

# Learn at Home: Bee Finger Puppet

## Supplies Needed:

- Paper
- Scissors
- Crayons, Markers, or Colored Pencils
- Glue or Tape

## Instructions:

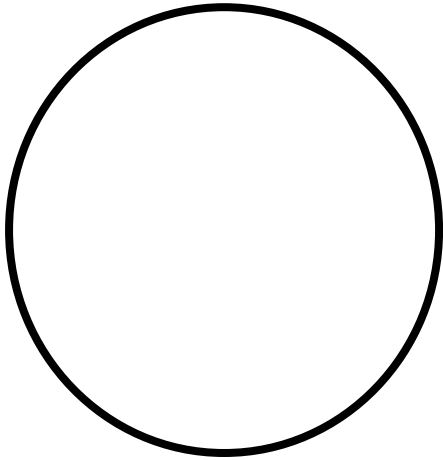

1. Print out the template on the following page. If you don't have a printer, draw one small circle for the bee's head, a larger circle for its body, and two wings.
2. Cut out each shape. Cut out two small holes in the bottom of the bee's body, these will be for your fingers.
3. Color in the bee's head and body. You can give it yellow and black stripes if you want. Don't forget to give your bee a face!
4. Assemble your bee. Glue or tape the head to the top of the body and attach the wings to either side.
5. Place two finger into the small holes and make your bee fly!

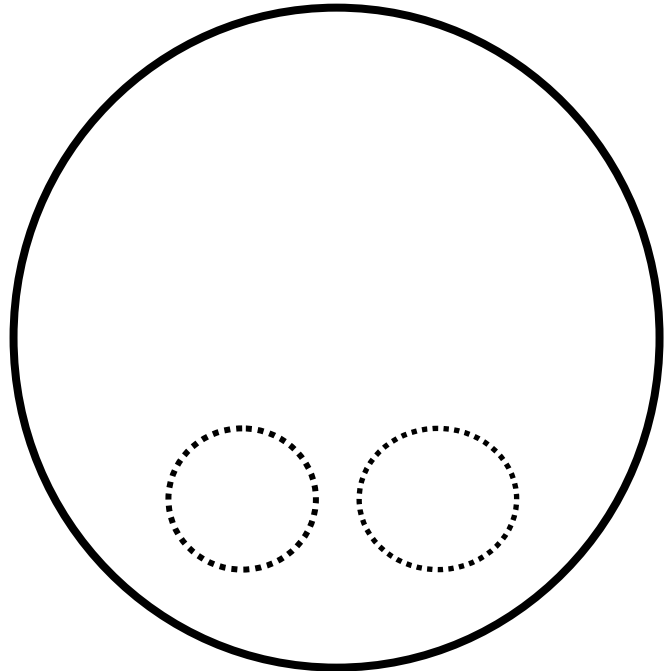

## Learn a little something:

Bees are very important little creatures with big responsibilities. They are **pollinators**. A pollinator is anyone who moves pollen from one flower to another flower. This is an essential process for many plants and allows them to produce fruits and seeds. Many of the foods we eat wouldn't exist without bees and other pollinators such as butterflies, birds, and bats.
