**BLOW GUNS – SERIES 208**

**FEATURES**

- Easy connection
- Ergonomically designed for comfortable handling
- Suspension possible by both the built-in hook and the handle
- The normal grip is adjusted to fit the hand during normal usage
- Extremely durable acetal plastic that also isolates against cold media
- Infinitely variable airflow with high volume flow for efficient cleaning

**SPECIFICATIONS**

Airflow at inlet pressure of 6 bar (87 psi)	500 l/m (18 CFM)
Max working pressure	Standard blow guns: 16 bar (232 psi) 8 bar (116 psi) blow gun with regulator
Temperature range	-20°C to +60°C (-4°F to +140°F)

**APPLICABLE SAFETY STANDARDS**

The products with the "OK" symbol are compliant with the OSHA directive STD1-13.1 (1910-242(b)). When dead ending occurs, static pressure at the main orifice shall not exceed 30 psi (2 bar).

The products with the "EAR" symbol are compliant with the International Standard ISO 4414 – Pneumatic Fluid Power and OSHA 1910.95 – Occupational Noise Exposure. These products have a sound level below 85 db(A) and meet the EU Machine Directive §1.5.8. concerning noise reduction demands.

## DESCRIPTION

CEJN's new MultiFLOW blow gun effectively cleans surfaces with air or water with unparalleled blowing force. Precise flow is achieved by adjustable flow settings. Nozzle adjusts from narrow jet to wide beam. The MultiFLOW meets and exceeds OSHA safety standards when dead-ended.

## FEATURES / BENEFITS

- Unmatched blowing force
- Adjustable flow control
- Adjustable beam

## SPECIFICATIONS

Air flow	200 – 1200 l/min (7 – 42 CFM)
Fluid flow	5 – 25 l/min (1.1 – 5.5 GPM UK)
Air sound level	79 – 101 dBA
Max working pressure	16 bar (232 psi)
Min burst pressure	64 bar (928 psi)
Temperature range 16 bar	-20°C to +60°C (-4°F to +140°F)
Temperature range 10 bar	-20°C to +80°C (-4°F to +176°F)
Media	Air and non-explosive water based liquids

## MATERIALS

Body	POM, TPE, aluminium
Seal	NBR (nitrile)

## APPLICABLE SAFETY STANDARDS

The products with the "OK" symbol are compliant with the OSHA directive STD1-13.1 (1910-242(b)). When dead ending occurs, static pressure at the main orifice shall not exceed 30 psi (2 bar).

The products with the "EAR" symbol are compliant with the International Standard ISO 4414 – Pneumatic Fluid Power and OSHA 1910.95 – Occupational Noise Exposure. These products have a sound level below 85 db(A) and meet the EU Machine Directive §1.5.8. concerning noise reduction demands.

## DESCRIPTION

The Typhoon is Coilhose's most powerful standard blow gun, delivering up to 34 CFM (2500 series), 51 CFM (3800 series) and over three pounds of thrust at 125 psi. The Typhoon is ideal for heavy duty clean-up and blow-off, and its lightweight and sleek design make this gun a favourite.

## FEATURES / BENEFITS

- Delivers up to 34 CFM at 125 psi
- Lightweight and ergonomic
- Variable flow trigger for control
- Maximum flow for easy clean-up and blow-off
- Integral hanging hook
- Wide variety of tips and extensions available

SPECIFICATIONS	2500 Series	3800 Series
Sound level @ 125 psi	85 Db	80 Db
Flow rate @ 125 psi	34 CFM	51 CFM
Thrust	2.1 lbs	3.1 lbs

## APPLICABLE SAFETY STANDARDS

The products with the "OK" symbol are compliant with the OSHA directive STD1-13.1 (1910-242(b)). When dead ending occurs, static pressure at the main orifice shall not exceed 30 psi (2 bar).

The products with the "EAR" symbol are compliant with the OSHA 1910.95 – Occupational Noise Exposure. These products have a sound level below 85 db(A).

