

Spartan Cuff

Project B2223

Kat Silvia

Customize this cuff with your favorite colored resin, either opaque or transparent. Try mixing colors for a fun look too!

What You'll Need

Nunn Design Cuff Bracelet, Triangle Bezel 15mm/Circle Bezel 8mm, 1 Bracelet, Antiqued Gold

SKU: JB-2710

Project uses 1 piece

CASTIN CRAFT Casting Epoxy Resin Opaque White Pigment Dye 1 Oz

SKU: TRC-87

Project uses 1 piece

Nunn Design 2-Part Epoxy Resin Kit, Jewelers Grade Clear, 8 Oz Kit

SKU: TRC-14

Project uses 1 piece

CASTIN CRAFT Casting Epoxy Resin Opaque Green Pigment Dye 1 Oz

SKU: TRC-83

Project uses 1 piece

Instructions

You will also need a box to prop up your cuff on. A shoebox or tissue box works well. It is also recommend that you use protective gloves and a face mask while working with resin. You will also need a heat source such as a cigarette lighter.

1. Cut a hole into your box. You want to position the cuff so that the triangle bezel is level. Note: This design requires two resin pours several days apart so you will have extra resin. Try having molds or other bezels ready to use the left over resin.
2. For this next step please watch: [How to Use Nunn Design Resin](#). Mix your resin.
3. Then watch: [How to Add Opaque Pigments to 2-Part Resin](#) and add a drop of opaque white dye as seen in the video. Add the dye slowly to get the desired color. You may need to add another small drop.
4. Once your resin is mixed, drip it into the triangle bezel. Allow to set for a minute.
5. Use a heat source to get rid of any bubbles. Wave the lighter close to the top of the bezel to pop the bubbles. Allow to dry 1-3 days before moving.
6. Repeat the above process for the circle bezel. Set it in the box so it is level. Mix the resin, add a tiny drop of green and a tiny drop of white, or until you get your desired color. Drip it into the bezel and allow to dry 1-3 days before moving.
7. Once it's dry, you're all done!
