MEAT PROCESSING SANITATION SOLUTIONS

Meat Processing Sanitation Products

Ozo Kleen produces quality products for food processing markets. Here we have the ability to package the products in many different containers. For larger customers, bulk tank deliveries are available.

Equipment Support

Chemical dispensing equipment and chemical application system design is available to safely and accurately dispense only the amount of product needed to perform the application. Simply connect the portable ozone system to a wall mounted foam station for effective cleaning and sanitizing of all plant surfaces quickly and safely!

Product Support

Ozo Kleen will **customize** product formulas to meet any specific sanitation or environmental need.

- Alkaline Cleaners
- Acid Cleaners
- CIP and COP Products
- Smokehouse/Oven Cleaners
- Floor Cleaners
- Ozone Compatible Cleaners
- Degreasers
- Floor Cleaners
- Line/Conveyor Lubricants
- Sanitizers and Disinfectants
- Freezer Cleaners

Ozo Kleen's line of products for the food processing industry is **Kosher** certified and sanitizers are **EPA registered**.

Training Support

We provide our customers and employees with training including, chemical safety, HACCP, SSOP and Material Safety Data Sheets. Ozo Kleen is committed to providing customers with the proper information to insure all Ozo Kleen products are used, handled and stored safely.

MEAT PROCESSING SANITATION PROGRAM

PROCESSING AREA CLEANING PROCEDURE

Why OZONE?

Ozo Kleen is able to provide the highest ppm of aqueous ozone produced in a portable sanitation system utilizing our unique line of "Ozone Compatible Cleaners".

Ozone is becoming a prominent replacement for sanitizing in food processing as well as the wine and brewing industries. The process of replacing current, conventional sanitizers (such as Bleach, Peroxide and Peroxyacetic Acid/PAA) is safer and more economical. The acceptance and practice of using ozonated water is much more common and more affordable than ever.

Ozo Kleen has formulated a line of Ozo Kleen cleaners that work with the aqueous ozone produced by the Ozo Kleen system to enhance cleaning operations while using less chemical while increasing the cleaners overall effectiveness.

Food processors can feel confident that sanitizing with ozone creates a safer, more environmental, more economical and complete sanitation program.

Ozo Kleen's proven plant sanitation programs provide high quality products with experienced customer training programs. Our sanitation programs and products allows us to give customers the most effective environmental, economical product solutions in the industry.

Ozo Kleen's extensive technical support initiatives include:

- Plant & equipment surveys.
- Chemical safety training program.
- Training in cleaning and sanitation techniques.
- SSOP's, HACCP Plans and Master Sanitations Schedules
- Safety and cleaning audits.

Ozo Kleen sales and service personnel are educated. Ozo Kleen will implement cost effective sanitation programs to suit our customer's needs. This enables our customers to lower sanitation cost and improve their sanitation results. We are proud to say that we are a business totally dedicated to our customers and their particular needs. Ozo Kleen formulates and packages our products under stringent Quality Assurance. Given the opportunity, we will earn your business.
