Terra 800 is an all-in-one communications terminal, specifically designed to be utilized in a wide variety of land based applications; such as a dedicated telephone service or a back up emergency telephone system that can be deployed throughout the world.

Featuring an intelligent RJ11/POTS interface, it enables connection of up to 5 standard corded/cordless phones or integration to a PABX system. It can support cable runs of up to 600m (2000 feet) with in-built intelligence to support standard ring, busy and dial tones.

The Terra 800 has an intuitive color LCD display that provides easy and convenient access to send and receive SMS or to retrieve phone numbers stored in the terminal.

Other key features of the Terra 800 include: a secondary SIM socket to override the internal SIM, an active privacy handset, in-built handsfree speakerphone, integrated bluetooth, USB data, in-built phone book, adjustable ring tones, desk or wall mountable.

The Terra 800 is designed to operate with the Inmarsat Link Phone service and is supplied with a dedicated high quality directional/fixed antenna system to provide a completely integrated solution that is ready for use anytime.
