21" Fender Brackets

## WRAPPER FRONT FENDERS

- ▶ Our Wrapper front fenders perfectly follow the contour of your 21", 23", or 26" front wheel
- ▶ Fenders are available in carbon fiber composite and standard composite materials. Both are handmade in the USA
- ▶ Carbon composite fenders are constructed from a blend of composite materials with a layer of carbon fiber for fenders as strong as steel with less than half the weight
- ▶ Standard composite fenders are constructed from high quality fiberglass materials that are cured in a computer controlled oven over a wide heat range for durability and strength
- ▶ Both composite style fenders are an average of 8 lbs lighter than most similar steel fenders, saving weight and improving gas mileage
- ▶ Available for FLT Touring & FLST/FXST

**BOB DRONE FAIRING KIT, ROAD KING**

- ▶ Classic fairing provides protection from the elements
- ▶ Accepts factory spot lights
- ▶ Fairing body constructed in heavy ABS, windshield is smoked plexiglass
- ▶ Fairing kits include: 1 fairing body, 1 smoked windshield, stainless steel mounting brackets and windshield mounting hardware
- ▶ Fitment for 97-Up FLHR models

<b>06-950</b>	Bob Dron fairing kit	<b>\$ 349.95</b>
<b>06-951</b>	Replacement smoked windshield	<b>\$ 99.95</b>

NOTE: Please check fit and finish prior to painting. Arlen Ness will not be responsible for any damage sustained to paint jobs.

Bob Dron Fairing Kit

### DOWN-N-OUT STRETCHED SADDLEBAGS, ABS

- ▶ Injected molded ABS versions of our Down-N-Out saddlebags that are 6" longer and 2" lower than our original Big Bags for the most extreme stretch we offer
- ▶ Features a tapered bottom that provides a clean and original look while offering an additional 2" of ground clearance
- ▶ Each bag is constructed from injected molded ABS plastic that provides superior strength and durability for the perfect fit every time from a name you can trust (Same materials used in factory saddlebags)
- ▶ Accepts factory sized lids and hardware
- ▶ Available for 93 - 13 & 14-Up FLT touring models
- ▶ Offered with dual exhaust outlets
- ▶ Sold individually

#### 93-13 FLT

60-160	Down-N-Out, Left Hand	\$ 399.95
60-161	Down-N-Out, Right Hand	\$ 399.95

#### 14-Up FLT

60-165	Down-N-Out, Left Hand	\$ 399.95
60-166	Down-N-Out, Right Hand	\$ 399.95

### DOWN-N-OUT REAR FENDER EXTENSION, ABS

- ▶ Down-N-Out rear fender extensions bolt straight to your factory rear fender to add length and match our Down-N-Out stretched saddlebags
- ▶ Constructed from injected molded ABS plastic
- ▶ Provides the stretched fender look and fills the gap between rear fender and saddlebags
- ▶ Utilizes factory rear fender and tri-bar light/license assembly for the stretched look at less than half the cost
- ▶ Available for 09-Up FLT touring models equipped with tri-bar rear license/light assembly

60-159	Down-N-Out Rear Fender Extension	\$ 299.95
--------	----------------------------------	-----------

### DOWN-N-OUT EXHAUST EXTENSION KIT

- ▶ Everything you need to extend your factory or aftermarket exhaust to the proper length for use with Down-N-Out Saddlebags and rear fenders/fender extensions
- ▶ Each kit includes head pipe extensions, chrome heat shield extensions, exhaust clamps and muffler hanger brackets
- ▶ Available for 08-16 & 17-Up FLT

60-120	Down-N-Out Exhaust Extension, 08-16 FLT	\$ 199.95
60-126	Down-N-Out Exhaust Extension, 17-Up FLT	\$ 199.95

