Dear Customer,

Advanced Pressure Systems (APS) is a manufacturer of a full range of products in the 15K, 20K and 40K psi pressure ranges. We are also an authorized United States Distributor of TurtleSkin protective clothing and a StoneAge Tools Authorized Reseller, and we are a major supplier of Parker PolyFlex and Spir Star hoses and flex lances. We are pleased to provide you with our latest water blasting equipment and accessories catalog.

Advanced Pressure Systems is dedicated to providing our customers with the best service available anywhere in the water blasting equipment supply field. We have an excellent record of delivering the best products when and where they are needed. Relentless review and improvement of all aspects of our service to the customer is still our everyday objective. Our professional engineering team provides innovative problem solving, and our friendly sales and support personnel are always available and ready to help with their excellent product knowledge.

APS products are designed to be compatible with water blasting industry standards, wherever possible, and we use the cartridge concept for replacement of wear parts in our products, which is consistent with current best practices. Our international customers should be aware that our control guns, flow dividers, pressure regulators, nozzles and fittings can also be supplied with metric or BSPP connections.

We look forward to hearing from you soon.

Yours Truly,

Affiliated Companies and Associations

APS Staff

Advanced Pressure Systems was established in April 2007, but the cumulative experience of our people means that we offer a wealth of water blasting knowledge that rivals even our older competitors. We are committed to the success of all of our clients and will do everything within our power to help you realize that success.

Sales Representative

Our headquarters is in Tomball, TX, and we have a secondary sales office and distribution center in La Porte, TX, near the Ship Channel. We are a growing company with roots firmly planted in the water blasting industry. Our clients are worldwide, and that means something. We provide unmatched customer service, products and price.

Our family is always growing, and if you would like to become an APS Authorized Distributor we would love to speak with you. Please call our headquarters to request a Distributor Request Form, and someone will respond to you promptly.

STANDARD TUBE NOZZLES

AP Style Standard Tube Nozzles feature FNPT threads to go with MNPT threaded lances, a slimline design that makes it easy to move through almost any size of tubing, and a wide range of options for precision drilled orifices. Medium Pressure (MP) and High Pressure (HP) Standard Tube Nozzles are designed to go with lances with either right or left hand Autoclave Type Medium Pressure threads, a special seating design that eliminates the requirement for gland nuts and collars, wrench flats for easy installation, and offer a wide range of options for precision drilled orifices.

STANDARD TUBE NOZZLES w/ TUNGSTEN CARBIDE BLADE

Tungsten Carbide Tipped Tube Nozzles are to be used in rotary applications for the removal of hardened plugs in heat exchanger tubes.

We can drill at these particular angles:

- 5° forward
- 15° forward
 - 90° side
 - 45° back

TURBO NOZZLES

Turbo Nozzles provide the most thorough cleaning of tube walls with maximum impact without streaking. These nozzles also integrate backward-facing orifices that propel them through hard deposits on the I.D. of pipes and tubes. At the same time, part of the nozzle rotates and polishes the pipes' I.D.

We offer custom flow rates for your special applications. Turbo Nozzles or Blanks are used to cap the end of the nozzles (sold separately). Parts that are worn can be replaced in the field within five minutes with a simple rebuild kit to minimize downtime.

PART NO.	TURBO NOZZLES	INLET	MAX PRESSURE
15-059-001	TURBO NOZZLE ASSEMBLY, #1 FLOW RATE BODY & SLEEVE	5/16"-24 MMS	4.0 GPM @ 10K psi (689 bar) 5.1 GPM @ 15K psi (1034 bar)

MULTI-GROOVE NOZZLES

High Production Stainless Steel Multi-Groove Nozzles come in pressure ratings to match your flex or rigid lances. Multi-Groove Nozzles feature FNPT threads to go with MNPT threaded lances. Multi-Groove Nozzles have wrench flats for easy installation on the lance and offer many options for up to four rows of precision drilled orifices.

Please specify drilling pattern, pressure and flow when ordering.

PART NO.	MULTI-GROOVE NOZZLES	INLET	O.D.	MAX PRESSURE
15-003-001	MULTI-GROOVE FNPT BLANK NOZZLE	1/16" NPT	--	15K psi (1034 bar)

15-003-041	MULTI-GROOVE FNPT BLANK NOZZLE	1/2" NPT	--	15K psi (1034 bar)

FNPT NOZZLES

FNPT Nozzles are to be used in rotary applications for the removal of hardened plugs in heat exchanger tubes. FNPT Nozzle NPT threads go with lances with MNPT threads, and the slimline design makes it easy to move through almost any size of tubing. There are also a wide range of options for precision drilled orifices.

PART NO.	FNPT NOZZLES	INLET	O.D.	MAX PRESSURE
15-002-001	FNPT1 BLANK NOZZLE	1/16" NPT	--	15K psi (1034 bar)
15-002-011	FNPT2 BLANK NOZZLE	1/8" NPT	--	15K psi (1034 bar)

15-002-041	FNPT6 BLANK STAINLESS STEEL NOZZLE	1/2" NPT	--	15K psi (1034 bar)

BUTTON TIP FLEX LANCE NOZZLES

Button Tip compact stainless steel nozzles come in pressure ratings to match your flex lances. They are ideal for cleaning small diameter tubes with small radius bends. Button Tip Flex Lance Nozzles feature FNPT threads to go with lances with MNPT threads, and all offer many options for precision drilled orifices.

PART NO.	BUTTON TIP FLEX LANCE NOZZLES	INLET	O.D.	MAX PRESSURE

BUTTON TIP TUBE CLEANING NOZZLES

Tube Cleaning Nozzles use high performance sapphire insert assemblies, are made of hardened stainless steel, and are ideal for most Ultra High Pressure (UHP) rigid lance tube cleaning applications. Each requires the use of an “ADMAC style” brass button (*Part No. 17-000-000*) to attach to the rigid lance.

PART NO.	BUTTON TIP TUBE CLEANING NOZZLES	INLET	O.D.	LENGTH	MAX PRESSURE

TLX NOZZLES

Stainless Steel TLX Nozzles come in pressure ratings to match your flex or rigid lances. TLX Nozzles feature FNPT threads to go with lances with MNPT threads, 20K psi TLX Nozzles have Autoclave-type MP threads, and the 40K psi TLX Nozzles have autoclave-type HP threads. All have wrench flats for easy installation on the lance and offer many options for 3 or 4 rows of precision drilled orifices.

PART NO.	TLX NOZZLES	INLET	O.D.	MAX PRESSURE

THRUSTER NOZZLES

Stainless Steel Thruster Nozzles are used with flex lances in conjunction with another tube cleaning nozzle. They allow one to “stack” the nozzles so that additional jets can be used for a more thorough cleaning.

PART NO.	THRUSTER NOZZLES	INLET	O.D.	MAX PRESSURE
15-101-061	BLANK NOZZLE THRUSTER	1" NPT (M X F)	--	12K psi (827 bar)

MONRO-JET ORBITAL NOZZLES

Monro-Jet Orbital Nozzles offer the hard hitting capability of the straight jet with the wider path of the fan jet and are available up to 40K psi (2800 bar). Metric and U.S. connections are available, allowing for installation on to lances, guns, and remotely controlled equipment.

PART NO.	MONRO-JET ORBITAL NOZZLES	INLET	O.D.	MAX PRESSURE

MONRO-JET ORBITAL NOZZLE REPAIR KITS

The Monro-Jet Orbital Nozzle series uses an internal rotor to achieve a spinning fan jet. The repair kits above are replacement rotors for rebuilding the tool.

Additional sizes are available upon request.

PART NO.	MONRO-JET NOZZLE REPAIR KITS	INLET	O.D.	MAX PRESSURE
16-201-035	REPAIR KIT, (0.035" / 0.9MM) ORIFICE	--	--	3.544 GPM @ 10K psi (689 bar) 5.0 GPM @ 20K psi (1379 bar)

PENETRATOR NOZZLES

Stainless Steel Penetrator Nozzles are used with rigid or flex lances with MNPT threads. The rounded nose shape permits a range of forward and side drilling patterns, while the backwards facing ridge allows a large number of pulling orifices to more efficiently clean fouled tubing. Wrench flats allow for easy installation.

