FEATURES

SicoVACUUM is the simple, cost-effective and quick installation system for central vacuum systems in auto repair shops and production lines. An aluminium conduit, external powder-coated (RAL 7040) and internally phosphochromatised, is at the base of the SicoVACUUM lines. A 63 mm diameter is employed as an optimal compromise between system compactness and intake volumes, thanks to an extremely low coefficient of friction inside the pipe.

The System

- Easy and rapid installation
- Reduced pressure drop
- Corrosion resistance
- Reusable
- Fire resistant
- UV resistant
- Good shock resistance
- No welding

PIPES SPECIFICATIONS

Material	Aluminium EN AW-6060 T6
Coating	RAL 7001 electrostatic coating
Temperature	-20°C to +70°C
Pressure	-0.8 to +15 bar
Compatible fluids	Compressed air vacuum nitrogen

FITTINGS SPECIFICATIONS

Body	Black nylon
Coupling ring	Grey nylon
Ring	AISI 301 stainless steel
Sealing	NBR O-ring
Temperature	-20°C to +70°C
Pressure	-0.6 to +12.5 bar
Compatible fluids	Compressed air vacuum nitrogen

DESCRIPTION

The SicoMINI LINE is the ideal solution for small compressed air distribution installations, for applications that do not require or have the space for a larger assembly. The SicoMINI LINE is easy to assemble and reliable (thanks to the integration of a clamping system within each fitting) but with a competitive price tag.

The line is assembled with durable aluminium piping and nylon fittings, which act as clamping points, guaranteeing safety, cost effectiveness and quick assembly.

The SicoMINI LINE is compatible with the rest of the SicoAIR line.

APPLICATIONS		BENEFITS	
<ul style="list-style-type: none"> • Ideal for transporting nitrogen, widely used in car repair workshops and in assembly lines • Compressed air • Vacuum 		<ul style="list-style-type: none"> • Easy and quick to install • Reduced pressure drop • Corrosion resistance • Fire resistance • UV resistance • Good shock resistance • No welding 	
TUBE SPECIFICATIONS			
Material	EN AW-6060 T6 aluminium		
Treatment	Internal and external chromatising		
Paint	RAL 6018 electrostatic painting		
Temperature range	-20°C to +70°C (-4°F to +158°F)		
Pressure	-0.8 to 15 bar		
FITTING SPECIFICATIONS			
Body	Black nylon		
Coupling ring	Green nylon		
Cutting ring	AISI 301 stainless steel		
Sealing	NBR O-ring		
Temperature range	-20°C to +70°C (-4°F to +158°F)		
Pressure	-0.6 to 12.5 bar

DESCRIPTION

SicoHOSEREELS are the complete line of automatic hose reels, which guarantee the highest reliability and safety, thanks to the complete spring rewind of the hose that prevents any accidental stumbling of the operator.

The wound hose is also kept safe from potential damage caused by trampling or incorrect rewinding, as it can be locked in intermediate positions in order to reach different areas of the workplace. SicoHOSEREELS guarantee a considerable reduction in production downtime, as the operator saves time by no longer having to rewind and arrange hoses much to the advantage of productivity.

R111 SERIES

Construction	Steel: galvanised and powder coated
Suitable for	Air only
Weight	3 kg
Supplied with	Swivel bracket and supply polyurethane hose

R111 SERIES
20 BAR WORKING PRESSURE

FUTURE PROOF YOUR MACHINE BUILD WITH EXPERTLY DESIGNED ALUMINIUM PROFILES

Expertly designed aluminium profiles and accessories will suit most assembly projects. From workstations and machine frames to machine enclosures and access platforms, the characteristically robust construction of these products is the quality choice for machine builds. To satisfy the demands of the industrial sector, the varied capabilities and easy to complete systems reduce downtime. These Aluminium Profiles are a highly versatile product for machine builds.

DESCRIPTION

uPVC (unplasticised polyvinyl chloride) is one of the most popular thermoplastic materials used for pipework installations. Lightweight, uPVC has excellent resistance to chemicals and abrasion. It is tasteless and odourless, making it ideal for use with potable water systems and most food products. The extremely smooth bore gives excellent flow characteristics. uPVC products are clearly identified by their dark grey colour. uPVC is resistant to most solutions of acids, alkalis, salts and solvents which can be mixed with water. These products are NOT resistant to aromatic chlorinated hydrocarbons. Connections can be made either by solvent cement or BSP threaded fittings.