Down-N-Out, ABS

### DOWN-N-OUT STRETCHED SADDLEBAGS, COMPOSITE

- ▶ Down-N-Out extreme stretched saddlebags made from aircraft quality composite materials, made in the USA
- ▶ Each saddlebag is stretched 6" longer and 2" lower than our original stretched saddlebags and feature a tapered bottom for more ground clearance while cornering
- ▶ Each bag is constructed from premium composite materials/fibers, hand placed fibers are strategically located to provide the highest structural integrity possible while maintaining a low overall weight
- ▶ Cured in computer-controlled ovens over a wide heat range for maximum durability
- ▶ Jig quality control process ensures proper fitment
- ▶ Saddlebags are primed in a super high quality polyester sanding primer
- ▶ Accepts factory saddlebag lids (or custom lids made to factory fitment spec)
- ▶ Choose from dual, single or no exhaust applications
- ▶ Available for 93-13 & 14-Up Harley-Davidson FLT Touring Bagger models
- ▶ Sold in pairs

#### 93-13 FLT

06-978	Dual exhaust stretched bag kit	\$ 1499.95
06-979	Single exhaust stretched bag kit	\$ 1499.95

## TOUR PACK

- ▶ Injection-molded ABS tour pack constructed from OEM-grade materials for superior strength and rigidity
- ▶ Chopped profile features an angled design to match our Angled and Down-N-Out saddlebags
- ▶ Precision manufacturing results in a near perfect finish
- ▶ Each tour pack includes tour pack top, tour pack bottom, inner mounting plate and gasket/seal

60-170 Arlen Ness Tour Pack

\$ 499.95

## FXR SIDE COVERS

- ▶ Available for all FXR™ models 82-94 & 99-00
- ▶ Constructed from high-impact ABS plastic
- ▶ Side covers conceals brake and electrical components while providing an appealing look
- ▶ Ready for prep and paint

03-600 FXR™ side cover kit, pair

\$ 124.95

FXR Side Covers

### FLARE 5 WHEELS

The FLARE 5 represents the next level in motorcycle wheel design. Sculpted CNC features extend from the axle all the way to the outer edge of the rim lip. Its multi-piece design features a radial forged rim, forged hub covers, hidden cartridge hub and spoke mounted 14" rotors for a full 3D wheel with enhanced braking performance

- ▶ Precision machined from radial forged 6061-T6 aluminum for maximum road durability
- ▶ Structurally tested to meet or exceed DOT, JAS and TUV international load ratings
- ▶ Hidden hub design features a single piece cartridge type hub that includes both pre-set bearings
- ▶ Forged hub covers are specially designed to bring full 3D styling from the bearing in the hub to the outer edge of the rim lip
- ▶ Matching performance brake rotors available. Choose from 14" & 11.8" front spoke mounted rotors & 11.5"/11.8" rear hub mounted rotors

### DRIFT WHEELS

Utilizing our proprietary single piece hub and hub cover combination the DRIFT wheel brings directional CNC design from very center of the rim to the very edge of the lip to set your bike in motion even when it's on the kickstand

- ▶ Precision machined from radial forged 6061-T6 aluminum for maximum road durability
- ▶ Structurally tested to meet or exceed DOT, JAS and TUV international load ratings
- ▶ Hidden hub design features a single piece cartridge type hub that includes both pre-set bearings
- ▶ Forged hub covers are specially designed to bring full 3D styling from the bearing in the hub to the outer edge of the rim lip
- ▶ Matching performance brake rotors available. Choose from 14" & 11.8" front spoke mounted rotors & 11.5"/11.8" rear hub mounted rotors

### 7-VALVE WHEELS

Clean 7 spoke design levels above the classic mag. Each one of the 7 spokes are tapered and feature sculpted sides with a cut out center for heavy styling that doesn't add weight to the motorcycle. To keep it consistent, we brought the same design philosophy to the rim lip where large pockets have been CNC machined between each in spoke to reduce as much weight as possible while adding bold styling. The 7-VALVE looks good on any machine and is our best-priced option in the lineup.

- ▶ Precision machined from radial forged 6061-T6 aluminum for maximum road durability
- ▶ Structurally tested to meet or exceed DOT, JAS and TUV international load ratings
- ▶ Hub design features a cartridge type hub that includes both bearings that are pre-set and ready to install in minutes
- ▶ Cartridge design hub features both wheel bearings pre-set in one hub for optimum radial and lateral runout accuracy
- ▶ Available in chrome or black anodize finish
- ▶ Matching floating performance rotors are also available

### PROCROSS WHEELS

Race inspired design with extreme attention to detail. Lightweight yet engineered to perform and handle anything the road wants to throw at you. Although the inspiration came from the racetrack it doesn't mean we didn't spend countless hours sculpting each "spoke" to ensure it rode the fine line between race and luxury styling.

