GRAPHENE+CERAMIC

GRAPHENE INFUSED PROTECTION

BLACK PAINT POLISH

Our Black Paint Polish was engineered to easily remove and correct scratches and imperfections on black paint. Correcting black paint can be one of the most difficult things to do in detailing, and this product was made to make it effortless. This product is a blend of graphene, abrasive grains, and pigments which fill in light scratches and swirl marks leaving a deep, brilliant shine for a like-new appearance. ***BLACK PAINT ONLY**

16oz. PART #LFGRMRVWW16

ALCOHOL PREP SPRAY

Our alcohol prep spray was engineered to remove residue, oils, surface contaminants, waxes & fillers. This product is also fantastic for prepping your paint in preparation for a wax, polish or ceramic coating.

16oz. PART #LFGRPGPS16

GRAPHENE ESSENTIAL KIT

Renegade Products Graphene + Ceramic Essential's kit contains our Alcohol Prep Spray, Graphene Spray Coating, Graphene Wash, Graphene wax, two premium plush microfiber towels & one chenille microfiber wash mitt! This is the first kit with graphene that was designed for car enthusiasts, truck enthusiasts and heavy duty vehicles in mind! These products are easy to use and results driven!

PART #LFGRPKR-MK-CG

Kit Includes

- Graphene Spray Coating
- Graphene Wash
- Graphene Wax
- Alcohol Prep Spray
- 3 Red Microfiber Towels
- 1 Wash Mitt
- 1 Applicator Pad

AEROSOL LINE

Kiss My Glass GLASS CLEANER

Our glass cleaner is for all glass surfaces – including windows, windshields, and mirrors. Kiss My Glass will not leave streaks, residue, nor haze. It is non-flammable, and will not affect painted surfaces or tints.

13oz.
PART# LFGRPARKMG13

Lumi-Gloss Multi SURFACE SHINE SPRAY

Lumi-Gloss is a high-gloss, multi-surface protective & restorative coating. Lumi-Gloss can also be used on rubber, vinyl, and plastic molding. It can be used on trim for a high-shine non-greasy finish.

13oz.
PART# LFGRPARLG13

Buzz-Off INSECT REMOVER

Buzz-Off is a fast-acting, concentrated bug remover that deteriorates insect guts, dried bugs, and residue without damaging your paint. Buzz-Off breaks down even the most stubborn bugs with minimal scrubbing.

13oz.
PART# LFGRPARB013

Gum & Tar REMOVER

Renegade Gum and Tar Remover is a fast-acting, concentrated gum and tar remover that will help to break down gum, tar, and similar substances without damaging your paint.

13oz.

Buffing Wheel Chart

Heavy Cut

Color

Fine

Ultra Fine

Buffing Wheel Hardness Chart

Red Mill Treat

Polishing Stainless Steel
The first step is to pair our red airway buffing wheel with our Black Magic Compound. We recommend running the color stage with an RPM of 3000-3500

RED 9"

PART# FAW9X3X5/BN2-16PB8RTX

Orange Mill Treat

Aluminum Metal Polishing
We recommend pairing our Brown Tripoli Metal Polishing Compound with our orange airway buffing wheels as the first step. We recommend running the color stage with an RPM of 3000-3500

ORANGE 9"

PART# FAW9X3X5/BN2-16PB8DT

Pink Mill Treat

Polishing Stainless Steel
The second step involves using a Pink buffing wheel with our Yellow Deluxe Compound. This should produce a fantastic clean shine. We recommend running the color stage with an RPM of 2500-3200

PINK 9"

PART# FAW9X3X5/BN2-16PB8PT2

Yellow Mill Treat

Aluminum Metal Polishing
The second step in polishing aluminum, we would want to pair our yellow airway buffing wheel with our Green Rouge Metal Polishing Compound. This should produce a fantastic clean shine. We recommend running the color stage with an RPM of 2500-3200

YELLOW 9"

PART# FAW9X3X5/BN2-16PB8YT

Purple Mill Treat

Second Stage Polishing
The second step in polishing aluminum or steel, we would want to pair our Purple Wheel + Blue or White Compound. This should produce a fantastic clean shine. We recommend running the color stage with an RPM of 2500-3200

PURPLE 9"

PART# FAW9X3X5/BN2-16PPUR

UBM Airway (Untreated)

For a show-shine finish, some use a white buffing wheel with our Polishing Compound. We recommend running at no more than RPM of 1,200-1,800

FLANGES

Safety Flanges are to be used during high speed polishing and buffing with our Airway Buffing Wheels. They are meant to reduce the chances warping of the center plate of the buffing wheel.

- Recessed notch
- Less play in the flanges
- Valuable thread space on your machine's arbor.
- Threaded, no need for lock nut.

