
FIBREGLASS

PROPERTIES, CLEANING & MAINTENANCE

Stain resistant	The non-porous surface prevents household agents leaving permanent stains
Fade resistant	Superior UV resistant pigments will ensure non-fade
Heat resistant	Indirect heat transfer up to 100°C (not open flame)
Scratch resistant	Fine scratches can be removed
All weather application	Indoor or outdoor use

CLEANING:

- Do not use scourers, abrasive material or solvent based cleaning fluids
- You may use standard dishwashing liquid, this is considered mild and safe to use
- Daily cleaning is essential to ensure your top is retained in pristine condition

FURNITURE MANUFACTURERS & IMPORTERS

MAINTENANCE:

- Wax at least twice a year to restore gloss and protect the finish
- Do not expose the underside of the tops to excessive water, as this may enter the air vent and damage the sub straight
- Prevent sharp objects from coming in contact with the surface

*Failure to comply with the cleaning & maintenance instructions will result in forfeit of guarantee