## TYPHOON PLUS BLOW GUN

### FEATURES / BENEFITS

- The Typhoon® Plus delivers maximum power with precise flow control
- Durable and ergonomic high performance blow gun with built-in flow control
- Non-marking material perfect for working near delicate or polished surfaces
- Tough construction suitable for use in harsh environments

### SPECIFICATIONS

Max. operating pressure	10 bar (145 psi)
Max. operating temperature	60°C (150°F)
Nozzle thread	1/2-27 UNF 2A
Air consumption	765 l/min @ 7 bar (27 CFM @ 100 psi)
Noise level	82 dBA @ 7 bar (100 psi)

### MATERIALS

Body and trigger	POM-C
Inlet adaptor	Aluminium

### APPLICABLE SAFETY STANDARDS

	The products with the "OK" symbol are compliant with the OSHA directive STD1-13.1 (1910-242(b)). When dead ending occurs, static pressure at the main orifice shall not exceed 30 psi (2 bar).
	The products with the "EAR" symbol are compliant with the OSHA 1910.95 – Occupational Noise Exposure. These products have a sound level below 85 db(A).

### 2500 SERIES

1/4" BSPPT INLET WITH FLOW CONTROL

2020

PART NUMBER	DESCRIPTION	PRICE
CO-TYP2505P	High volume flow control blow gun	£25.24

## CANNON EXTREME HIGH VOLUME BLOW GUNS

### FEATURES / BENEFITS

Suitable for anyone with an ample air supply (tow-behind compressor for mobile applications or large capacity compressor found in plants) and has a need to move heavy/stubborn debris. Also suitable for drying or cleaning several small orifices or indentations rapidly. Geared for, but not limited to, indoor use.

Operation/performance: Air consumption equals 120 CFM at 100 psi.

## CEG 1 BLOW GUN RANGE

### DESCRIPTION

The CEG-1 is ergonomically designed to fit the natural contour of the user's hand, maximising comfort even during long term use. This gives the user a wider range of motion to direct the additional CEG-1 working capacity right where it's needed, resulting in increased blow-off efficiency.

### FEATURES / BENEFITS

- The curve of the heavy duty steel lever and soft vinyl grip allows the thumb to rest in a natural position, allowing maximum comfort
- Full-size hanging hook makes the gun easy to store and use
- Unique thermoplastic wrap-around body cover maximises user comfort
- OSHA compliant
- Maximum inlet 150 psi
- Full size hanging hook makes the gun easy to store and use
- Unique thermoplastic, wrap-around body cover maximises user comfort
- OSHA compliant
- Maximum inlet 150 psi

### MATERIALS

- Die cast zinc body
- 1/4" BSPP female thread port
- Aluminium with black anodised sleeve tip
- Nickel plated steel lever

### APPLICABLE SAFETY STANDARDS

The products with the "OK" symbol are compliant with the OSHA directive STD1-13.1 (1910-242(b)). When dead ending occurs, static pressure at the main orifice shall not exceed 30 psi (2 bar).

The products with the "EAR" symbol are compliant with the OSHA 1910.95 – Occupational Noise Exposure. These products have a sound level below 85 db(A).

**WATER GUNS AND BLOW GUNS**

**FEATURES / BENEFITS**

- Heavy duty, rubber cover
- Instantly adjustable spray pattern
- Watertight – can be used inside or outside
- Caustic and fat resistant

**SPECIFICATIONS**

Water pressure rating	Up to 24 bar (350 psi)
Temperature rating	Up to 80°C (up to 175°F)

4050

**LOW PRESSURE WATER GUN SELF CLOSING**

PART NUMBER	DESCRIPTION	PRICE
RWG2	1/2" BSPP	£82.68

**FEATURES / BENEFITS**

- All metal, water hose gun
- Sturdy construction
- Release of handle provides instant shut-off

**SPECIFICATIONS**

Water pressure rating	Up to 25 bar (363 psi)
Flow rate	65 l/min
Temperature rating	Up to 50°C (up to 122°F)

2700

**BLOW GUN WITH SAFETY NOZZLE**

PART NUMBER	DESCRIPTION	PRICE
ABG1-14	1/4" BSP ports	£9.01

You may also need ...

