Project uses 6 pieces

Swarovski Crystal, 1480 Cabochon Chatons pp21, 50 Pieces, Crystal Matte Chrome Foiled

SKU: SWCH-321511

Project uses 10 pieces

Instructions

1. First, watch our video on how to use Crystal Clay.
2. Based on the technique shown in the video, put on the gloves that come with your Crystal Clay and mix a gumball-sized ball of clay.
3. Place the clay into the bezel of your key ring and gently tamp it down until it fills the space and has a smooth dome.
4. Using the beeswax tip applicator that comes with the Crystal Clay, pick up the Swarovski chatons one by one and place them into the clay according to the pattern shown in the photo.
5. Let the clay cure for 14 to 16 hours, then your key ring is ready to be used!