PART NO.	PENETRATOR NOZZLES	INLET	O.D.	MAX PRESSURE
15-005-001	BLANK PFNPT PENETRATOR NOZZLE	1/16" NPT	--	15K psi (1034 bar)

15-005-031	BLANK PFNPT PENETRATOR NOZZLE	3/8" NPT	--	15K psi (1034 bar)
15-005-041	BLANK PFNPT PENETRATOR NOZZLE	1/2" NPT	--	15K psi (1034 bar)

EVAPORATOR NOZZLES

Stainless Steel Evaporator Nozzles are used with rigid or flex lances with MNPT threads. The design permits a range of forward and side drilling patterns, while the backwards facing ridge allows a large number of pulling orifices to more efficiently clean fouled tubing. Wrench flats allow for easy installation.

PART NO.	EVAPORATOR NOZZLES	INLET	O.D.	MAX PRESSURE

MALE MACHINE SCREW NOZZLES

Stainless Steel MMS Nozzles come in pressure ratings to match your flex or rigid lances with female machine screw threads (UNF or UNC). The compact MMS nozzles have a special slimline design that assures that the outside diameter matches the outer diameter of the lance, and they have wrench flats for easy installation. All offer many options for three or four rows of precision drilled orifices.

PART NO.	MALE MACHINE SCREW NOZZLES	INLET	O.D.	MAX PRESSURE
15-008-000	MALE MACHINE SCREW NOZZLE BLANK	10-24 UNC	0.250"	15K psi (1034 bar)

15-008-003	MALE MACHINE SCREW-3 NOZZLE BLANK	5/16"-24 UNF	0.406"	20K psi (1379 bar)

MALE MACHINE THREAD LANCE NOZZLES

Our Button-Tip Compact Stainless Steel Nozzles come in pressure ratings to match your flex lances. They are ideal for cleaning small diameter tubes with small radius bends. 40K psi Male Machine Thread Lance Nozzles have Autoclave-type HP threads and offer many options for precision drilled orifices.

Please specify drilling patterns, pressure, and flow when ordering.

SAPPHIRE INSERT SCREWDRIVERS

We offer specialized quality screwdrivers for use in installing the slotted sapphire nozzle inserts in to the sleeves. They feature a magnetic butt, pocket clip, and 1/8" blade.

PART NO.	SAPPHIRE INSERT SCREWDRIVERS
17-006-100	HEX TYPE JEWEL W/ MAGNET SCREWDRIVER ASSEMBLY
17-006-101	SLOTTED TYPE JEWEL W/ MAGNET SCREWDRIVER ASSEMBLY

PINEAPPLE LINE MOLE NOZZLES

Pineapple Line Mole Nozzles are made from stainless steel with a special copper coating to prevent galling during installation. These nozzles are used with line mole inserts, and wrench flats allow for easy installation.

LARGE ULTRA-POLISHED NOZZLES & NOZZLE HOLDERS

Ultra-Polished Nozzles are to be used in high flow applications where a high cohesive straight jet of water is required for large cleaning applications. They are often used with shell-side cleaners but have many other uses.

Female and male threaded nozzle holder assemblies are available as well. The carbide insert comes in 12 different orifice sizes to suit your flow pressure requirements.

LARGE TUNGSTEN CARBIDE NOZZLE ASSEMBLIES & INSERTS

Large Tungsten Carbide Nozzle Assemblies are to be used in high flow applications where a solid stream of water is required for big cleaning jobs, such as in paper mills, power plants, tube bundle cleaning, tank cleaning, and reactor vessels.

The 3/4" threaded NPT nozzle holders come in a standard 2-3/4" long assembly and are also available in a shorter 2-1/8" long holder. The carbide inserts come in 11 different orifice sizes to suit your applications.

DROP-IN TUNGSTEN CARBIDE FAN TIP NOZZLES & CONTROL GUN NOZZLE HOLDERS

Drop-In Tungsten Carbide Fan Tip Nozzles are compact inserts made to drop in to the typical quick-change nozzle holder body common to shotgun cleaning applications.

Our quick-change Control Gun Nozzle Holders accommodate the Tungsten Carbide Drop-In Tips common to shotgun cleaning applications. Simply unscrew the cap and drop in the appropriate nozzle for the job.

CARRIER NOZZLES

Our Carrier Nozzles are ideal for the Cobra Control Gun, as they are available with 2-5 ports. Inlet ports are 9/16" HP Cone or Button, and nozzle ports are usually 3/8"-24.

PART NO.	CARRIER NOZZLES	O.D.	MAX PRESSURE
17-005-001	HIGH PRODUCTION 4-JET (OFFSET) STAINLESS STEEL CARRIER NOZZLE (3126)	1.990"	40K psi (2758 bar)
17-005-007	HIGH PRODUCTION 4-JET (EQUALLY SPACED 24° INCLUDED) STAINLESS STEEL CARRIER NOZZLE (3144-4)	1.490"	40K psi (2758 bar)
17-005-008	HIGH PRODUCTION 5-JET (EQUALLY SPACED 24° INCLUDED) STAINLESS STEEL CARRIER NOZZLE (3144-5)	1.490"	40K psi (2758 bar)
17-005-136	9/16" UH RH (F) BUTTON X 2-3/8"-24 JETS @ B (20° INCLUDED) CARRIER NOZZLE	--	40K psi (2758 bar)
17-005-137	9/16" UH RH (F) BUTTON X 2-3/8"-24 JETS @ B (30° INCLUDED 5" PATTERN @ 6" AWAY) CARRIER NOZZLE	--	40K psi (2758 bar)
17-005-138	1.990" O.D. X 3-3/8" LONG X 9/16" UHF BUTTON X 3 JETS @ 30° (INCLUDED ANGLE JEWELLED EQUALLY SPACED) STAINLESS STEEL CARRIER NOZZLE (J/S TYPE: 53970)	1.990"	40K psi (2758 bar)

RADIAL PANCAKE NOZZLE ASSEMBLIES

We offer a wide variety of sizes in Pancake Style Nozzles for tube cleaning applications. Each is made of hardened stainless steel, features four (4) jets @ 90° that use high pressure sapphire inserts, and the cut-outs on the 3" and above save a great deal of added weight. The largest is 6" wide.

Please specify orifice size, pressure and flow when ordering.

PART NO.	RADIAL PANCAKE NOZZLE ASSEMBLIES	INLET	DIAMETER	MAX PRESSURE
17-010-001	STAINLESS STEEL 90° RADIAL PANCAKE (4 JETS @ C)	9/16" UHF BUTTON	2"	40K psi (2758 bar)
17-010-002	STAINLESS STEEL 90° RADIAL PANCAKE (4 JETS @ C)	9/16" UHF BUTTON	4"	40K psi (2758 bar)
17-010-003	STAINLESS STEEL 90° RADIAL PANCAKE (4 JETS @ C)	9/16" UHF BUTTON	5"	40K psi (2758 bar)

NPTM to NPTF REDUCER BUSHINGS

Specifically designed for water blasting service, these high quality Reducer Bushings are made from heavy duty stainless steel because of its reliability and durability.

PART NO.	NPTM TO NPTF REDUCER BUSHINGS	INLET	OUTLET	MAX PRESSURE
20-010-017	REDUCER BUSHING	1-1/4" NPTM	1" NPTF	10K psi (690 bar)
20-010-014	REDUCER BUSHING	1" NPTM	1/2" NPTF	12K psi (827 bar)
20-010-015	REDUCER BUSHING	1" NPTM	3/4" NPTF	12K psi (827 bar)
20-010-016	REDUCER BUSHING	1" NPTM	3/8" NPTF	12K psi (827 bar)
20-010-001	REDUCER BUSHING	1/8" NPTM	1/16" NPTF	15K psi (1034 bar)
20-010-002	REDUCER BUSHING	1/4" NPTM	1/16" NPTF	15K psi (1034 bar)
20-010-003	REDUCER BUSHING	1/4" NPTM	1/8" NPTF	15K psi (1034 bar)
20-010-004	REDUCER BUSHING	3/8" NPTM	1/16" NPTF	15K psi (1034 bar)
20-010-005	REDUCER BUSHING	3/8" NPTM	1/8" NPTF	15K psi (1034 bar)
20-010-006	REDUCER BUSHING (GDWJ TYPE: 77203006)	3/8" NPTM	1/4" NPTF	15K psi (1034 bar)

20-010-009	REDUCER BUSHING	1/2" NPTM	1/4" NPTF	15K psi (1034 bar)
20-010-010	REDUCER BUSHING (GDWJ TYPE: 77203010)	1/2" NPTM	3/8" NPTF	15K psi (1034 bar)
20-010-011	REDUCER BUSHING (GDWJ TYPE: 77203017)	3/4" NPTM	1/4" NPTF	15K psi (1034 bar)
20-010-012	REDUCER BUSHING	3/4" NPTM	3/8" NPTF	15K psi (1034 bar)
20-010-013	REDUCER BUSHING	3/4" NPTM	1/2" NPTF	15K psi (1034 bar)

AUTOCLAVE STYLE REDUCER BUSHINGS w/ GLAND NUTS & COLLARS

These Stainless Steel Bushings are also available without gland nuts and collars upon request.

