

Recycled Rubber Parking Curbs

Made from 100% Recycled Tires

Why Rubber is Best

Rubber Curbs weigh less than half of concrete version. Transportation to the job site requires less equipment and fewer workers. Two crew members can install curbs for less and without heavy equipment needs.

Rubber curbs are impervious to salt and other corrosive materials. They will not crack or corrode and will outlast Candian seasons. Rubber curbs are a fraction of the cost and perform better than concrete.

Installation & Maintenance

- transfer curbs to job site
- use proper equipment for better installion
- 15mm rebar spike with welded cap option, 1/2" heavy bolt w/washer option

Features & Advantages

- long lasting and affordable
- absorbs impact reducing risk to undercarriage of a vehicle
- transportation and installation by 1 or 2 workers
- flexibility allows curb to contour to uneven surfaces