- ▶ Precision machined from radial forged 6061-T6 aluminum for maximum road durability
- ▶ Structurally tested to meet or exceed DOT, JAS and TUV international load ratings
- ▶ Hub design features a cartridge type hub that includes both bearings that are pre-set and ready to install in minutes
- ▶ Cartridge design hub features both wheel bearings pre-set in one hub for optimum radial and lateral runout accuracy
- ▶ Available in chrome or black anodize finish
- ▶ Matching floating performance rotors are also available

### Y-SPOKE WHEELS

The Y-SPOKE wheel design is focused on performance, high level CNC machined detail, and custom anodize finishes. The result is a clean overall style that becomes more and more aggressive the closer you get. Each carved out lightweight wheel is anodized in a color from a selection of proprietary finishes.

- ▶ Precision machined from radial forged 6061-T6 aluminum for maximum road durability
- ▶ Structurally tested to meet or exceed DOT, JAS and TUV international load ratings
- ▶ Accepts Ness cartridge type hubs that includes both bearings That are pre-set and ready to install in minutes
- ▶ Available in black, titanium, red, gold, blue & orange anodize
- ▶ Accepts Arlen Ness Rotor Adapters with factory or aftermarket rotors/ discs
- ▶ Available sizes: 21" x 3.5" & 18" x 5.5"

ARLEN NESS CARTRIDGE HUBS

- ▶ These billet aluminum hub kits are designed for Arlen Ness forged billet rims
- ▶ Cartridge hub design features wheel bearings pre-set in one hub for optimum radial and lateral runout accuracy
- ▶ Lightweight coped design provides form and function
- ▶ Each hub kit includes everything you need for ABS or non-ABS Harley applications regardless of your wheel diameter
- ▶ Hub kits mount to your Arlen Ness forged rims in minutes with basic tools offering excellent flexibility for stock or custom applications, and allowing all sizes to be available for most applications
- ▶ Available in Chrome or Black anodized finish, each hub kit includes everything needed for simple installation
- ▶ Designed for 7-Valve, Procross, Y-Spoke

## ARLEN NESS FORGED BILLET RIMS

- ▶ Choose from Procross, 7-Valve & Y-Spoke forged billet rims
- ▶ All rims are CNC machined from radial forged 6061-T6 aluminum for maximum road durability and strength-to-weight ratio
- ▶ Features a rolled rim lip for the custom look and detailed CNC machine work from the center of the hub to the edge of the rim
- ▶ Each rim can be used on both front and/or rear of the motorcycle when correct hub kit is installed
- ▶ Structurally tested to meet or exceed DOT, JAS and TUV international load ratings
- ▶ Rims accept Arlen Ness Hub Kits, which allows full wheels to be assembled in minutes with basic tools
- ▶ Available in : 21" x 3.50"/23" x 3.50"/26" x 3.5"/18" x 3.50"/18" x 5.5"/17" x 6.25" sizes
- ▶ Designed specifically for Arlen Ness Cartridge Hubs

DRIFT, 14"

**FLARE 5 & DRIFT REAR BRAKE ROTORS**

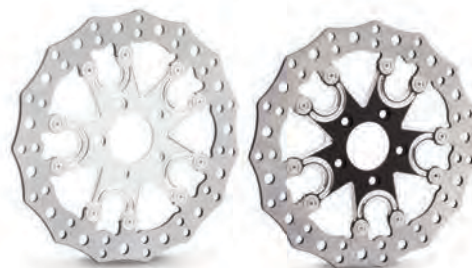

- ▶ 2-piece floating brake rotors
- ▶ CNC machined billet inner carrier
- ▶ Jagged 420 stainless steel outer brake disc is cut and drilled to efficiently disperse heat and perform consistently in all braking scenarios 11.8" & 11.5" diameters
- ▶ Designed for Flare 5 & Drift rear wheels, but can be used as a front or rear rotor on most all factory or aftermarket HD fitment wheels

### PERFORMANCE BRAKE ROTORS

- ▶ 2-piece floating brake rotor
- ▶ CNC machined billet inner carrier
- ▶ Jagged style 420 stainless steel outer band
- ▶ Stainless outer ring is cut and drilled to efficiently disperse heat and perform consistently in all braking scenario's