PART NO.	REDUCER BUSHINGS	INLET	OUTLET	MAX PRESSURE
21-007-156	REDUCER BUSHING W/O GLAND NUT & COLLAR	3/4" MPF	M36 X 2	20K psi (1379 bar)
21-008-001	REDUCER BUSHING W/ GLAND NUT & COLLAR	3/8" MPM	1/4" MPF	20K psi (1379 bar)
21-008-002	REDUCER BUSHING W/ GLAND NUT & COLLAR	9/16" MPM	1/4" MPF	20K psi (1379 bar)
21-008-003	REDUCER BUSHING W/ GLAND NUT & COLLAR	9/16" MPM	3/8" MPF	20K psi (1379 bar)
21-008-004	REDUCER BUSHING W/ GLAND NUT & COLLAR	9/16" MPM	9/16" MPF	20K psi (1379 bar)
21-008-005	REDUCER BUSHING W/ GLAND NUT & COLLAR	3/4" MPM	3/8" MPF	20K psi (1379 bar)
21-008-006	REDUCER BUSHING W/ GLAND NUT & COLLAR	3/4" MPM	9/16" MPF	20K psi (1379 bar)
21-008-007	TORPEDO REDUCER BUSHING W/ GLAND NUT & COLLAR	1" MPM	9/16" MPF	20K psi (1379 bar)
21-008-008	REDUCER BUSHING W/ GLAND NUT & COLLAR	1" MPM	3/4" MPF	20K psi (1379 bar)
21-008-009	REDUCER BUSHING W/ GLAND NUT & COLLAR	9/16" MPM	1" MPF	20K psi (1379 bar)

MP-MALE to NPT REDUCER BUSHINGS

Specifically designed for water blasting service, these high quality Reducer Bushings are made from heavy duty stainless steel because of its reliability and durability.

PART NO.	MP-MALE TO NPT REDUCER BUSHINGS	INLET	OUTLET	MAX PRESSURE
20-020-027	NLB TYPE ADAPTER	1-3/8" MPM (1-3/4"-12)	1" NPTM	12K psi (827 bar)
20-020-020	STAINLESS STEEL ADAPTER	1/4" MPM	1/8" NPTM	15K psi (1034 bar)
20-020-021	STAINLESS STEEL ADAPTER W/ GLAND NUT & COLLAR	3/4" MPF	1/2" NPTM	15K psi (1034 bar)
20-020-022	STAINLESS STEEL COUPLING W/ GLAND NUT & COLLAR	3/4" MPF	1/2" NPTF	15K psi (1034 bar)
20-020-023	TORPEDO ADAPTER W/ GLAND NUT & COLLAR	3/4" MPM	1/2" NPTM	15K psi (1034 bar)
20-020-024	TORPEDO ADAPTER W/ GLAND NUT & COLLAR	3/4" MPM	1/2" NPTF	15K psi (1034 bar)
20-020-025	TORPEDO ADAPTER W/ GLAND NUT & COLLAR	1" MP	1/2" NPTF	15K psi (1034 bar)
20-020-026	NLB TYPE ADAPTER	1-3/8" MPM (1-3/4"-12)	3/4" NPTM	15K psi (1034 bar)
20-020-028	STAINLESS STEEL COUPLING W/ GLAND NUT & COLLAR	3/4" MPF	1" NPTF	15K psi (1034 bar)

BSPP x NPT BUSHINGS

Stainless Steel Male x Female Bushings in BSPP x NPT.

PART NO.	BSPP X NPT BUSHINGS	INLET	OUTLET	MAX PRESSURE
20-026-043	SLIMLINE BUSHING	3/8" BSPPM	1/16" NPTF	15K psi (1034 bar)
20-026-044	SLIMLINE BUSHING	3/8" BSPPM	1/8" NPTF	15K psi (1034 bar)
20-026-045	SLIMLINE BUSHING	3/8" BSPPM	1/4" NPTF	15K psi (1034 bar)
20-026-053	STAINLESS STEEL HEX STYLE REDUCER BUSHING	3/8" BSPPM	1/16" NPTF	15K psi (1034 bar)
20-026-054	STAINLESS STEEL HEX STYLE REDUCER BUSHING	3/8" BSPPM	1/8" NPTF	15K psi (1034 bar)
20-026-055	STAINLESS STEEL HEX STYLE REDUCER BUSHING (FACE SEAL)	3/8" BSPPM	1/4" NPTF	15K psi (1034 bar)
20-026-068	REDUCER BUSHING	3/8" NPTM	1/4" BSPPF	15K psi (1034 bar)
21-007-075	STAINLESS STEEL BUSHING	1/4" NPTF	M24 x 1.5M DKO	15K psi (1034 bar)
21-007-156	STAINLESS STEEL REDUCER BUSHING W/O GLAND NUT & COLLAR	3/4" MPF	M36 x 2	20K psi (1379 bar)

SWAGE ADAPTERS

Our Stainless Steel Swage Adapters offer a male thread of a smaller diameter and a female thread of a larger diameter.

PART NO.	SWAGE ADAPTERS	INLET	OUTLET	MAX PRESSURE
20-009-005	SWAGE ADAPTER	1" NPTF	1/2" NPTM	12K psi (827 bar)
20-009-006	SWAGE ADAPTER	1" NPTF	3/4" NPTM	12K psi (827 bar)
20-001-009	STAINLESS STEEL SLIMLINE SWAGE ADAPTER	5/16"-24 UH RHF	1/4"-28 MMS	15K psi (1034 bar)
20-009-001	SLIMLINE SWAGE ADAPTER	1/8" NPTF	1/16" NPTM	15K psi (1034 bar)
20-009-002	STAINLESS STEEL SWAGE ADAPTER	1/2" NPTF	1/4" NPTM	15K psi (1034 bar)
20-009-003	STAINLESS STEEL SWAGE ADAPTER	1/2" NPTF	3/8" NPTM	15K psi (1034 bar)
20-009-004	SWAGE ADAPTER	3/4" NPTF	1/2" NPTM	15K psi (1034 bar)

METRIC / BSPP to NPT ADAPTERS

Advanced Pressure Systems offers NPT, Metric, and BSPP fittings for all your connect needs. If what you need is not listed, please call and ask.

PART NO.	METRIC / BSPP TO NPT ADAPTERS	INLET	OUTLET	MAX PRESSURE
20-026-003	ADAPTER W/ 60° ENTRY CONE	1/2" NPTM	1/2" BSPPM	15K psi (1034 bar)
20-026-007	STAINLESS STEEL ADAPTER W/ 24° (INCLUDED SEAT)	3/4" NPTM	M36 x 2M	15K psi (1034 bar)
20-026-009	STAINLESS STEEL ADAPTER	1/2" NPTM	M22 x 1.5M	15K psi (1034 bar)
20-026-010	ADAPTER W/ O-RING	1/2" BSPPF	1/2" BSPPF	15K psi (1034 bar)
20-026-011	ADAPTER W/ O-RING	1/2" BSPPF	M24 x 1.5M	15K psi (1034 bar)
20-026-001	ADAPTER W/ 24° (INCLUDED CONE)	1/2" NPTM	M24 x 1.5M	16K psi (1103 bar)
20-026-002	ADAPTER	1/2" NPTF	M24 x 1.5M	16K psi (1103 bar)
20-026-004	ADAPTER W/ 60° INLET	1/2" NPTF	1/2" BSPPM	16K psi (1103 bar)
20-026-006	STAINLESS STEEL ADAPTER	3/4" NPTM	M24 x 1.5 DKO (MN)	16K psi (1103 bar)
20-026-008	STAINLESS STEEL ADAPTER	M36 x 2M	M36 x 2M	23K psi (1586 bar)
20-026-031	ADAPTER (M24 X 1.5 THREADED LENGTH 0.866")	M24 x 1.5M DKO	M24 x 1.5M DKO	26K psi (1793 bar)

TYPE M x NPT (M) ADAPTERS

Stainless Steel Male x Male Adapters allow for connecting Type M and NPT female threaded components.

