

WE DARE TO BUILD

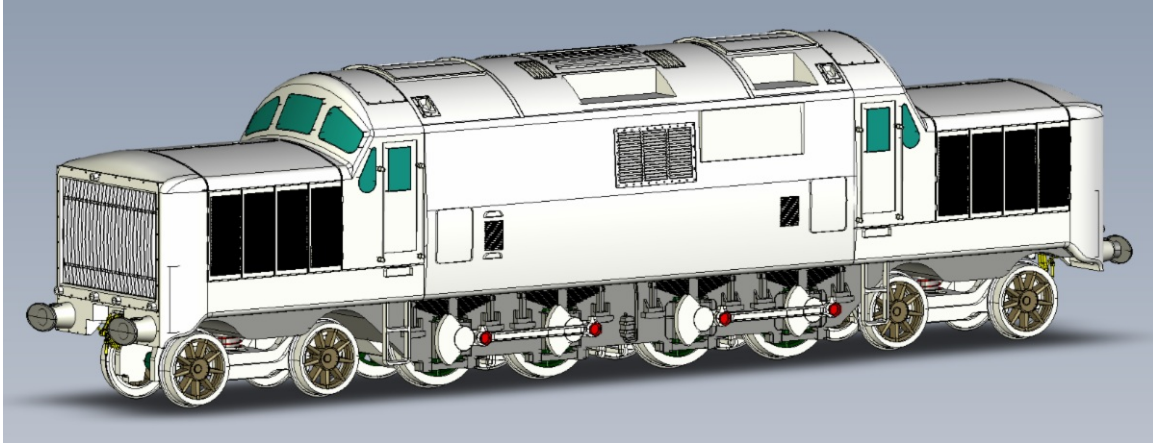

LATEST UPDATE

Where are we with the projects???

As everyone is aware  the current situation with Covid-19 (Coronavirius) is affecting aspect of everyday life. We are moving along with the GT3. As you can see above the colours have been finished and we are about to receive the last pre-production sample. Once this has been track tested and signed of on, we can head to production and assembly. Because of the quarantine imposed in China after the Chinese New Year, we are about a month behind. Delivery is expected to be early July now, only a small delay considering what the world is having to cope with.

THE FELL

Progress on the Fell is also moving along. Here is the latest screenshot of the CAD drawings so far. These should be complete by the end of April. Then we head to tooling. We should have a working sample in time for Warley this year. As a bonus we have figured out a way of including the full connecting rod to make a 4-8-4 configuration. All you will need is a spanner to unbolt the old connecting rods and replace with the new one. You get two models for the price of one. There were other changes to the body work that we can't change without a huge expense. So we are keeping to the one we have the most information on.

Just a quick note on the installment plan. When you completed your purchase you would have received a schedule on when the next payments would be taken. This is an automatic process. However, you will receive either a text message or phone call to say when the payment will be requested.

If you haven't placed your order please do so soon. This is imperative that you do following your expression of interest so the project moves along. Without your cooperation the project can't proceed.