- Threaded, no need for lock nut.

- Lock Nut Need

ALUMINUM AND STAINLESS PAIRING

ALUMINUM LINE

STAINLESS LINE

STEP 1 "CUT"

The cut stage is comprised of the brown tripoli bar T-88 as our recommended compound bar coupled with an orange cutting buff. This stage should help bring a cloudy surface to a fairly bright reflection. We recommend an RPM of approximately 3000-3500 for cutting.

STEP 2 "COLOR"

By utilizing our preferred green rouge, G-16, with a yellow coloring buffing wheel, a darker and more luminous reflection will develop. We recommend running the coloring stage with an RPM of 2800-3200.

STEP 3 "SHOW FINISH"

Competition Purple, SS-510, it is a super fine abrasive compound that when paired with a domet flannel buffing wheel produces the finest show polish. We recommend an RPM of 1200-1800

STEP 1 "CUT"

The cut stage is comprised of the Black Magic bar as our recommended compound bar coupled with a red cutting buff. This stage should help bring more heat from a cloudy surface to a fairly bright reflection. We recommend an RPM of approximately 3000-3500 for cutting.

STEP 2 "COLOR"

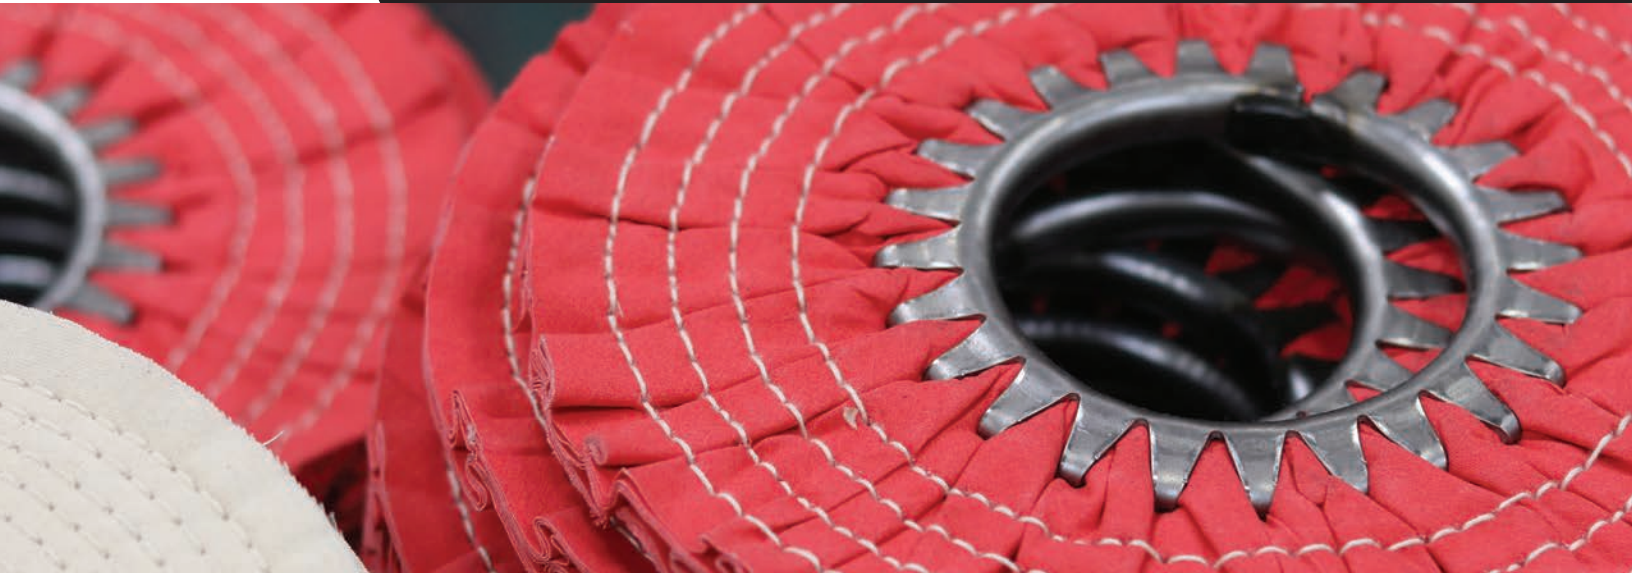

By using our Yellow Deluxe compound bar with a pink coloring buffing wheel, a darker and more luminous reflection will develop on the stainless surface. We recommend running the coloring stage with an RPM of 2800-3200.

PROS RECOMMEND

Competition Purple, SS-510 paired with a UBM flannel buffing wheel.