PART NO.	TYPE M X NPT (M) ADAPTERS	INLET	OUTLET	MAX PRESSURE
20-019-005	ADAPTER	1" NPTM	13MM (1"-12) TYPE M	12K psi (827 bar)
20-019-008	ADAPTER	1" NPTM	20MM (1-5/16"-12) TYPE M	12K psi (827 bar)
20-019-025	STAINLESS STEEL ADAPTER	1" NPTM	5MM (9/16"-18) TYPE M	12K psi (827 bar)
20-019-026	ADAPTER	1" NPTM	8MM (3/4"-16) TYPE M	12K psi (827 bar)
20-019-001	STAINLESS STEEL ADAPTER (GDWJ TYPE: 77211009)	1/2" NPTM	5MM (9/16"-18) TYPE M	15K psi (1034 bar)
20-019-002	STAINLESS STEEL ADAPTER	1/2" NPTM	8MM (3/4"-16) TYPE M	15K psi (1034 bar)
20-019-003	STAINLESS STEEL ADAPTER (HMM16-NM8) (GDWJ TYPE: 77211012)	1/2" NPTM	13MM (1"-12) TYPE M	15K psi (1034 bar)
20-019-004	STAINLESS STEEL ADAPTER	3/4" NPTM	13MM (1"-12) TYPE M	15K psi (1034 bar)
20-019-006	ADAPTER	1/2" NPTM	20MM (1-5/16"-12) TYPE M	15K psi (1034 bar)
20-019-007	ADAPTER	3/4" NPTM	20MM (1-5/16"-12) TYPE M	15K psi (1034 bar)
20-019-009	ADAPTER	1/4" NPTM	5MM (9/16"-18) TYPE M	15K psi (1034 bar)
20-019-010	ADAPTER	3/8" NPTM	5MM (9/16"-18) TYPE M	15K psi (1034 bar)
20-019-011	ADAPTER	3/8" NPTM	13MM (1"-12) TYPE M	15K psi (1034 bar)
20-019-015	STAINLESS STEEL ADAPTER	3/4" NPTM	8MM (3/4"-16) TYPE M	15K psi (1034 bar)
20-019-019	ADAPTER	3/4" NPTM	5MM (9/16"-18) TYPE M	15K psi (1034 bar)
20-019-020	ADAPTER	1/4" NPTM	8MM (3/4"-16) TYPE M	15K psi (1034 bar)
20-019-021	STAINLESS STEEL ADAPTER	3/8" NPTM	8MM (3/4"-16) TYPE M	15K psi (1034 bar)
20-019-027	STAINLESS STEEL ADAPTER	3/8" NPTM	20MM (1-5/16"-12) TYPE M	15K psi (1034 bar)

ADAPTERS MP (M) x NPT (M)

These Stainless Steel Male x Male Adapters allow for connecting Medium Pressure (MP) and NPT female threaded components.

PART NO.	ADAPTERS MP (M) X NPT (M)	INLET	OUTLET	MAX PRESSURE
20-020-004	ADAPTER	3/4" MPM	1" NPTM	12K psi (827 bar)
20-020-007	STAINLESS STEEL ADAPTER	1" MPM	1" NPTM	12K psi (827 bar)
20-020-010	TORPEDO ADAPTER W/ GLAND NUT & COLLAR	1" MPM	1" NPTM	12K psi (827 bar)
20-020-001	STAINLESS STEEL ADAPTER (GDWJ TYPE: 77211032)	9/16" MPM	1/2" NPTM	15K psi (1034 bar)
20-020-002	STAINLESS STEEL ADAPTER (GDWJ TYPE: 77211027)	3/4" MPM	1/2" NPTM	15K psi (1034 bar)
20-020-003	ADAPTER	3/4" MPM	3/4" NPTM	15K psi (1034 bar)
20-020-005	STAINLESS STEEL ADAPTER	1" MPM	1/2" NPTM	15K psi (1034 bar)
20-020-006	STAINLESS STEEL ADAPTER	1" MPM	3/4" NPTM	15K psi (1034 bar)
20-020-008	STAINLESS STEEL TORPEDO ADAPTER W/ GLAND NUT & COLLAR	1" MPM	1/2" NPTM	15K psi (1034 bar)
20-020-009	TORPEDO ADAPTER W/ GLAND NUT & COLLAR	1" MPM	3/4" NPTM	15K psi (1034 bar)

ADAPTERS METRIC (M) x NPT (M)

Stainless Steel Male x Male Adapters allow for connecting Metric and NPT female threaded components.

PART NO.	ADAPTERS METRIC (M) X NPT (M)	INLET	OUTLET	MAX PRESSURE
20-026-039	STAINLESS STEEL ADAPTER	1" NPTM	M36 X 2M	12K psi (827 bar)
20-026-019	ADAPTER	3/8" NPTF	M24 X 1.5M	15K psi (1034 bar)
20-026-020	ADAPTER	1/4" NPTF	M24 X 1.5M	15K psi (1034 bar)

ANTI-VIBRATION GLANDS

A less complex and more economical design than other vibration-resistant connections, the collet gland assembly utilizes the same coned-and-threaded features of the medium pressure connections. It extends the gland nut to provide room for the tapered slotted collet.

The design provides a slight difference in angles between the collet and the corresponding taper of the gland nut. As the nut is tightened, it acts to wedge the tapered end of the collet in to a gripping engagement with the tubing.

Material: Type 316 stainless steel.

PART NO.	ANTI-VIBRATION GLANDS	INLET	MAX PRESSURE
21-005-001	ANTI-VIBE COLLET ASSEMBLY W/ COLLAR	1/4" MP	20K psi (1379 bar)
21-005-002	ANTI-VIBE COLLET ASSEMBLY W/ COLLAR	3/8" MP	20K psi (1379 bar)
21-005-003	ANTI-VIBE COLLET ASSEMBLY W/ COLLAR	9/16" MP	20K psi (1379 bar)
21-005-004	ANTI-VIBE COLLET ASSEMBLY (SPLIT COLLAR, LH COLLAR , BODY & NUT)	3/4" MP	20K psi (1379 bar)

20-027-006	SLIMLINE COUPLING	9/16" MP RH	1/4" NPT	0.750"	15K psi (1034 bar)
20-027-007	SLIMLINE COUPLING	9/16" HP LH	1/16" NPT	0.750"	15K psi (1034 bar)
20-027-008	SLIMLINE COUPLING	9/16" HP LH	1/8" NPT	0.750"	15K psi (1034 bar)
20-027-009	SLIMLINE COUPLING	9/16" HP LH	1/4" NPT	0.750"	15K psi (1034 bar)
20-027-010	SLIMLINE COUPLING	9/16" HP RH	1/16" NPT	0.750"	15K psi (1034 bar)

SOCKET HEAD PLUGS & HEX HEAD PLUGS

Stainless Steel Socket Head Pipe Plugs are available in sizes from 1/16" NPT to 1/2" NPT for pressures up to 15K psi MAWP. A 3/4" size is also available for pressures up to 10K psi MAWP.

Manufactured specifically for water blasting service, Hex Head Plugs are made from stainless steel because of its reliability and durability.

PART NO.	SOCKET HEAD PLUGS & HEX HEAD PLUGS	INLET	MAX PRESSURE
15-075-000	STAINLESS STEEL SOCKET HEAD PIPE PLUG	3/4" NPT	10K psi (690 bar)
15-018-000	STAINLESS STEEL LINE MOLE JET SOCKET HEAD PIPE PLUG (GDWJ TYPE: 77118006)	1/4" NPT	15K psi (1034 bar)
15-037-000	STAINLESS STEEL SOCKET HEAD PIPE PLUG	3/8" NPT	15K psi (1034 bar)
15-050-000	STAINLESS STEEL SOCKET HEAD PIPE PLUG	1/2" NPT	15K psi (1034 bar)
15-118-000	STAINLESS STEEL LINE MOLE JET SOCKET HEAD PIPE PLUG	1/8" NPT	15K psi (1034 bar)
15-218-000	STAINLESS STEEL LINE MOLE JET PLUG	1/16" NPT	15K psi (1034 bar)
20-018-008	STAINLESS STEEL HEX HEAD PLUG	1-1/4" NPT	10K psi (690 bar)
20-018-007	STAINLESS STEEL HEX HEAD PLUG	1" NPT	12K psi (827 bar)
20-018-001	STAINLESS STEEL HEX HEAD PLUG	1/16" NPT	15K psi (1034 bar)
20-018-002	STAINLESS STEEL HEX HEAD PLUG	1/8" NPT	15K psi (1034 bar)
20-018-003	STAINLESS STEEL HEX HEAD PLUG	1/4" NPT	15K psi (1034 bar)
20-018-004	STAINLESS STEEL HEX HEAD PLUG	3/8" NPT	15K psi (1034 bar)
20-018-005	STAINLESS STEEL HEX HEAD PLUG	1/2" NPT	15K psi (1034 bar)
20-018-006	STAINLESS STEEL HEX HEAD PLUG	3/4" NPT	15K psi (1034 bar)

PLUGS

These plugs should be paired with their matching sized gland nut located on page 71.

