### MEASUREMENTS

°C

Spot 1	23.4
Spot 2	22.6
Spot 3	25.3
Spot 4	31.2
Spot 5	25.6

### PARAMETERS

Emissivity	0.95
Refl. temp.	20.00 °C
Distance	1.00 m
Relative humidity	50 %
Atmospheric temperature	20.00 °C
Transmission	0.94

This is a sample report generated using the free FLIR Tools software.

The original image was taken with a FLIR E5 thermal camera.

The image above shows how you can select multiple points if you wish to show your client a specific issue, or if you wish to gauge the temperature in different positions later on, after you have taken the photo.

You can also add arrows to draw attention to specific issues.
