

Welcome to Noeo Science!

Each level of Noeo is a complete Christian homeschool science course for one year —experiments, daily lesson plans, and all!

- Each year contains all the hands-on mixtures, gadgets, and experiments you'd need for one year of either Biology, Chemistry, or Physics.
- Along with important facts, Noeo Science also teaches kids the basics of the scientific method and that the study of creation bears witness to God the Creator's existence (Noeo comes from the Greek word "to understand" in Romans 1:20).

EXPERIMENTS, GADGETS, & EXPLOSIONS

CHEMISTRY

PHYSICS

BIOLOGY

- Each year is based around lots of colorful, fun, informative "living books", not around a single dense textbook, and reviews and builds in complexity to match your child's development.
- The Instructor's Guide for each year contains step-by-step lesson plans for each day and reproducible worksheets—that means no prep time for the parent!
- Noeo Science is designed by homeschoolers, for homeschoolers, and is completely adaptable: Do the bundles in any order. If you have multiple children at different age levels, take them through the same bundle together!
