# Product Description

---

S70S multi-screen video splicing and sending processing all-in-one is a professional-grade LED display control equipment; with powerful video signal receiving, splicing and processing capabilities, can drive up to 10.4 million pixels LED screen, support 1 channel HDMI2.0 and 1 channel DP1.2 of 4k@60hz HD digital signal at the same time also supports 3 channels HDMI and 1 channel DVI digital signal; arbitrary Splicing, broadcast-level scaling, support for up to 8 screens simultaneously, multiple cascades with larger LED displays.

## Product Features

The S70S has 16 Gigabit network outputs and can support up to 30,720 wide/maximum on a single unit. With a range of rich and practical features, it provides flexible screen control and high quality image display, and can be perfectly applied to various sizes of LED displays.

## Applicable scenarios

The S70S's powerful video processing and distribution capabilities can be used in a wide range of applications such as high-end rental and small pitch displays for stages, conferences, events, exhibitions, etc.

## Features

1. Maximum band load of 10.4 megapixels, up to 30720 pixels wide and up to 30720 pixels high.
2. Maximum input resolution 4096 x 2160 @ 60Hz, with support for EDID management.
3. Digital signal interfaces in full HD, including 1 HDMI 2.0, 1 DVI, 3 HDMI1.3, 1 DP1.2.
4. Support for arbitrary switching of video sources, stitching and scaling of input images

according to the display resolution.

5. Supports 8 screens with simultaneous window display, position and size can be adjusted at will.

# Cautions

---

1. High voltage hazard: This product operates at AC -100V to 240V.
2. It is forbidden to immerse liquids, metal fragments and other conductive objects into the interior of the equipment to avoid safety accidents.
3. Please use the appliance in a dry, clean environment.
