specially formulated to protect slides and ways by providing excellent adhesion and load carrying capability while providing oxidation and thermal stability and corrosion resistance. SterlingCool uses top base stock oils and coupled with premium additives to maintain a clean and consistent blend.

LAB DATA			
ISO Grade	32	68	220
API Gravity @ 60 °F	30.6	28.4	27.1
Viscosity @ 40 °C, cST	32	68	220
Viscosity @ 104 °F SUS	150	315	1,019
Pour Point °F	5	5	15°
