

WE DARE TO BUILD

LATEST UPDATE

The website is now LIVE V3.0.

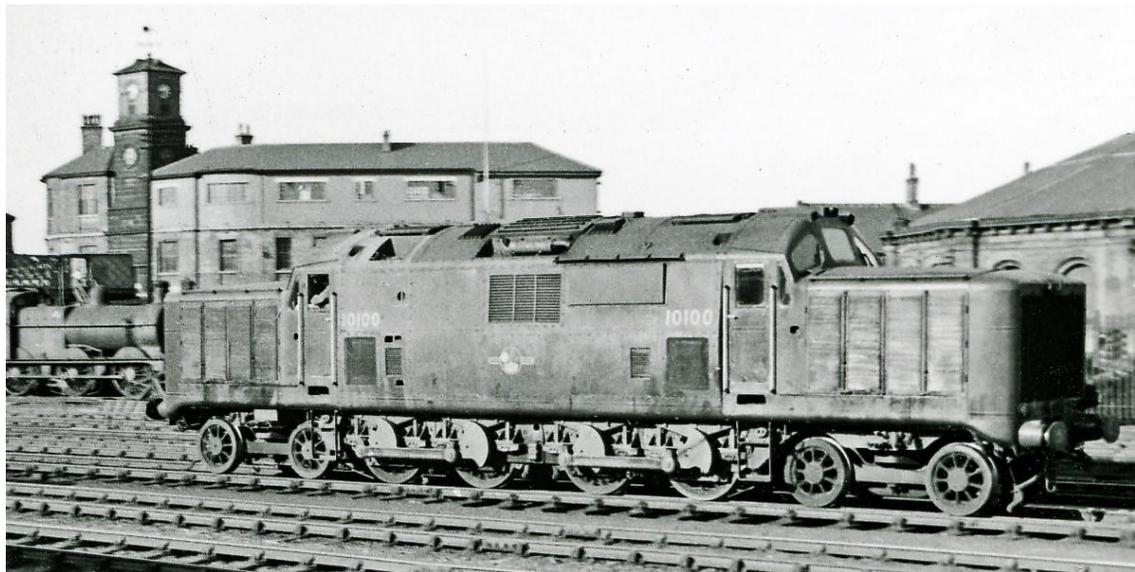

Let me just start by thanking everyone of for their  continued support of our products. To address some ongoing confusion, the information in these newsletters isn't for everyone. Not everyone is going to need all the information here, it only serves as a reminder to those who it does apply to. If you are up to date on payments, if you have already paid in full, then you have nothing to worry about and can keep reading.

The new website is now up and running. You now have the ability of checking into your own account. In the top right hand corner of the homepage there is a 'login' icon, click that and sign in as a 'New Customer'. As a first time user of the website you won't have a password, so you'll have to create one. Please use the same email address that you have been using to make your

payments up to now. Once you have gained access you may notice a few issues with your account. During the migration some customers ended up with a New York, US address, please fill in your correct shipping address. Also, your initial deposit does not have an amount on it, but does have the date, so if you can see it, then you have paid it.

Also, we still have the PayPal payment option, but now you can pay directly with your credit card. We DO NOT hold any card details, and we cannot access your card details at all.

NEW Product Announcement - The Fell.

For all those who missed it, we have announced the launch of our next project. We are now taking 'expressions of interest' for The Fell. It will be available in the running 4-4-4-4 version. The sooner we reach our target, the sooner we can start work on it. It will be available in OO and we hope to produce it in N too. Prices are £140 for DCC Ready and £245 for DCC Sound. Head to the website and register.

As a reminder, we are NOT asking for any monetary commitment right now, we just want to gauge how many people want this model.
