Monstera Ginny

*Rhaphidophora tetrasperma*
*Origin:* Thailand and Malaysia

**Light Preferences**
Thrives in bright indirect to medium light.

**Water Preferences**
Water every 1–2 weeks, allowing soil to mostly dry out between waterings. Increase frequency with increased light. Monsteras can benefit from filtered water or leaving water out overnight before using.

**Sad Plant Signs**

*Minimal leaf splits:*
Young plants start off with minimal splits, as they mature more will develop.

*Brown, crispy edges:*
Underwatered, or high salt build up from tap water.

*Yellowing leaves or black stems, wet potting mix:*
Plant is overwatered.