- ▶ Available in 11.5", 11.8" and 14" sizes
- ▶ 14" rotor requires the use of Ness Caliper Adapter Bracket or Ness 14" brake calipers
- ▶ Sold individually

#### PROXCROSS ROTORS

**NOTE:** 14" ProCross & 7-Valve rotors for Softail®/Dyna® applications require the use of Arlen Ness 14" Brake Calipers or Caliper Adapter Brackets

### FLT ROTOR ADAPTERS

- ▶ Allows the use of factory 14-Up FLT spoke mounted rotors on aftermarket billet wheels
- ▶ Forged from billet aluminum then CNC machined to perfection
- ▶ Available in two applications: "Ness Specific" which matches the cartridge hub design found on Ness hubs & Universal, which fits on any aftermarket 5-bolt hub wheel
- ▶ Each rotor adapter includes hub mounting hardware
- ▶ Choose from chrome or black anodize finish factory floating rotor bolt hardware

#### 14-UP FLT ROTOR ADAPTERS

### JAGGED PERFORMANCE FLOATING BRAKE ROTORS

- ▶ High performance Floating Brake Rotors are designed to enhance braking performance, and style, of factory or aftermarket wheels
- ▶ 420 Stainless construction, drilled for optimum performance and heat dispersion
- ▶ 11.8" spoke mounted front rotors are designed to fit factory front FLT touring and other models equipped with spoke mounted 11.8" factory rotors
- ▶ 11.5" and 11.8" are universal and can be used on the front or rear of HD models equipped with 5-bolt hub mounted factory rotors
- ▶ Rear FLT specific rotors feature a heavy duty construction and the proper thickness for the rear FLT applications
- ▶ Utilizes factory rotor hardware
- ▶ Sold individually

14" FOR 00-13 & 18-20 FLT

### 6-PISTON DIFFERENTIAL BORE BRAKE CALIPERS

- ▶ 6-piston Differential Bore Brake Calipers CNC machined from billet aluminum
- ▶ 3D sculptured caliper design
- ▶ Extremely stiff under stress, ensuring precise and consistent braking performance
- ▶ Cooling fins are machined into the inner caliper halves to help disperse heat
- ▶ Compatible with ABS & non-ABS applications
- ▶ Available for 11.8" and 14" brake applications
- ▶ Chrome, black anodize, red, blue, gold & titanium finishes available
- ▶ Each caliper includes DP brake pads, bleeder screw, banjo bolt, sealing washers, mounting hardware and shim kit
- ▶ Fitment: 08-Up FLT/18-20 Softail®/06-17 FLST/06-17 FXD/14-Up XL

**BRAKE PADS FOR ARLEN NESS BRAKE CALIPERS**

- ▶ DP Brakes brake pads are designed with sintered metal compounds to give your bike high-tech performance in all conditions
- ▶ Fast break-in period so you get maximum performance faster
- ▶ DP Brakes design and materials ensure consistent hard stops and fade-free performance
- ▶ Sintered metal compounds outlast more conventional organic pads
- ▶ GG friction rated and made with DP Brakes proven sintered metal material
- ▶ Gray-colored aluminum oxide-based ceramic material on rear of backing plate keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- ▶ Equal performance in wet or dry conditions
- ▶ Available for Arlen Ness 6-Piston Differential Bore & 4-Piston brake calipers

**DEEP CUT & 10-GAUGE COMFORT SERIES GRIPS**

- ▶ Billet grip designs that have a slightly larger diameter than factory which helps with hand fatigue and provides increased comfort
- ▶ Deep Cut style features a conical style grip body with innovative rubber inserts that have a soft air cushion feel to help dampen vibration
- ▶ 10-Gauge style features accent cuts running the length of the grip body with linear style rubber providing comfort for the long haul
- ▶ Available for cable and fly-by-wire applications
- ▶ Choose from chrome or black finish
- ▶ Sold in pairs (matching footpegs can be found on page 58)