PART NO.	PLUGS	INLET	MAX PRESSURE
21-004-001	MEDIUM PRESSURE PLUG	1/4" MP	20K psi (1379 bar)
21-004-002	MEDIUM PRESSURE PLUG	3/8" MP	20K psi (1379 bar)
21-004-003	MEDIUM PRESSURE PLUG	9/16" MP	20K psi (1379 bar)
21-004-004	MEDIUM PRESSURE PLUG	3/4" MP	20K psi (1379 bar)
21-004-005	MEDIUM PRESSURE PLUG	1" MP	20K psi (1379 bar)

HEAVY DUTY COUPLINGS

Stainless Steel Heavy Duty Couplings are used for connecting a wide range of hoses. These are robust fittings are capable of withstanding the most demanding working conditions.

PART NO.	HEAVY DUTY COUPLINGS	INLET	OUTLET	MAX PRESSURE
20-005-018	HEAVY DUTY COUPLING	1-1/4" NPTF	1-1/4" NPTF	10K psi (690 bar)

SLIMLINE COUPLINGS

Slimline Couplings are available up to 40K psi. Check the different O.D.'s for your tube cleaning application.

20-026-071	STAINLESS STEEL COUPLING	3/8" NPTF	3/8" BSPPF	15K psi (1034 bar)
20-026-069	STAINLESS STEEL COUPLING	1/4" BSPPF	1/4" HPF	25K psi (1724 bar)

SCREW TYPE QUICK DISCONNECT COUPLINGS

Screw Type Quick Disconnect Hose Couplings are made from heat-treated stainless steel for high durability. Sizes available to suit most hoses, and all feature easy-grip texturing for ease of use.

PART NO.	SCREW TYPE QUICK DISCONNECT COUPLINGS	INLET	MAX PRESSURE
20-003-004	FEMALE SCREW TYPE COUPLING HALF ASSEMBLY	1" NPT	10K psi (690 bar)
20-003-003	FEMALE SCREW TYPE COUPLING HALF ASSEMBLY	3/4" NPT	12K psi (827 bar)
20-003-016	SCREW TYPE COUPLING ASSEMBLY	1" NPT	12K psi (827 bar)

WAFER ELBOWS

Wafer Elbows are made from stainless steel and are heat treated. They are available in a variety of configurations including Crosses, Tees and Wyes (next page).

PART NO.	45° & 90° WAFER ELBOWS	INLET	MAX PRESSURE
20-004-018	45° WAFER ELBOW	1" NPT	12K psi (827 bar)
20-004-013	45° WAFER ELBOW	1/8" NPT	15K psi (1034 bar)
20-004-014	45° WAFER ELBOW	1/4" NPT	15K psi (1034 bar)
20-004-015	45° WAFER ELBOW	3/8" NPT	15K psi (1034 bar)
20-004-016	45° WAFER ELBOW	1/2" NPT	15K psi (1034 bar)
20-004-017	45° WAFER ELBOW	3/4" NPT	15K psi (1034 bar)
20-004-012	90° WAFER ELBOW	1" NPT	12K psi (827 bar)
20-004-007	90° WAFER ELBOW	1/8" NPT	15K psi (1034 bar)
20-004-008	90° WAFER ELBOW	1/4" NPT	15K psi (1034 bar)
20-004-009	90° WAFER ELBOW	3/8" NPT	15K psi (1034 bar)
20-004-010	90° WAFER ELBOW	1/2" NPT	15K psi (1034 bar)
20-004-011	90° WAFER ELBOW	3/4" NPT	15K psi (1034 bar)

WAFER CROSSES, TEES & WYES

These rugged Wafer Type Fittings are made from stainless steel and are heat treated.

PART NO.	WAFER CROSSES, TEES & WYES	INLET	OUTLET	MAX PRESSURE
20-004-024	WAFER CROSS	1" NPT	--	12K psi (827 bar)
20-004-019	WAFER CROSS	1/8" NPT	--	15K psi (1034 bar)
20-004-020	WAFER CROSS	1/4" NPT	--	15K psi (1034 bar)
20-004-021	WAFER CROSS	3/8" NPT	--	15K psi (1034 bar)
20-004-022	WAFER CROSS	1/2" NPT	--	15K psi (1034 bar)
20-004-023	WAFER CROSS	3/4" NPT	--	15K psi (1034 bar)

HEX NIPPLES

In both straight and reducing varieties specifically for water blasting service, these Hex Nipples are made from heavy duty stainless steel because of its reliability and durability.

WINGED TYPE HAMMER UNIONS

Advanced Pressure Systems offers Winged Type Hammer Unions with large screw threads and a hub that can be “knocked off” with a hammer for quick disconnection of hoses. Connections are available to suit most hoses. NPT connections feature heavy duty O-Rings.

PART NO.	WINGED TYPE HAMMER UNIONS	INLET	MAX PRESSURE
20-050-001	ARMSTRONG-WEATHERLY WING TYPE HAMMER UNION	1/2" NPT	10K psi (690 bar)

DUAL LANCE MANIFOLDS

Compact Stainless Steel Dual Lance Manifolds allow the user to run two rigid lances from a single control valve correctly.

When ordering, please specify inlet and outlet sizes.

PART NO.	DUAL LANCE MANIFOLDS	INLET	OUTLET	MAX PRESSURE
20-025-001	DUAL LANCE MANIFOLD	1/2" NPTF	2-1/16" NPTF	15K psi (1034 bar)
20-025-002	DUAL LANCE MANIFOLD	1/2" NPTF	2-1/8" NPTF	15K psi (1034 bar)
20-025-003	DUAL LANCE MANIFOLD	1/2" NPTF	2-1/4" NPTF	15K psi (1034 bar)
20-025-004	DUAL LANCE MANIFOLD	1/2" NPTF	2-1/2" NPTF	15K psi (1034 bar)

RIGID LANCE HOLDERS

The threaded end of a rigid lance where it connects directly to a manifold is its weakest point. A break at this threaded connection renders an otherwise good lance unstable.

Our Rigid Lance Holders provide full support to the lance at a point well in front of the thread. The lance holder is designed to be the best available on the market. It uses a collet and lock nut of the same design as used for a machine shop lathe, which provides a vise-like grip on the lance, completely relieving stress on the thread.

Installation or removal of the lance is very easily accomplished. Simply slide the End Cap, Collet and Lance Holder Support Tube on to the lance in that order and screw the lance in to the Lance Holder Body. The Lance Holder Tube is then screwed in to the Body, and the Collet is secured in to the Lance Holder Tube by the End Cap. The lance will then be fully supported.

PART NO.	RIGID LANCE HOLDERS	INLET	OUTLET	MAX PRESSURE
20-002-001	RIGID LANCE HOLDER ASSEMBLY	1/2" NPTM	1/16" NPTF	15K psi (1034 bar)

FLEX LANCE SAFETY GRIPS

The Flex Lance Safety Grip is designed to minimize the risk of injury to flex lance operators caused by a live nozzle exiting the tube unexpectedly. The comfortably contoured handle makes it easy to hold the safety grip against the tube sheet, allowing retraction of an active nozzle in to a stainless steel sleeve, where the force of the jets is dissipated.

PART NO.	FLEX LANCE SAFETY GRIPS

40K psi ARTICULATED FLEX LANCE SAFETY STOP

Assembly No. 36-015-089

The Articulated Flex Lance Safety Stop takes the Hand-Held Flex Lance Safety Grip to the next level. This versatile lance stop/anti-withdrawal device attaches easily to the tube sheet for safer pipe cleaning operations. It features adaptability to vertical or horizontal applications, and its wide range of expansion accommodates any size of tube sheet. Construction is galvanized steel with aluminum handles and includes a Lexan® splash guard.

The stops for six sizes of lances are provided by a quick-change insert, which is built in to the design, eliminating the problem of lost lance stops and makes changing to a different diameter quick and easy.

