Bromeliad

Bromeliaceae
Origin: Tropical Americas

Light Preferences
Thrives in bright indirect light, but can tolerate a few hours of direct sun.

Water Preferences
Water every 1–2 weeks, allowing soil to dry out between waterings. Expect to water more often in brighter light and less often in lower light. Make sure the central cup of the plant has water within it at all times. This plant can benefit from extra humidity. Bromeliads can be sensitive to hard tap water. Try using filtered water or leaving water out overnight before using.

Sad Plant Signs
Yellowing leaves, wet potting mix: Plant is overwatered.
Browning, stunted growth: Too much hard water, change to filtered water.

Pet Parents
This plant is pet friendly.
