It is also recommended that you have a pair of wire straightening pliers and a ruler. Follow along with the instructions below to make one earring. Simply repeat to make the second earring.

1. Begin by using your flush cutters to cut off 30 inches of wire.
2. Take one oval frame and place the last two inches of the wire over the frame about a quarter inch from the top. Think about it in the 11 o'clock position. Wrap the longer end around the frame going down about 10 wraps.
3. Then slide on 3 pearls. String the wire across the frame and wrap the wire 10 times around the frame. Make sure the wire goes through the center of the frame to create figure 8 wrap as seen in the video. So your first set of wraps went clockwise, these wraps will go counterclockwise. Please see video for helpful tips and instruction.
4. Continue in the same manner. Add 11 seed beads, wrap the wire 10 times.
5. Add 4 crystals, wrap 10 times.
6. Add 13 seed beads, wrap 10 times.
7. Add 5 pearls, wrap 10 times.
8. Add 13 seed beads, wrap 10 times.
9. Add 4 crystals, wrap 10 times.

10. Add 11 seed beads, wrap 10 times.
11. Add 3 pearls, wrap 10 times.
12. Trim the wire with the flush cutters and tuck the ends with the chain nose pliers.
13. Finally, open the earring hook, the same way you would a jump ring*, and attach it to the top of the frame. Close the loop. Please note, that you can mirror the design by attaching the earring hooks in a mirrored fashion as seen in the photo.
