Instructions

To adjust the length of the bracelet, size the leather cord to your wrist and cut your SilverSilk wire mesh chain as long as you will need to accommodate the length of your leather.

1. Take your TierraCast bezel button and place a dab of E6000 glue into the bezel. Press 1 Swarovski crystal flatback into the bezel. Let the glue dry for about an hour.
2. Please watch our video on how to use the Wrapit Loom Professional Series Duo. In this video you'll see how to set up your loom, how to size your leather cord, and how to attach your Griffin Silk thread to begin weaving your bracelet.
3. Next, please watch our video on how to make a Wrapit Loom bracelet with SilverSilk wire mesh chain. This video will show you how to begin your bracelet with seed beads, how to begin attaching the SilverSilk wire mesh, and a modified wrapping technique you'll use to incorporate the wire mesh throughout the bracelet.
4. Tie off and knot your Griffin Silk as shown in the first video, and add glue to your knots. Wrap the bracelet around your wrist, and enjoy!