SEWN BUFFS & STITCHED AIRWAYS

40-PLY SEWN BUFFING WHEELS

Our 40-Ply Sewn Buffing Wheels ideal for bringing a fine, showroom worthy finish to your polished metal. Their versatile nature also makes them great for polishing urethane, polyurethane, and cultured marble surfaces. **Available in 8 inch or 10 inch.**

RAZOR CUT BUFFING WHEEL

Our Razor Cut 9" Buffing Wheel is made with 8-ply construction. It has a narrow face width that is ideal for buffing tight spaces and is specially designed for durability against aluminum diamond plate and truck steps. It is available with or without a center plate and will require the appropriate safety flanges.

WITHOUT CENTER PLATE

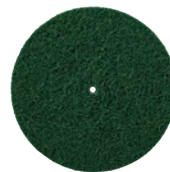

SURFACE PREP AND FINISH

SURFACE PREP/BUFF & BLEND

Our Buff and Blend line is used on angle grinders in **8", 10" and 12"** sizes. The same type of construction in a **14"** size can remove the need for flap wheels and most sanding on all but the roughest wheels. If needing to sand, we recommend using 320 grit. A 5" orbital DA can clean up any small remnants from the buff & blend disc to then be polished out with tripoli compound and a cut wheel. These discs reduce lines while prepping the metal surface. They are epoxied together to prevent flaring through the life of the sanding prep disc.

**1/2" Mandrel for
Mini Buffing Wheels**

PART#
LRSRPMBM

These 1/2" Mandrel attachments are used to fasten Mini Buffing Wheels and Mini Surface Prep Wheels to the appropriate machine for smaller polishing jobs. They are made from durable steel.

SANDING DISC

SANDING DISCS

5" HOOK & LOOP (Velcro) (50 Disc Box)

Our Sanding Discs are specifically designed for long life sanding and great grind-ability for metal polishing and restoration. These sanding discs are 5" diameter with a hook and loop backing making it perfect for switching between grits without product waste. What makes these discs last so long is their anti-static resin over resin coating along with the premium aluminum oxide grain which is specially heat treated for the roughest applications.

GRITS: 120, 180, 220, 320, 400, 600, 800

CERAMIC SHREDDER

FLAP DISCS 4-1/2" X 7/8"

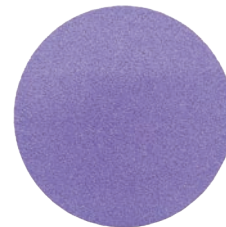

These Shredder Ceramic flap discs are perfect for removing large amounts of material and for shaping or smoothing wood & metal. Our Shredder Ceramic grain cuts through metal faster than Zirconia or Aluminum Oxide flap discs. Built for rapid stock removal, the Shredder Ceramic is our highest performing flap discs. It delivers an exceptionally fast cut and runs cool on stainless steel.

GRITS: 36, 40, 60, 80, 120

SAVAGE CERAMIC DISC

Premium ceramic abrasive grain on a unrippable film backing! These discs are both **EXTREMELY** durable and **LONG LIFE** as this uses brand new **CERAMIC** abrasive grain technology that is perfect for sanding softwood, hard wood and of course metal! These discs were designed to sand **ANYTHING** and last longer than any Home Depot, Lowe's or even industrial grade sandpaper. We wanted to manufacture the absolute best in sanding disc.

NO HOLE HOOK AND LOOP

TOUCHLESS 2-STEP WASH SOAP SYSTEM

TOUCHLESS 2-STEP TRUCK WITH FOAM CANNONS

LOW PH & HIGH PH SOAP

The Touchless 1 & 2 Truck Wash Soap was engineered & manufactured to be a best-in-class shampoo system that is powerful and effective for any professional or owner-operator to use. Due to the sheer size of a big rig or semi-truck, washing can be a daunting task that we have streamlined with our effortless 1 & 2 step soaping system.

Our Low pH truck wash (step 1) has a pH of about 3 or 4 and is used to shock and emulsify the dirt, grime, bugs & industrial fallout that is embedded on the trucks surface. Because this soap is on the acidic side, it is imperative to follow this step with the High pH soap for step #2 to neutralize the acid as well as help to pull any remaining dirt and grime off of the vehicle.

Touchless wash soap is available in drums.

Please note that this dual-action system doesn't replace hand washing or detailing but is meant to expedite fleet cleaning, effectively removing most dirt and grime, leaving some spots behind, especially on heavily soiled or infrequently washed vehicles, where additional scrubbing may be necessary.

Note: You need a pressure washer system; bucket use is not suitable. The Low-pH soap must be followed by the High-pH soap, in some cases, the High-pH Soap can be used as a standalone product as a strip soap.
