B574 INSTANT GASKET

B574 is an instant gasket material that forms in place, making almost any size and shape, replacing paper, cork, etc. It eliminates relaxation and loads loss. The assembled parts are usually suitable for immediate low pressure (6 bar) service and once cured, can resist 350 bar pressure, depending on gap size.

SPECIFICATIONS

ANAEROBICS

B577 PIPE SEAL

B577 Pipe Seal is a high viscosity thixotropic gel paste, which cures rapidly, sealing instantly to 10 bar through its anaerobic cure system when in contact with metals in the absence of air (oxygen). When fully cured, it resists pressure up to 350 bar. B577 is not suitable for oxygen systems. Good chemical/solvent resistance to ethanol, motor oil, unleaded petrol, acetone and brake fluid.

B641 BEARING FIT

Bearing Fit B641 is a single part anaerobic securing compound, designed for fitting cylindrical metal assemblies and cures when confined between the parts. B641 will secure all types and sizes of bearings, shafts and cylindrical parts which will require disassembly in the future. B641 is of medium strength and is colour coded yellow for job identification.

B648 RETAINER

B648 is recommended for high strength securing where continuous working temperature is rated up to 180°C. B648 is a medium viscosity retainer dealing with gaps of 0.15 mm. B648 is used for securing all types of cylindrical parts, such as bearings, gears, splines, pulleys, keyways and set screws suitable for press fits or slip fits. B648 reduces fatigue life by eliminating stresses in the assembly.

B5299 HIGH TEMP RTV

B5299 RTV is a single component, high modulus, acetoxy curing silicone sealant / adhesive that vulcanises at room temperature to provide a permanently flexible seal and bond. Forms a tough, flexible gasket / seal that resists ageing, weathering and thermal cycling without hardening. Ideal for oil pans, transmission pans, differential covers, timing gears and valve covers. Suitable for sealing aluminium and metal ducting, refrigeration applications and hygiene seals.

PIPE AND THREAD SEALING – SEALING OF THREADED COMPONENTS

FEATURES & BENEFITS

- Provides a high pressure seal for all types of pipe connections
- Will not creep, shrink or block systems (including filters) by shredding
- Disassembly can be achieved easily with normal tools
- Replaces all tapes and hemp/paste combinations

55 SERIES

- Fittings can be backed off up to 45° for alignment without fear of leakage
- WRAS approval for drinking water and approved for use on gas fittings

LUBRICATING OIL

VG 22 AIRLINE OIL is a premier quality airline oil of naturally high viscosity index intended for the lubrication of pneumatic tools, valves and associated equipment. The product is intended for use in systems where it may be necessary to draw off any separated water. VG 22 AIRLINE OIL is inhibited to minimise thermal degradation and foaming, and protect against corrosion and deposit formation. The product is formulated to ensure rapid formation of a mist for lubrication of downstream pneumatic equipment.