**Water hose reels**

... on page 974, section 19

### FEATURES

- Greatly reduces the incidence of repetitive strain injuries, such as carpal tunnel syndrome and back stress
- Lightweight and streamlined design
- Two rotation points prevent kinking of the supply hose
- Steel construction for maximum service life
- Rotating joint is supplied with dust cover
- Full 7 mm flow

### APPLICATIONS

- Assembly operations in the automotive and electronic industries and spray painting
- Mechanical joints for robotics

### SPECIFICATIONS

Medium	Compressed air
Working temperature	-5°C to +60°C (+23°F to +140°F)
Max. working pressure	1Mpa (10.2 kgf/cm <sup>2</sup> ) • 145 psi
Materials	Nickel plated steel, NBR seal

**AIR CURTAIN**

**FEATURES AND BENEFITS**

- 25:1 air amplification
- Up to 30 dBA noise reduction
- Health and safety compliant
- Low maintenance – no moving parts
- Ease of mounting – flange running the entire length

**APPLICATIONS**

- Product drying
- Product cooling
- Swarf contamination removal
- Air saving – reduction of energy bills
- Compressor demand reduction
- Noise reduction

**SAFETY BLOW GUN**
**DESCRIPTION**

Meech energy saving nozzles and blow guns direct compressed air over a curved surface on the outside of the nozzle. This action entrains the ambient air and amplifies the total air flow. Meech nozzles and blow guns can save up to 70% of compressed air demand, whilst significantly reducing noise levels. They have hundreds of applications and will significantly reduce running costs.

**FEATURES AND BENEFITS**

- 25:1 air amplification
- Up to 30 dBA noise reduction
- Health and safety compliant
- Low maintenance – no moving parts
- Application specific set-up
- Operator comfort – ergonomic lightweight aluminium handle

**APPLICATIONS**

- Air saving - reduction of energy bills
- Compressor demand reduction
- Swarf removal
- Any blow gun task

**COLDSTREAM AIR GUN**
**DESCRIPTION**

Coldstream air guns, from Meech, use compressed air to provide a cold air source commonly used for spot cooling. Available in adjustable and non-adjustable versions with a choice of knuckle trunking. The Coldstream air gun is capable of achieving temperatures that are over 40°C below the compressed air temperature.

**FEATURES AND BENEFITS**

- Available in two sizes
- Up to 30 dBA noise reduction
- Health and safety compliant
- Low maintenance – no moving parts
- Application specific set-up – supplied with 4 generators
- Easy to install – secure in place with a strong magnet

**APPLICATIONS**

- Ultrasonic weld cooling
- Spot cooling
- Component cooling
- Tool cooling

5700

**ADJUSTABLE**

AIRM-A60008	229 mm x 45 mm	Single	£448.80

**NEEDLE COOLER**
**DESCRIPTION**

Needle Coolers, from Meech, use compressed air to provide a cold air source. Combining a small vortex tube, hot-end silencer and flexible knuckle trunking that direct the cold air flow to the target. Typically used to cool sewing needles, a magnetic mounting bracket means the cooler can be fixed to virtually any metal surface. The Needle Cooler is capable of providing a cold air source up to 50°C below the compressed air temperature.

**FEATURES AND BENEFITS**

- Stainless steel construction – hard wearing
- Low maintenance – no moving parts
- Suitable for harsh environments
- Easy direction of cold airflow
- Quick and easy mounting – magnetic base

5700

**NEEDLE COOLER**

PART NUMBER	SIZE	OUTLET	PRICE
AIRM-A20503	148 mm x 45 mm	Single	£319.00
AIRM-A20504	148 mm x 45 mm	Double	£336.60

**CABINET COOLER**

**DESCRIPTION**

Meech Air Technology Stainless Steel Cabinet Cooler Systems provide a cold air source to stop cabinets overheating and prevent ingress of contamination, such as dust or moisture. When compared to fans that are commonly found in cabinets, Meech Cabinet Cooling Systems provide the ideal cooling solution.

**FEATURES AND BENEFITS**

- Alternative to traditional AC units
- Up to 30 dBA noise reduction
- Health and safety compliant
- Low maintenance – no moving parts
- Application specific set-up
- Easy to install
- Prevents dust entering the cabinet

**APPLICATIONS**

- Industrial PC cooling
- CCTV cooling
- Cooling equipment on marine vessels
- Machine panel cooling
- Cooling LCD touch screens

**CABINET COOLER UNIT**

**VORTEX TUBE**

**DESCRIPTION**

Meech Air Technology Stainless Steel Vortex Tubes convert compressed air into two airflows, one extremely cold and the other extremely hot. Vortex tubes have no moving parts and can produce a drop in temperature up to 50°C below the compressed air temperature, whilst hot air can be up to 50°C above compressed air temperature.