40K psi ARTICULATED FLEX LANCE SAFETY STOP

40K psi VARIABLE LANCE STOP ASSEMBLY

Assembly No. 36-015-082-3

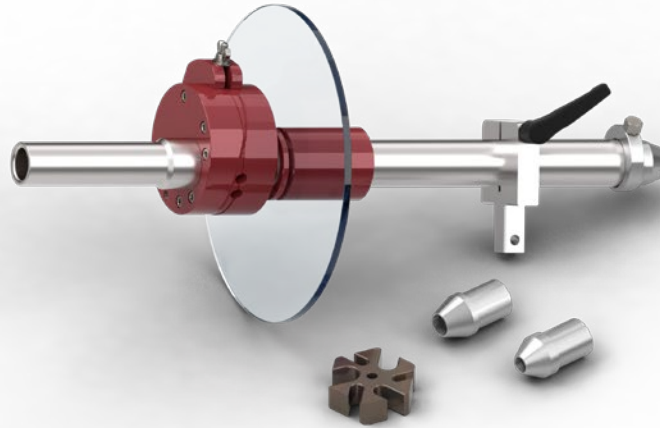

The Variable Lance Stop Assembly attaches to the end of the arm of the Flex Lance Safety Device, commonly referred to as a Chicken Wing. It provides slotted inserts that can prevent the withdrawal of a flex lance from a tube sheet while under pressure. Two inserts are included in the assembly to cover six diameters for both Parker and Spir Star lances.

15K psi AIR DIVERTER VALVE w/o BASE PLATE

Assembly No. 61-001-006

An Air Operated Dump Valve allows an operator to remotely control pressure in cleaning applications from 15K psi. When air is sent to the cylinder, the valve closes and allows the system to build pressure. The valve opens when the air is exhausted, reducing system pressure to near atmospheric.

PART NO.	BILL OF MATERIALS (Assembly No. 61-001-006)	QUANTITY

A High Volume Air Operated Dump Valve allows an operator to remotely control pressure in cleaning applications from 15K psi. When air is sent to the cylinder, the valve closes and allows the system to build pressure. The valve opens when the air is exhausted, reducing system pressure to near atmospheric.

Features:

- 30-second field replaceable cartridge design for minimal downtime
- Remote pneumatic operation for reduced operator fatigue and added convenience and safety
- Heavy duty air cylinder
- All components precision machined from stainless steel

15K psi HIGH VOLUME AIR DIVERTER VALVE

Assembly No. 61-050-014

A High Volume Air Operated Dump Valve allows an operator to remotely control pressure in cleaning applications from 15K psi. When air is sent to the cylinder, the valve closes and allows the system to build pressure. The valve opens when the air is exhausted, reducing system pressure to near atmospheric.

PART NO.	BILL OF MATERIALS (Assembly No. 61-050-014)	QUANTITY

15K psi DRY SHUT-OFF AIR DIVERTER VALVE

Assembly No. 61-010-306

Air Operated Diverter Valves provide much improved operator safety by allowing control of flow and pressure to be carried out remotely. When air is sent to the cylinder, the valve closes and allows the system to build pressure. The valve opens when the air is exhausted, reducing system pressure to near atmospheric.

15K psi FOOT OPERATED DUMP GUN

Assembly No. 61-010-012

Foot Operated Control Valves (Foot Guns) are designed for smooth, reliable operation. They are easily rebuilt in the field in 30 seconds by unscrewing the dump tube, which removes the used valve assembly. The operator then snaps a new cartridge style valve in to the dump tube adapter and returns the whole assembly to the gun.

To prevent low pressure water from the flex lance nozzle spraying back towards the operator, it is recommended that a Nozzle Shut-Off Valve (*Part No. 60-101-050*) is used between the foot gun and the flex lance. This will help minimize cleanup and greatly assist the operator when inserting the lance in to the next tube. Strain Relief Whip Hoses (*Part No. 43-004-003*) are designed to relieve the forces on the flex lance end fitting, which extends the life of the lance and reduces the risk to the operator associated with the end fitting falling prematurely.

15K psi HAND-HELD DUMP GUN w/ 3/8" NPT BARREL

Assembly No. 60-010-052

Features:

- The cartridge valve enables the gun to be rebuilt in the field in 30 seconds or less, thus minimizing downtime and increasing productivity
- The cartridge valve also keeps the trigger force to a minimum, reducing operator stress
- These guns are lighter in weight (13-15 lbs depending on the barrel diameter), resulting in less operator fatigue
- The adjustable comfort-contoured shoulder stocks front hand grips contribute to ease of use for operators, tending to diminish fatigue
- These guns come standard with 48" front barrels for operator safety
- All working components are stainless steel for corrosion resistance and durability

15K HAND/FOOT GUN CARTRIDGE ASSEMBLY (J/S TYPE: 50902)

15K psi HAND-HELD DUMP GUN w/ 1/2" NPT BARREL

Assembly No. 60-010-051

Features:

- The cartridge valve enables the gun to be rebuilt in the field in 30 seconds or less, thus minimizing downtime and increasing productivity
- The cartridge valve also keeps the trigger force to a minimum, reducing operator stress
- These guns are lighter in weight (13-15 lbs depending on the barrel diameter), resulting in less operator fatigue
- The adjustable comfort-contoured shoulder stocks front hand grips contribute to ease of use for operators, tending to diminish fatigue
- These guns come standard with 48" front barrels for operator safety
- All working components are stainless steel for corrosion resistance and durability

15K psi HAND-HELD DOUBLE DUMP GUN

Assembly No. 60-050-006

There is an increasing demand for the extra safety of control guns - which incorporate dual dump ports. Our Double Dump Control Guns feature ergonomic advantages and a specially designed front handle. The handle itself is at a 90° angle to the barrel, conforming to the operator's hand and arm. Some other guns simply use two standard handles, which are cumbersome, uncomfortable, too heavy, and difficult to use.

Double Dump Guns are available in 3/8" barrel size.

15K psi HAND-HELD ZERO THRUST GUN

Assembly No. 60-010-035

Zero Thrust Style Control Guns are designed primarily for underwater use, where the self-canceling forwards and backwards thrusts allow the operator to carry out blasting operations without being propelled away from the intended work area.

Zero Thrust Style Control Guns also have application on dry land, where a balanced tool is needed, such as in a suspended gondola on the side of a building.

TYPES 3615HF & 4215HF FLUID ENDS SPECS

APS Fluid Ends are the latest in our comprehensive line of water blasting equipment solutions and is the new gold standard in precision machined pump parts. Superior quality, combined with the experience and know-how at APS, enables us to provide cost-effective products that outperform other industry manufacturers. Models available up to 20K psi (1379 bar). The APS Fluid Ends are available as replacements for outdated models or as an upgrade to lower pressure rated systems.

Features:

- Quick change valve assemblies make field replacement simple
 - Valves and plungers are cartridge format for easy servicing
 - Special tools and equipment are not required
 - High volumetric efficiency
 - Simple design requires fewer spare parts
- APS manufacturing assures superior quality

TYPES 3620 & 4220 FLUID ENDS SPECS

APS Fluid Ends are the latest in our comprehensive line of water blasting equipment solutions and is the new gold standard in precision machined pump parts. Superior quality, combined with the experience and know-how at APS, enables us to provide cost-effective products that outperform other industry manufacturers. Models available up to 20K psi (1379 bar). The APS Fluid Ends are available as replacements for outdated models or as an upgrade to lower pressure rated systems.

Features:

- Quick change valve assemblies make field replacement simple
 - Valves and plungers are cartridge format for easy servicing
 - Special tools and equipment are not required
 - High volumetric efficiency
 - Simple design requires fewer spare parts
- APS manufacturing assures superior quality

SNUBBERS

Snubbers absorb the system pressure pulses that can cause gauge fluctuations. Our Ray Snubber enhances accuracy and extends the service life of the gauge.

PART NO.	SNUBBERS	INLET	OUTLET	MAX PRESSURE
35-002-001	316 STAINLESS STEEL RAY SNUBBER	1/2" NPTM	1/2" NPTF	15K psi (1034 bar)

15K psi PRESSURE REGULATING VALVE

Assembly No. 65-110-015

A Pressure Regulating Valve (PRV), also called a By-Pass Valve, is used on both diesel and electric pumping units to divert a portion of the flow to a low pressure outlet. It is really a hand-adjusted needle valve and can be used to control pressure when the application requires a flow at the low end of the pumping unit operating range. For electric units a PRV is required because the speed of the drive is not adjustable.

40K psi PRESSURE REGULATING VALVE

Assembly No. 65-040-010

A Pressure Regulating Valve (PRV) is used on both diesel and electric pumping units to divert a portion of the flow to a low pressure outlet. It is a hand-adjusted needle valve and can be used to control pressure when the application requires flow at the low end of the pumping unit operating range. For electric units a PRV is required because the speed of the drive is not adjustable.