**BIG SUCKER™ STAGE I AIR CLEANERS,  
TWIN CAM/SPORTSTER®/EVO**

- ▶ Engineered to give your engine maximum airflow for more horsepower & torque
- ▶ One-piece aluminum backing plate features our patented hidden breather technology, each breather is o-ringed at the heads and exits at the mouth of the throttle body eliminating the need for any external hoses or hardware for efficient engine breathing
- ▶ Each backing plate contains a smooth radius air inlet to direct unobstructed airflow into the engine
- ▶ Stage I kits accept factory and/or Ness air cleaner covers for the exposed look. Kits specifically designed to accept factory air cleaner cover only [found on pg. 84]
- ▶ Performance air filters are available in standard pre-oiled cotton & synthetic filter elements. Standard performance filters are constructed from red pre-oiled cotton and are washable/reusable. Filter re-charge kits available separately
- ▶ Synthetic performance filters are constructed from black synthetic filter element that is wrapped in a stainless steel jacket. Synthetic filters are washable/re-usable, do not require oil and are water resistant which in most cases eliminates the need for a rain sock
- ▶ Backing plates available in standard, black or chrome finish
- ▶ Each Stage I kit includes one-piece aluminum backing plate, performance filter, gaskets, and necessary hardware

**M8 BACKING PLATE FEATURES**

**Patent - Pending Hidden Breather Technology**

The next generation of Big Sucker air cleaner technology. Our hidden breather system is o-ringed at the heads, passes through the machined channels inside of the backing plate, and exits inside the mouth of the throttle body through patent-pending "shooter" tubes.

**Patent - Pending Oil Catch**

New integrated oil catch ensures no engine breather oil ever ends up on your filter, restricting flow. Oil catch's bolt on design allows it to be serviced when it's time to service the air filter.

**Aluminum Design**

Aluminum backing plate features a one-piece design stacked with performance enhancing features and a new aluminum filter top plate with integrated mounting studs. The next generation design increases performance as well as reliability.

**Formed Style Features**

New outer filter lip is formed into the face of the backing plate to better secure the air filter in place while hiding the urethane filter base for a clean look leaving only air flow enhancing filter media exposed.

**BIG SUCKER™ STAGE I AIR CLEANER KIT FOR M8 ENGINE**

The Big Sucker™ Stage I performance intake for Milwaukee-Eight® (M8) engines adds horsepower, torque and eliminates oil blow-by issues. Our next generation patent-pending hidden breather system is o-ringed at the heads, passes through the backing plate and exits inside the mouth of the throttle body through proprietary shooter tubes.

- ▶ Increases horsepower, torque and mileage
- ▶ Eliminates oil blow-by issues associated with performance intakes on M8 engines
- ▶ Black pre-oiled high performance filter is washable
- ▶ Patent-pending oil catch/reservoir collects any excess breather oil to keep your filter dry
- ▶ One-piece aluminum backing plate
- ▶ Aluminum filter top plate design eliminates internal mounting hardware
- ▶ Accepts Ness Stage I outer covers and M8 Softail® models w/ single bolt factory air cleaner covers

### BACKING PLATE FEATURES

#### Patent - Pending Hidden Breather Technology

Our hidden breather system is o-ringed at the heads, passes through the machined channels inside of the backing plate, and exists inside the mouth of the throttle body through patent-pending "shooter" tubes.

#### Patent - Pending Oil Catch

New integrated oil catch ensures no engine breather oil ever ends up on your filter, restricting airflow. Oil catch's bolt-on design allows it to be serviced when its time to service the air filter.

#### Aluminum Design

One-piece design with integrated performance features. Shaped to fit the factory FLT air cleaner cover and fit a full perimeter flow air filter design to bring in maximum airflow.

#### Aluminum Filter Top Plate

Formed aluminum top plate has integrated studs that eliminate the need for any additional mounting hardware and an air venturi that forces air into the engine.

### BIG SUCKER™ AIR CLEANERS FOR FACTORY COVER, 17-UP FLT

The Big Sucker™ Performance Air Cleaner for Milwaukee-Eight® (M8) 17-Up Baggers is specially designed to pull in the most air possible under the factory air cleaner cover. The backing plate features a new patent-pending hidden breather system and a formed aluminum internal design resulting in more performance with no oil blow-by issues. The newly integrated patent-pending oil catch makes sure no oil ever touches the massive perimeter-flow air filter.

