

# Seven sacred spaces: their roles

In pairs write down what you think these places were designed for. Note with each one:

- whether it is for individual or corporate use, or both
- how it aids the community within and if it engages the world beyond.

Sacred space*	Individual or corporate?	How it contributes to the whole
Cell		
Chapter		
Cloister		
Garden		
Refectory		
Scriptorium		
Chapel		

\* When conducting focus group research into the purposes of the seven sacred spaces, I deliberately held back any group's consideration of Chapel until last. This was lest its roles might be greedy, sucking in other functions better served elsewhere. I did it, too, in the hope of provoking sharper examination of Chapel's particular relationship to all the other six places. In this exercise, I have therefore put it last in the list of seven.