15K psi FLOW DIVIDER VALVE

Assembly No. 70-022-001

The Flow Divider Valve (FDV) is for applications where two dump style guns are to be operated from one pump. The FDV will maintain full pressure to either gun when the other gun is dumping. When both guns are operating, the flow and pressure will be unaffected. These valves are made with rugged construction and are easy to set up. The only wear part is a cartridge, which can be quickly changed in the field.

40K psi TRI-MODE TUMBLEBOX w/ DUAL AIR CONTROL HOSE ASSEMBLY

Assembly No. 60-070-076

The 40K Tri-Mode Valve, commonly called a Tumblebox, has been developed after extensive research aimed at identifying the features that contractors and end users need most. The air side incorporates a robust, easy-to-operate shut-off valve, and a large, easy-to-read, horizontally mounted gauge that is protected by a heavy rubber buffer. The shuttle valve is a simple cartridge type design, which is easy to service and replace.

LUBRICANTS

Our wide selection of lubricants makes assembling leak-tight connections even easier. Rated for use with stainless steel, titanium, aluminum, nickel-based and high-temperature alloys.

Brands:

- Blue Goop™
- Loctite®
- Jet-Lube Marine Moly™
- Yellow Lube® Waterjet Thread Protection

PART NO.	LUBRICANTS
24-001-001	BLUE GOOP, THREAD LUBRICANT 2 OZ. TUBE (GP 043)
24-001-002	NICKEL BASED ANTI-SEIZE, LOCTITE-1 LB. BRUSH CAN
24-001-003	THREAD SEALANT, LOCTITE-567 250 ML TUBE FOR SS FITTINGS
24-001-009	ANTI-SEIZE, JET-LUBE MOLYBDENUM DISULFIDE BASED (8 OZ. BRUSH CAN)
24-001-010	ANTI-SEIZE, JET-LUBE MOLYBDENUM DISULFIDE BASED (1 LB. BRUSH CAN)
24-001-011	YELLOW LUBE, THREAD LUBRICANT 6 OZ. TUBE (USE 24-001-027)

GREASE

Brands:

- **Clover Compound:** Specially formulated for lapping engine valves for optimum performance
 - **Premalube:** Multi-purpose, heavy load, extreme pressure, high temperature grease in an aluminum complex base with Moly and graphite

PART NO.	GREASE
24-001-013	COMPOUND, CLOVER 600 GRIT VERY FINE LAPPING & POLISHING SILICON CARBIDE GREASE 16 OZ.
24-001-014	COMPOUND, CLOVER 600 GRIT VERY FINE LAPPING & POLISHING SILICON CARBIDE GEL 1 LB.
24-001-015	GREASE, PREMALUBE 4099 (TUBE)

OILS

Use to lubricate bearings, cables, chains, nuts, bolts, rollers, hinges, sockets, pulleys and sliding surfaces.

Brands:

- **Anti-Seize Technology:** A blend of oils that clean, lubricate and recondition air operated power tools, air pumps, pneumatic devices and pneumatic systems
- **Tap Magic:** An ozone-friendly formula that provides outstanding performance on all cuts and all metals - even hard metals such as stainless steel.

PART NO.	OILS
24-001-020	OIL, AIR TOOL (16 OZ.)
24-001-021	TAP MAGIC, 4 OZ. SPOUT-TOP CAN

PRECISION MEASURING TOOLS

Used to determine small hole sizes / gage slots / find hole distances.

PART NO.	PRECISION MEASURING TOOLS
15-099-000	PIN GAGE SET, 0.011" - 0.060" (MINUS 0.0002") VERMONT
15-099-001	PIN GAGE SET, 0.0115" - 0.0605" (MINUS 0.0002") VERMONT
15-099-002	PIN VISE, W/ COLLET (0.000" - 0.055") RANGE
15-099-003	PIN VISE, W/ COLLET (0.025" - 0.075") RANGE

TOOL CLEANERS

Tip cleaners and micro pick set.

Brands:

- **Wypro:** Primarily designed for the cleaning of welding and cutting tips, they also can be used to clean sprinkler and shower heads, gas range burners and desoldering tools, and to allow for precision hole deburring
- **Griot's Garage:** Ideal for positioning, adjusting and retrieving small parts, separating wires, removing small fuses and O-rings, as well as cleaning out gummed-up grooves, channels or conduits

PART NO.	TOOL CLEANERS
15-099-125	TIP CLEANER, WYPO STANDARD (SIZES #6 - #26) (SIZES 0.018" - 0.102")
15-099-126	MICRO PICK SET, 5 PIECES W/ POUCH

MACHINE THREADING DIES

Used to create or rethread external threads.

PART NO.	MACHINE THREADING DIES

CONING & THREADING TOOL KITS

MaxPro Technologies offers a complete line of coning and threading tool kits for manually coning and threading 1/4" O.D. to 9/16" O.D. tubing.

There are three different tool kit versions: the "Medium" Pressure, "High" Pressure, and the "Complete Kit" that contains both the Medium and the High Pressure tools. All items are conveniently packaged in a sturdy hand carry tool case with removable top tray. The unique coning and threading tool designs allows for interchange ability between components, eliminating multiple tool inventories.

15K psi RUPTURE DISC HOLDER w/ SAFETY SHROUD

Assembly No. 35-008-025

A rupture disc is an essential component in any system that contains a positive displacement pump. It provides protection against excessive pressure building up in the water blasting equipment connected to a pump. Our rugged, compact rupture disc holder offers safety features to prevent the use of coins or other disc substitutes, which may prove dangerous to operators or cause damage to the blasting equipment. The domed deflector minimizes spray in the event of a disc rupturing, and it is simple to replace a disc.

40K psi ARTICULATED FLEX LANCE SAFETY STOP

Assembly No. 36-015-089

The Articulated Flex Lance Safety Stop takes the Hand-Held Flex Lance Safety Grip to the next level. This versatile lance stop/anti-withdrawal device attaches easily to the tube sheet for safer pipe cleaning operations. It features adaptability to vertical or horizontal applications, and its wide range of expansion accommodates any size of tube sheet. Construction is galvanized steel with aluminum handles and includes a Lexan® splash guard.

The stops for six sizes of lances are provided by a quick-change insert, which is built in to the design, eliminating the problem of lost lance stops and makes changing to a different diameter quick and easy.

40K psi VARIABLE LANCE STOP ASSEMBLY

Assembly No. 36-015-082-3

The Variable Lance Stop Assembly attaches to the end of the arm of the Flex Lance Safety Device, commonly referred to as a Chicken Wing. It provides slotted inserts that can prevent the withdrawal of a flex lance from a tube sheet while under pressure. Two inserts are included in the assembly to cover six diameters for both Parker and Spir Star lances.

EUROPEAN & SCREW TYPE SAFETY SHROUDS

Safe operation of hand-held control guns requires the use of a safety shroud to guard the operator from failure of the hose fitting at the point where it is connected to the gun. Both of these shrouds have a nitrite outer cover, which resists oil, water, and many solvents, and an inner layer of braided stainless steel. Safety shrouds are essential equipment and should be used in conjunction with a whip hose, which allows for connection to different high pressure sources without the need to make frequent connections to the gun.

The European Type Shroud, which will fit virtually any gun, is held in place by an adjustable strap. It is lightweight, has universal application, and it is a popular alternative to the standard screw type shroud.

The Screw Type Shroud is held in place by a shroud adapter. This style is customized to specific guns and is very reliable and durable.

PART NO.	EUROPEAN TYPE SAFETY SHROUDS
44-021-050	15-40K EURO STYLE SAFETY SHROUD X 3' W/ MOUNTING STRAP (SHROUD ONLY)

HOSE WHIP RESTRAINTS

We strongly recommend the use of a whip check hose restrainer in any water jetting operation. These are perhaps the simplest and least expensive safety measure to implement. A whip check can be attached at any point where two hoses are joined, to a pump’s fluid end at the discharge side, or where a hose attaches to any piece of water jetting equipment, such as a water blasting lancing or cutting system.

When a high pressure hose is joined to a piece of equipment, the whip check should be used to restrain the movement of the pressurized hose, should it become uncoupled, thereby allowing operators to get away and perform a safe, orderly system shut-down.

