

Dragon Professional Anywhere Cloud

Cloud Speech Recognition subscription service.
Lightweight versatility, heavyweight performance

Nuance® Dragon® Professional Anywhere Cloud is a cloud speech recognition solution empowering business professionals to create high-quality documentation – all by voice.

Everyone from individuals to large Enterprises, such as Corporate, Financial or Government sectors, can streamline repetitive and manual documentation processes. While saving time for IT staff and boosting productivity and efficiency for busy professionals across work teams and work groups.

The combination of the next generation Cloud speech recognition engine and lightweight client application virtually eliminates performance issues caused by slow PC performance. It can be customized to include sector specific terms, phrases, and formatting rules that ensure a fast and accurate speech recognition experience. Additional features include customizable voice commands and auto-texts, navigation and voice-based correction.

Highly scalable and ready-to-use, Dragon Professional Anywhere works across your existing infrastructure of Windows-based devices, including virtualized and remote-access PCs.

Dragon Professional Anywhere Cloud is available on a yearly subscription offering all users a fully updated and secure service allowing you to simply use the solution without the cost and time of maintaining the system.

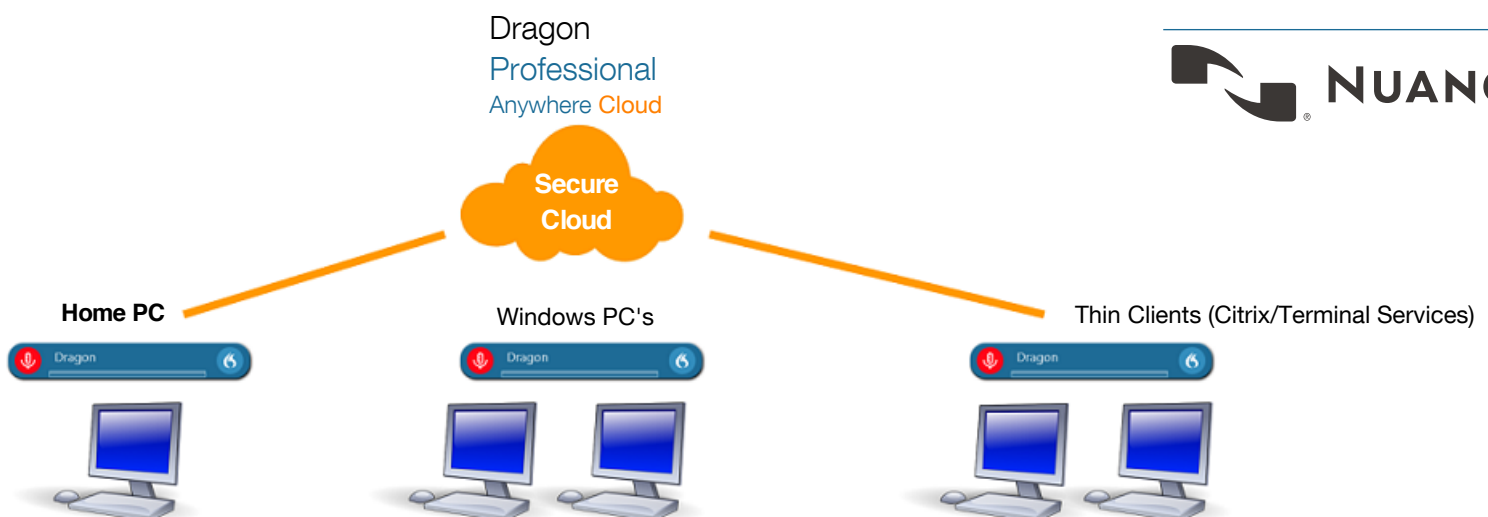

Once installed, front-line and back-office employees alike simply open the Dragon Professional Application, place the cursor where they want speech-recognized text to appear, and start dictating into Windows-based applications (e.g., Microsoft Outlook, Microsoft Word), databases or company systems.

Benefits at a glance

Cloud Subscription service allows access to the service monthly or yearly in advance. Software updates and maintenance are included.

- Achieve faster documentation turnaround
- Enable employees to focus on their “real job” rather than administrative work
- Extend existing investments and increase quality documentation within enterprise systems
- Eliminate the need for costly transcription services or inefficient manual processes
- Reduce liability risks associated with inaccurate or incomplete documentation
- Ready to use, requires no speech profile training, includes accent detection and automatic microphone calibration.

Dragon Professional Anywhere Cloud cannot be used in a Medical/Healthcare environment.

Fast, accurate, and highly customizable: Fast, extremely responsive, and highly accurate out-of-the-box enterprise speech recognition with speech profiles that can be easily accessed across multiple devices.

Hassle Free Maintenance: All software updates and Hosting costs are included in the yearly subscription. Simply use the software without the ongoing requirement to spend time maintaining the system.

No limit on productivity: Speak freely and as much as you like with no per user limits — business professionals can stay productive anywhere and focus on the business rather than the technology.

Secure HTTPS Hosting meets Highest Level of Security:

ISO 27001, ISO 14001, ISO 9001 & nen7510 certified. Disaster recovery, on-site security process and sustainability. Client data is safe and secure.

Thin client support: Support for thin client hardware, server virtualization as well as Citrix environments. Allows for fast and easy integration into existing IT infrastructure.
