

GT3 Update #4

What has been happening??

Greetings!

Following the great success, we have had so far with the GT3 project since its official launch in November at the Warley Exhibition 2018, we have had overwhelming support for the loco. As we write this newsletter, the CAD work is underway. There will be updates as we receive them from the factory.

We also have the details to fit the new ESU LokSound V5 sound decoder. This will allow us to incorporate this sound addition into the model. We have commissioned the leading expert with making the sound files ready for the decoder. We will be recording an actual gas turbine engine to recreate the sounds. Some of the sounds will include the following: start-up, acceleration, running at speed, deceleration, shut-down, and horn and door openings. It will be loco driven, with a 5-pole skew motor. There will be six white lights in the front (within the

headcode) and two red lights in the back.

If you want to upgrade your DCC ready loco to the sound version, as a bonus, we will be making a few extra sound decoders.

Delivery is expected, 2nd quarter 2020.

The payment plan is as follows;

DCC Ready - £185 plus shipping;

1st Payment of £50.00, to secure your model. **PAID**

2nd interim payment of £70.00, to start the tooling of the model. due **JUNE**

Final payment of £65.00 to complete the manufacturing process. due **NOV.**

DCC Sound - £285 plus shipping;

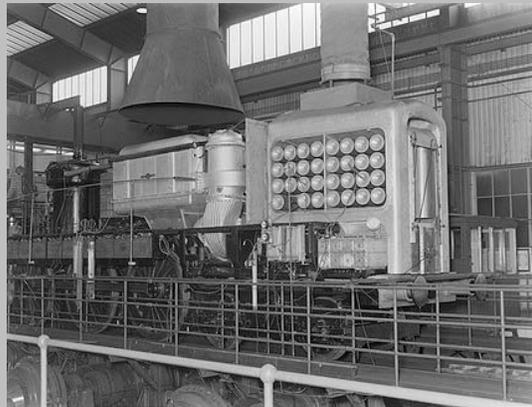

1st Payment of £50.00, to secure your model. **PAID**

2nd interim payment of £80.00, to start the tooling of the model. due **JUNE**

3rd interim payment £80.00 for the sound decoder. due **AUGUST**

Final payment of £75.00 to complete the manufacturing process. due **NOV.**

Many thanks for your commitment.

Production Schedule

We will be requesting the second installment in June 2019, also giving you 30 days to pay. This will start the tooling process, this should take about 6 - 8 months, during this period we will be requesting the payment for the sound decoders. Then the last payment should be requested for November, with delivery expected March/April 2020

Future developments

We are currently working on a side project that will complement the GT3. A further announcement will hopefully be coming soon.