FITTINGS AND VALVES - WRAS APPROVAL

0209097, 0209098, 0209099 & 0209100. These products are generally in accordance with BS4346 Part 1, Thread BS21, DIN2999 and ISO7. Solvent cement BS4346 Part 3.

SPECIFICATIONS

Pressure rating @ 20°C	Thread 3/8" – 4"	Solvent 1/2" – 6"	Solvent 8"
	10 bar	15 bar	9 bar

DESCRIPTION

ABS (acrylonitrile butadiene styrene) is an extremely robust thermoplastic pipework system, used by many industries in systems for food and beverage production, sewerage and water treatments, etc. ABS is extremely resistant to impact, with good resistance to chemicals, is non-toxic, conforming to the toxicological requirements of the British Plastic Federation, British Biological Research Association Code of Practice for Food Usage 45/5, and EEC requirements for plastic materials in contact with foodstuffs. These systems are light, strong and simple to fit using solvent cement. ABS products are clearly identified by their light grey colour. Has good resistance to a wide range of diluted inorganic acids, organic acids, salts, animal fats and oils but ABS is NOT resistant to organic solvents, alcohol, petrol, acetic acid or vegetable oils.

FEATURES

0209097, 0209098, 0209099, & 0209100. These products are generally in accordance with BS5392 Part 1, Thread BS21, DIN2999 and ISO7.

SPECIFICATIONS

Pressure rating @ 20°C	Thread 1/2" – 4"	Thread 6"	Thread 2 1/2" & 8"
	15 bar	12 bar	9 bar
Temperature range	-40°C to +80°C increase in temperature will reduce working pressure

TECHNICAL DATA

Malleable cast iron fittings in black or hot dip galvanised finish, covered with a preservative for temporary prevention of rust film. Used in threaded pipe joints, such as water supply, gas, steam, central heating, sprinkler system networks, etc., transporting non-corrosive liquids and gases.

RANGE OF DIMENSIONS

1/4 to 4 inches.

MANUFACTURING

Manufactured according to EN10242 and ISO 49, construction symbol "A". Produced in Poland.

MATERIAL

Fittings: Whiteheart malleable EN-GJMW-400-5 cast iron, according to EN 1562, equivalent to W 40-05, according to ISO 5922.

THREADS

Threads: according to ISO 7/1 – R tapered external threads, internal cylindrical Rp threads and according to ISO 228/1 – G connecting threads.

SURFACE / ZINC PLATING

Fittings can be supplied according to order: with black or galvanised surface. According to EN 10242, zinc coating weight relative to the surface exceeds 500 gr/m², which corresponds to an average layer thickness of 70 um. Both black and galvanised surfaces are protected against corrosion. Corrosion protection substance does not contain polycyclic aromatic hydrocarbons.

OPERATING PRESSURE

2.5 MPa / 25 bar / at the temperature from -20°C to 120°C.
2.0 MPa / 20 bar / at the temperature of 300°C.

LEAK TEST

According to EN 10242, each fitting is subjected to a leak test at air pressure of at least 0.5 MPa / 5 bar which is equivalent to a minimum hydrostatic pressure of 2.0 MPa / 20 bar.

WHITEHEART MALLEABLE IRON

EE brand pipe fittings are constructed from Whiteheart malleable iron. Whiteheart malleable iron has both good casting properties of cast iron and good mechanical properties of cast steel.

Whiteheart malleable iron is stronger and has more plasticity than Blackheart malleable iron. It has a tensile strength of 350 – 450 Mpa (hardness of approximately 220 HB), whilst Blackheart cast iron has a tensile strength of just 300 – 350 Mpa (hardness of approximately 170 – 190 HB).

It also benefits from good abrasion resistance, leak tightness, vibration damping and suffers from little thermal expansion.

WORKING PRESSURE

25 bar @ -30°C to +120°C 20 bar @ +120°C to +300°C

All threads adhere to ISO 7.1 – R tapered external threads, internal cylindrical Rp threads and acc. to ISO 228/1 – G connecting threads. Male threads are BSPT and female threads are BSPP.
