## Connect SpeechLive to your SpeechExec Desktop Software

6. On the left hand side of the screen in SpeechExec, the sidebar should now contain both the local folders and the SpeechLive folders. You can now hide the local folders if they are no longer required. Simply right-click on the name of the folders you wish to hide and click 'Hide'.

7. Once you have successfully connected your SpeechLive software to SpeechLive, you should start to see files appearing automatically within the work list. To check for any new dictations, simply click the 'Refresh' icon in the top menu.
