efergy®

Switch on/off up to 8 Smart Sockets

Monitor your energy use in real-time

Set On/Off timers for your appliances

Master and slaves for appliances control

Standard https API for 3rd party integration

# Smart Master & Sockets

## Appliance Control on the go!

### DESCRIPTION

The **Smart Master & Sockets** will make your life that bit easier. With The **Master Socket** you can switch appliances on/off, set timers and monitor electricity consumption allowing you to check how much it costs to run the appliance. It will also switch on/off up to 8 **Slave Sockets**.

**Full integration with your own platform:** The **Master Socket** will provide you with instant as well as historical data through the cloud.

**RESTful API:** Fetch and retrieve data from the cloud server.

### KEY FEATURES

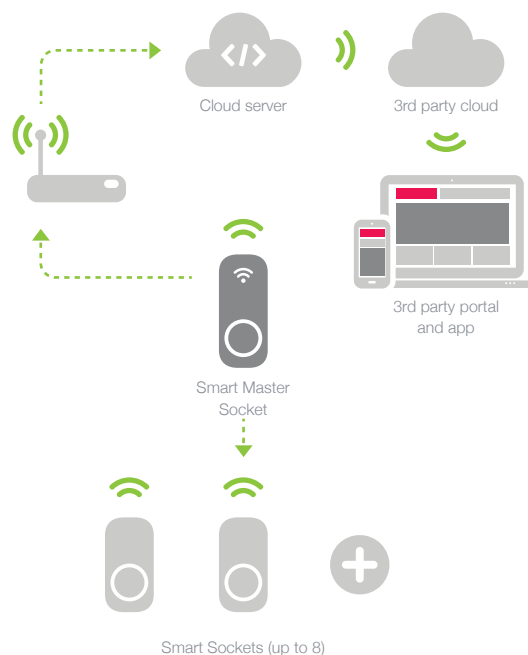

- ✓ Switch on/off up to 8 **Smart Sockets**.
- ✓ The **Master Socket** provides real-time and historical energy consumption information.
- ✓ Set timers for automatic switching of devices.
- ✓ Encrypted security WEP, TKIP, AES, WAP, WAP2.
- ✓ Standard https API for 3rd party integration.

### HOW IT WORKS?

One **Master Socket** is plugged into the power outlet and can wirelessly control the **Smart Sockets**. The **Master Socket** allows you to control, monitor and program an appliance and can switch On/Off up to 8 **Smart Sockets**.

The **Master Socket** connects to your internet **router** via Wi-Fi, which sends the data to the **Cloud server**, then on to a **3rd party Cloud**, where it can be displayed on the **3rd party portal and/or app**.

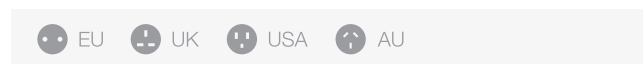

Note: The **Smart Sockets** are On/Off control only, with a wireless range over 70m in open areas.
