- 1x DP 1.2
- 1x 12G-SDI (with loop through)

✦ 12-bit, 10-bit and 8-bit video inputs

✦ Genlock signal input (with loop through)

✦ Ethernet outputs

20 Ethernet outputs, up to 8.8 million pixels supported

✦ Optical outputs

Four 10G SFP+ outputs

✦ Adaptive frame rate

Adaptive to various input frame rates, including decimal frame rates

Advanced Features

✦ Color processing

Abundant functions are provided to adjust and correct the video colors, such as Color Replacement, 14CH Color Correction, Curves and 3D LUT.

✦ Dynamic Booster

The frame-by-frame image analysis and dynamic adjustment can significantly improve the display contrast and image details for better visual experience, and effectively control and lower the display power consumption, extending the service life of the LED screen.

✦ Full Grayscale Calibration

Each grayscale of the input source has its own unique calibration coefficients, which can achieve brightness and chroma uniformity in high brightness, medium grayscale, and low grayscale at the same time.

✦ Pixel level brightness and chroma calibration

Work with NovaStar's high-precision calibration system to calibrate the brightness and chroma of each pixel, effectively eliminating brightness differences and chroma differences, and enabling high brightness consistency and chroma consistency.

✦ HDR

- Support HDR10 and comply with the SMPTE ST 2084 standard.
- Support HLG and comply with the BT.2100 standard.

✦ Latency

- Support low latency. The latency at the sending card is 0 frame (less than 1 ms) and the loading capacity is not reduced.
- Support additional video delay. Zero to two frames of delay can be added at the sending card.

✦ 3D

Work with the specified receiving cards, 3D emitter and 3D glasses to bring a fascinating and immersive 3D viewing experience.

Device Controls

✦ VMP software control

The device can be connected to the VMP software to have a brand-new interaction interface and smart device management.

✦ Cascading control via Ethernet

The Gigabit Ethernet control ports support TCP/IP protocol and star topology. No switch is needed to cascade control of multiple devices as a network switch is already built in.

Notes and Cautions

Notes for Battery

- The battery is not intended to be replaced.
- Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery can result in an explosion.
- Leaving a battery in an extremely high temperature surrounding environment can result in an explosion or the leakage of flammable liquid or gas.
- A battery subjected to extremely low air pressure may result in an explosion or the leakage of flammable liquid or gas.

Notes for Installation

When the product needs to be installed on the rack, 4 screws at least M5*12 should be used to fix it. The rack for installation shall bear at least 32kg weight.

- Elevated Operating Ambient - If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may be greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the maximum ambient temperature (T_{ma}) specified by the manufacturer.
- Reduced Air Flow – Installation of the equipment in a rack should be such that the amount of air flow required for safe operation of the equipment is not compromised.
- Mechanical Loading – Mounting of the equipment in the rack should be such that a hazardous condition is not achieved due to uneven mechanical loading.

- Circuit Overloading – Consideration should be given to the connection of the equipment to the supply circuit and the effect that overloading of the circuits might have on overcurrent protection and supply wiring. Appropriate consideration of equipment nameplate ratings should be used when addressing this concern.
- Reliable Earthing – Reliable earthing of rack-mounted equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit (e.g. use of power strips).

Others

This product can only be placed horizontally. Do not mount vertically or upside-down.
