

## MAVERICK SERIES DUCTED DOWNDRAFT TABLE

SPECIFICATIONS AND TECHNICAL DATA

Our downdraft work surface is the versatile, cost-effective, and customizable solution for a safer and more efficient industrial workspace

### APPLICATIONS

Works in a variety of applications – increases worker productivity.  
GRINDING, PLASMA/TORCH CUTTING, SANDING, WELDING SMOKE, DEBURRING, FUMES

#### Elevate Your Workspace with the DownDraft Work Surface

Our downdraft work surface is tailored for industrial manufacturing, offering a range of benefits for enhanced productivity and safety.

#### Contaminant Control

Designed to draw contaminants away from the worker's breathing zone, our system ensures an even airflow across the table surface, eliminating "dead air zones." This guarantees a 100% usable work area and cleaner, safer air.

#### Flexible and Cost-Efficient

Our non-powered unit easily connects to your exhaust or filtration system, reducing airborne contaminants at the source. It's the most cost-effective choice, and you can upgrade the filtration as needed without purchasing a new table. Exhaust capacities range from 100 to 300 fpm per square foot.

#### Adaptable to Your Needs

Our modular design allows individual or grouped use, with sizes available in 30"x48" or 30"x72". Should your requirements change, add or reconfigure tables as necessary.

#### Ease of Mobility

Opt for the optional 3" casters for added convenience and workspace flexibility.

#### Built to Last

Our heavy-duty cabinet design and sturdy components ensure a durable work surface, with a 750 lb. capacity for the 48" table and 1,125 lb. capacity for the 72" table.

#### Customisable Features

Adjustable height in 3" increments accommodates various requirements. Without wheels, it ranges from 30" to 36". With wheels, it varies from 33.75" to 39.75".

#### Versatile Hopper Openings

Choose from a variety of hopper openings to match your specific application.

#### Enhanced Safety

For grinding and tasks involving flying debris, consider our optional spark shield for added protection.
