## Golf Solutions

Timber and Bronze Specialists

# BRONZE RANGE

Since 1930, our own foundry has been casting all non-ferrous metals in Sydney, Australia.

Our point of difference is that we cast and control the entire process, using our 85 years of experience.

**Bronze Plaque**  
Cathedral Golf Club

**Bronze Plaque**  
Bexley Golf Club

**Bronze Plaque**  
Lake Karrinyup Golf Club

**Powder Coated Bronze  
Permanent Marker**  
Strathfield Golf Club

## THE PROCESS

Pattern placed in a moulding box prior to production.

Moulds are assembled and metal is poured into the mould at approx 1200 degrees Celcius.

Chemically bonded beach sand rammed around the pattern.

After cooling, the metal casting is broken out of the mould.

Chemically bonded sand then hardened with Co<sub>2</sub> gas and removed from the box.

Finished product in situ.

# TIMBER RANGE

Dint are the industry leaders for timber course furniture. We have pioneered the move away from recycled plastic and work with high end Australian golf clubs to provide them with timber furniture that sets them apart from the rest.

We manufacture and source all of our timber products in Australia. We offer a wide selection of timbers from Merbau, Blackbutt, Red Gum, Ironbark, Tasmanian Oak, Rosewood and Teak. We understand the tough conditions out on course and make sure that our timber furniture is built to last. We believe that timber furniture should be natural and age beautifully over time.