- ▶ Increases horsepower, torque & mileage
- ▶ Eliminates oil blow-by issues associated with performance intakes on M8 engines
- ▶ Red pre-oiled high performance filter is washable
- ▶ Patent-pending oil catch/reservoir
- ▶ Patent-pending hidden breather backing plate
- ▶ Aluminum filter top plate design eliminates internal mounting hardware and features a specially formed air venturi that directs airflow into the radius air inlet

**BIG SUCKER™ AIR FILTERS FOR SCREAMING EAGLE® AIR CLEANERS**

- ▶ Big Sucker™ air filters for Screaming Eagle air cleaner kits to increase air flow, ability to add custom covers or add the water resistant synthetic feature
- ▶ Available in Standard Red, Synthetic or Derby Sucker filter elements
- ▶ Standard performance filters are constructed from red pre-oiled cotton and are washable/reusable
- ▶ Synthetic performance filters are constructed from black synthetic filter element that is wrapped in a stainless steel jacket. Synthetic filters are washable/re-usable, do not require oil and are water resistant which in most cases eliminates the need for a rain sock (recommended for exposed air cleaner configurations)
- ▶ Derby Sucker filters accept any 5-hole derby cover as an air cleaner cover and are almost 20% larger than Stage I filters for more airflow.
- ▶ Available in both standard and synthetic filter elements

### CUSTOM COVERS FOR BIG SUCKER™ AIR CLEANERS

- ▶ Custom cover options for Stage I and II Big Sucker™ kits for an exposed look and unique style
- ▶ Covers will fit all Arlen Ness Big Sucker™ kits except kits specifically designed for use of factory air cleaner cover; be sure to choose your appropriate Stage Kit
- ▶ Stage I Smooth covers are stamped from steel and finished in chrome and black powdercoat finish. Brushed stainless and brass also now available
- ▶ Stage I Beveled, 10-Gauge, Slot Track, Scalloped and all new Knuckle covers are machined from billet aluminum
- ▶ Stage I carbon fiber covers are made from pure carbon fiber
- ▶ Stage II covers are available in Smooth, Beveled, 10-Gauge, Knuckle, Slot Track, Carbon Fiber;
- ▶ Brass and stainless steel styles
- ▶ Each cover is sold individually and includes mounting hardware

## MONSTER SUCKER 90° AIR CLEANERS

- ▶ Our Monster Sucker 90° Air Cleaner Kit features our patented Big Sucker™ "hidden breather" technology and more filter surface area than any other aftermarket 90° on the market for maximum performance
- ▶ Ness hidden breathers are o-ringed at the heads and exit out the mouth of the injector/carb to provide efficient engine breathing, eliminating the need for any external hoses or hardware
- ▶ The inverted 90° style filter features a built in inverted top to pull in air not only from all sides of the filter but also the front, which results in more performance gaining airflow
- ▶ Each filter is constructed from a synthetic material that is water resistant, which in most cases eliminates the need for a rain sock
- ▶ Filters are re-usable and do not require oil, just wash and re-use
- ▶ Kits for models w/ Milwaukee-Eight® engine include throttle servo cover
- ▶ Covers are forged from billet aluminum then CNC machined to perfection
- ▶ Kits are available with or without forged billet covers
- ▶ Forged billet covers can be added at any time to any Standard Monster Sucker Kits that were originally purchased without covers
- ▶ Each kit includes backing plate, 90° elbow, filter, filter cover (if cover kit is chosen), gaskets and necessary hardware

### FORGED BILLET ALUMINUM BACKING PLATE

FOR: INVERTED / METHOD / CLEAR TEAR / SIDEKICK

#### Patent-Pending Breather Tech

Patent-pending hidden breather technology is o-ringed at the heads, passes through the back plate and exits inside the throttle body through proprietary shooter tubes. Now standard on all inverted intakes

#### Patent-Pending Oil Catch

New integrated oil catch ensures no engine breather oil ever ends up on your filter restricting airflow. Oil catch's bolt-on design allows it to be serviced when its time to service the air filter.

