

Instructions Manual

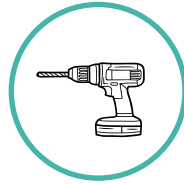

1 What you need.

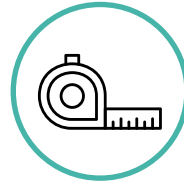

Pencil

Spirit
Level

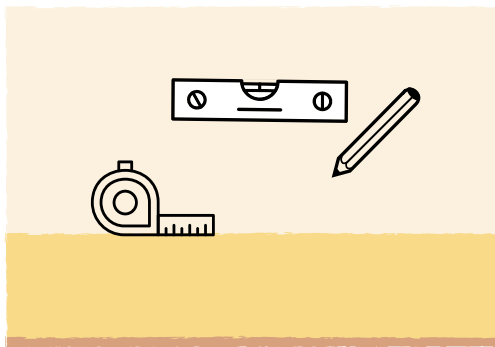

Power
Drill

Measurement
Tape

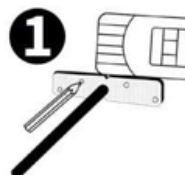

2 Measure and mark the location for the wall shelf. It will also be easier if you draw a straight line across using the spirit level.

3 Measure the distance between the holes. You can also measure the distance between the ends of two brackets. Ensure position of bracket is correct.

4 With the measurement, you can mark on the wall the positions of the brackets using the pencil.

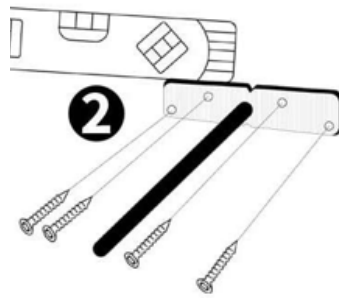

Instructions Manual

- 5 Drill holes using the power drill into the wall. Always choose screws or fittings that are suitable for the material of your wall. Knock the wall plugs provided in.

- 6 Screw the bracket into place.

- 7 Once all the brackets are in place, slide the shelves on