**FEATURES AND BENEFITS**

- Cold air to 50°C below compressed air temperature
- Hot air to 50°C above compressed air temperature
- Hard wearing – manufactured from stainless steel
- Maintenance free – no moving parts
- Accurate temperature control

**APPLICATIONS**

- Spot cooling
- Weld cooling
- Plastic slitting
- Product cooling
- Foodstuffs cooling

**EXPERIMENTAL KITS**

**DESCRIPTION**

The Meech Experimental Kit incorporates a Meech Vortex Tube with a Cold End Silencer and a length of flexible knuckle trunking, which can be used to direct the air flow. The Experimental Kit also includes all 8 generators, that allows for the most flexible temperature and air consumption, perfect for applications that require changing cold air temperature.

**FEATURES AND BENEFITS**

- Low maintenance – no moving parts
- Suitable for a range of applications
- No electricity costs
- Available in 2 sizes
- Runs only on compressed air
- Stainless steel construction – hard wearing
- Provided with full range of generators (temperature control)

**EXPERIMENTAL KITS**

**HIGH AND LOW COLD FRACTION**

### FEATURES / BENEFITS

- Made from nylon 6 abrasive resistant material
- Low air consumption
- Hand held or static site
- Blow or vacuum
- Use filtered air @ 60 – 115 psi / 10 mm bore air-line

SPECIFICATIONS	LVM 22	LVM AP 22
CFM @ 60 psi	9 in / 54 out	9 in / 54 out
CFM @ 100 psi	14.5 in / 101.5 out	14.5 in / 101.5 out
Air inlet size	1/4" BSPT male	1/4" compression fitting
Conveying hose ID bore	32 mm	32 mm

### SAFETY

We recommend that dry filtered compressed air and appropriate safety equipment is used with this product.

For optimum performance, the air feed line should be at least 3/8" ID bore.

Matic hose diameter internal 6.5 mm / external 10 mm  
Maximum working pressure 10 bar

## HIGH QUALITY

CEJN's high quality hose and cable reels contain a CEJN polyurethane hose or rubber cable. The reels are easy to manoeuvre and can be ceiling or wall-mounted and offer full, 300 degree movement. A robust exterior housing protects the hose or cable and reel mechanism, and the feeding action works flawless and tangle free. A stop function can be activated if full continuous feeding is not necessary at the time.

## FEATURES AND BENEFITS

- High flow and low pressure drop
- Strong, slow retraction
- Quicker hose change
- Hose guide
- Soft stop-ball prevents tripping
- Lowest pressure drop on the market

## RETRACTA R3 SERIES

### REDASHE WARRANTY DETAILS

All products supplied by Redashe are warranted from one to 10 years, depending on manufacturer. Hose supplied by Redashe carries the warranty as listed by the manufacturer. A flexible connection must be used between the hose reel and supply. Use of a solid connection will void the swivel warranty. Redashe meets the requirements of BS EN ISO 9001:2008. Certification of the system was obtained by BSI Quality Assurance on 9th December 1991, number 4601QM8001.

All warranties cover reel only and exclude any hose supplied

### REINFORCED PVC HOSE

#### FEATURES / BENEFITS

- Tough, corrosion free polypropylene construction
- Supplied with fitted hose for specified application
- Choice of lockable mounting brackets
- Virtually maintenance free
- Lightweight – average just 10 kg, easy to install
- Full automatic hose rewind for neat and tidy storage
- Low effort, easy-to-use rewind tension

## REELWORKS SERIES

### POLYPROPYLENE 60°C MAX

#### FEATURES / BENEFITS

- Lightweight and durable, just 5.7 kg
- Constructed in high-impact UV stabilised polypropylene
- Supplied with fitted PVC hose for immediate installation
- Fully assembled, includes 3ft connecting hose
- Suitable for compressed air and water
- Integral wall/overhead mounting bracket
- Latching of hose at any length
- Fully automatic hose rewind for neat and tidy storage
- Virtually maintenance free

4000

### POLYMER HOSE COMPACT

#### FEATURES

- Supplied with 15 m x 3/8" or 1/2" flexible, premium hybrid polymer hose
- Hose has no memory and lays flat when in use
- High quality, durable polypropylene housing
- Fully automatic spring rewind
- Low effort, easy to use, rewind tension
- Integral pivoting wall bracket, swivels through 180°
- Latching of hose at any length
- Latching system can be set to free run if required
- Working pressure up to 300 psi (20 bar)

4000
