Gold: Newcomers – fresh on shelves

All prices are exclusive of VAT

Grey: Coffee that are not available yet - in process of profiling/preparation

Blue: Incoming coffees that are not available yet - transfer

Red: Temporarily unavailable

Specialty: Coffees that have a cupping score of 80+, all of our coffees are specialty

DT: Direct Trade - Coffees sourced directly from farmers

MC: Micro-lot / NO: Nano-lot = Term that designates not only a small volume of coffee, but a lot produced separately, discretely picked or processed to have special character.

In other words, a Micro-lot should have been harvested from a particular cultivar, from a particular plot of land, from a particular band of altitude, processed in a separate way or a combination of these things.

MCB: Micro-lot Blend – Same as above, but slightly bigger lots due to blending of coffee from several different small farmers that are unable to have their coffee enlisted under their name (because of the quantity)