#### Hidden Hardware

Specially designed breather bolts and billet cover plates result in a hidden hardware design with the most efficient breathing system available

#### Radius Air Inlet

Forged into the backing plate, radius air inlet provides unobstructed airflow for more horsepower and torque

## INVERTED AIR CLEANER SERIES

The Inverted air cleaner series features our next generation patent-pending hidden breather technology and an inverted intake design that maximizes airflow by pulling in air from the face of the air cleaner, as well the perimeter of the filter. Each kit is machined entirely from forged billet aluminum to provide the best performance and style

### FORGED ALUMINUM BACKING PLATE

- ▶ Each backing plate is CNC machined from forged aluminum
- ▶ Features the patented Big Sucker™ hidden breather technology
- ▶ Each hidden breather is o-ringed at the heads, passes through the backing plate and exits at the mouth of the throttle body through proprietary shooter tubes- this eliminates the need for any external hoses or hardware
- ▶ Radius air inlet provides unobstructed airflow
- ▶ Specially designed breather is hidden for a clean finish
- ▶ Eliminates oil blow-by issues associated with MB performance intakes
- ▶ Patent-pending oil catch integrated into the backing plate, reservoir is serviceable

### SYNTHETIC AIR FILTER

- ▶ Handmade in the U.S.A.
- ▶ Does not need oil, just wash and re-use for a long lasting performance
- ▶ Water resistant, which in most cases eliminates the need for a rain sock
- ▶ Each filter features an inverted pleated top with pleated sides to maximize airflow by pulling in from every angle
- ▶ Synthetic material is black, with a stainless steel jacket

### FORGED BILLET ALUMINUM AIR FILTER HOUSINGS

- ▶ Machined from a single piece of forged billet aluminum
- ▶ Features an inverted intake face that acts as a velocity stack to increase performance by forcing air into the inverted air filter top

### CLEAR TEAR AIR CLEANER SERIES

- ▶ The Clear Tear Air Cleaner Series brings the timeless teardrop shape to a new level
- ▶ Smooth flowing cage design is forged and CNC machined to a perfect finish
- ▶ Specially formed radius shaped polycarbonate top is hard coated for long term durability
- ▶ Radius polycarbonate window can be installed in both the front or back facing direction allowing the rider to choose their preferred look
- ▶ Patented hidden breather backing plate technology
- ▶ Breather design is o-ringed at the heads, passes through the backing plate and exits inside the mouth of the throttle body through proprietary shooter tubes
- ▶ Integrated patented oil-catch to ensure no oil reaches the air filter and restricts air flow
- ▶ Performance air filter is made from black pre-oiled cotton and is washable

## RE-USABLE BILLET OIL FILTERS

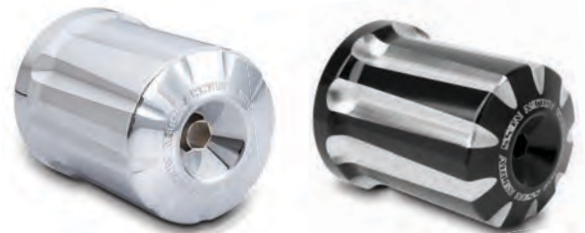

- ▶ Arlen Ness combines clean sculpted billet styling with high tech filter technology used in Formula 1, NASCAR, and the aerospace industry
- ▶ Oil filter element is made from laser cut 304 stainless steel and medical grade micronic cloth
- ▶ Catches items down to 35 microns, which is about three times better than most traditional oil filters
- ▶ Filters maintain consistent flow under all conditions, including extreme heat, presence of water, and cold startups
- ▶ Re-usable design, simple filter cleaning and service

## DEEP CUT ACCESSORY LIGHTS

- ▶ CNC machined Deep Cut styled housing with our Fire Ring LED turn signal lighting
- ▶ Available in dual fitment for running and turn/brake function
- ▶ Our dual function LED design features a billet aluminum ring that is integrated into the lens.
- ▶ Each billet ring includes 7 exposed white or red LEDs to work as running lights.
- ▶ Behind the lens features a cluster LEDs for turn signal and/or brake functions. These fit all front and rear applications with a light socket for 1157 type bulb.
- ▶ Amber LEDs are required for front, red for rear applications
- ▶ Simple plug and play installation
- ▶ Available in chrome or black anodize finish
- ▶ Sold individually

### LENS / TRIM RING / TRIM LED / FILAMENT

	LENS	TRIM RING	TRIM LED	FILAMENT