TURTLESKIN® COVERALL™ COMPLETE SUIT

The WaterArmor CoverAll is a two-piece suit with full protection for hydroblasting over the entire front of the suit. It is tested with straight single nozzles, which are far more dangerous than dual nozzle rotating units. We also test with 20,000psi (1400 bar) high flow hydrodemolition nozzle to ensure your safety. The WaterArmor CoverAll product consists of three parts: the Bunker Pants, the Jacket and Neck Guard. The whole system is built around the same high performance WaterArmor protection - now within a rain-suit format, so it is really fast to gear-on and gear-off on the job.

TURTLESKIN® COVERALL™ COMPLETE JACKET

The jacket has a center opening zipper and has protection for left and right side of the torso. With the bib panel in the bunker pants, this system provides full hydroblasting protection across the critical chest area, including the vulnerable zipper area.

The WaterArmor CoverAll Jacket has 2 armor panels on each side of the zipper. In addition the Coverall has Arm and Neck protection that integrates smoothly with the Jacket garment.

PART NO.	COVERALL™ COMPLETE SUIT

TURTLESKIN® COVERALL™ JACKET

The jacket has a center opening zipper and has protection for left and right side of the torso. With the bib panel in the bunker pants, this system provides full hydroblasting protection across the critical chest area, including the vulnerable zipper area. The jacket has options for integrated arm protection and is setup to carry an optional neck protector. Like the pants, all of the armor panels are removable for service and cleaning of the jacket.

The WaterArmor CoverAll Jacket has 2 armor panels on each side of the zipper. In addition the Coverall has optional Arm and Neck protection that integrates smoothly with the Jacket garment.

PART NO.	COVERALL™ JACKET
55-002-003-SM	WAC0-J000, SMALL COVERALL JACKET (NO NECK OR ARMS)
55-002-003-MED	WAC0-J000, MEDIUM COVERALL JACKET (NO NECK OR ARMS)
55-002-003-LRG	WAC0-J000, LARGE COVERALL JACKET (NO NECK OR ARMS)

55-002-003-XXL	WAC0-J000, XX LARGE COVERALL JACKET (NO NECK OR ARMS)

TURTLESKIN® COVERALL™ BUNKER PANTS

The pants are bunker style with suspenders. The pants carry protection for the legs, groin and center chest. There are knee pockets for integral knee pads. The armor panels are all removable for cleaning and service of the pants.

The CoverAll bunker pants carry the armor elements for the legs the center chest and the groin. The sequence of snaps allows the user to move the chest armor and groin armor up and down. This lets the user adjust the bunker pants for maximum protection and all day comfort.

* Does NOT include gaiters shown in picture.

PART NO.	COVERALL™ BUNKER PANTS
55-002-004-SM	WAC0-P000, SMALL COVERALL PANTS

55-002-004-XXL	WAC0-P000, XX LARGE COVERALL PANTS

TURTLESKIN® COVERALL™ ARM INSERTS

The armor panels are carried inside the nylon shell and are easily removed for cleaning and maintenance. Suit cleaning and repair can be done by your local repair service, or you can send it back to us at the factory. This feature keeps your CoverAll suit in top working condition.

PART NO.	COVERALL™ ARM INSERTS
xx-xxx-xxx	INSERT HERE

TURTLESKIN® COVERALL™ NECK ATTACHMENT

The new CoverAll Neck protection mounts to the shoulders of the jacket and is designed to protect operators from hose or fitting failures when running the supply hose over their shoulder. Remember, no PPE system can make up for poor equipment maintenance. Keep your hoses and lance connections in good working order, and replace worn or damaged parts.

PART NO.	COVERALL™ NECK ATTACHMENT
55-002-005	WAC0-N000, COVERALL NECK ATTACHMENT (ONE SIZE ONLY)

TURTLESKIN® MFA WATERARMOR™ SUIT

WaterArmor MFA is higher protection than all our other waterblast and hydrodemolition PPE. Because it uses a stainless steel mosaic system it weighs a little more than our other products. However, you are getting serious levels of protection for this increase in mass.

PART NO.	MFA WATERARMOR™ SUIT
55-001-003	TWA-40K, FULL BODY WATERJET SUIT, SINGLE TORSO PANEL & CHAPS, TURTLESKIN
55-001-015	FULL BODY WATERSUIT ASSEMBLY (INCLUDES 1 PC SINGLE TORSO PANEL & CHAPS / 1 PC GAUNTLET - PAIR / 1 PC GAITERS - PAIR)

TURTLESKIN® MFA WATERARMOR™ TORSO ONLY

WaterArmor MFA is higher protection than all our other waterblast and hydrodemolition PPE. Because it uses a stainless steel mosaic system it weighs a little more than our other products. However, you are getting serious levels of protection for this increase in mass.

PART NO.	MFA WATERARMOR™ TORSO ONLY
55-001-004	TWA-TORSO, TORSO ONLY, TURTLESKIN

TURTLESKIN® MFA WATERARMOR™ CHAPS

TurtleSkin MFA WaterArmor is engineered from a new lightweight composite with a higher level of resistance from exposure to UHP water jet swipes.

Waterjetting contractors rely on TurtleSkin WaterArmor to ensure a safe work environment, protect operators from accidental swipes at extreme high pressure, and reduce insurance rates.

With more than 75 documented saves, TurtleSkin WaterArmor is proven safe for the prevention of injury.

PART NO.	MFA WATERARMOR™ CHAPS
55-001-005	TWA-CHAPS, TURTLESKIN

TURTLESKIN® MFA WATERARMOR™ GAITERS

The gaiter is a flexible multi-component assembly made to conform to your boots and fit snugly and tightly to your favorite rubber boots. The MFA gaiter panels are built so that they provide full flexibility for walking, climbing, and kneeling. What makes the WaterArmor Gator design special is the triangular stainless steel mosaic. MFA stands up to longer hits with higher pressures and higher flows.

The classic WaterArmor Gaiter design has stood the test of time and has proven to be easy to use, easy to mount and it standing up to years of water blasting service.

PART NO.	MFA WATERARMOR™ GAITERS

97-5120068-M/2XL	TST 20/30 WAISTCOAT-M/2XL

TST-SWEDEN® WAISTCOATS W/ APRON

A thoughtful combination between Waistcoat and Apron, giving superior freedom of movement and comfort, but still offering effective protection for the whole front of the body. The construction with a Waistcoat on top helps spreading the weight of the protective garment. Hand Protections and Gaiters or Boots 3000 are suitable complements for extended protection.

The height of the Apron can be adjusted, and the size of the Waistcoat can be adjusted with hook & loops - this means that it can be used by different operators or for different purposes.

PART NO.	WAISTCOATS W/ APRON
97-5123547	TST 10/28 WAISTCOAT WITH APRON (ONE SIZE)
97-5123568	TST 20/30 WAISTCOAT WITH APRON (ONE SIZE)

TST-SWEDEN® APRONS

The full area of the Apron has built-in protection. The position of the Apron can be changed through the adjustable shoulderband. The special construction of this band helps the spreading of the weight of the Apron which is an import comfort detail.

The Apron can be upfolded and fastened for easier work in stairs and on ladders. The Apron is very easy to put on and off. Recommended for work on flat surfaces and is often used in combination with the Hand Protections and Gaiters or Boots 3000.

PART NO.	APRONS
97-5123047	TST 10/28 APRON (ONE SIZE)
97-5123068	TST 20/30 APRON (ONE SIZE)

TST-SWEDEN® TROUSERS

The Trousers are fitted with a full front protection up to the waist. The zips on the outside of the legs are protected by a sealing flap and a hook & loops flap. Wide adjustable braces in stretch material. Elastic part in the rear waist and a belt which helps to distribute weight and improves the comfort. Trousers are very popular among workers who move a lot, climb and crawl.

For work in warm environments, Trousers can be ordered with ventilation, which distributes fresh air in the legs and up the front. Needs to hook up to an air compressor.

PART NO.	TROUSERS
97-5132047-L-XL	TST 10/28 TROUSERS
97-5132068-L-XL	TST 20/30 TROUSERS

TST-SWEDEN® GAITERS

The Gaiters are to be worn outside of the user's regular protective boots. The entire are around the leg and the foot is protected. Three clips and hook and loops in the rear, and an easily adjustable strap under the sole, ensures that the Gaiters stay in place. Very comfortable and light to wear. Only in 20/30 protection level. Sold in pairs.

PART NO.	GAITERS
97-5158068	TST 20/30 GAITERS

TST-SWEDEN® 30/30 BOOTS 3000

Boots 3000 withstands "everything" within waterjetting on account of its fixed aluminum gaiters. The gaiters are molded and jointed, which gives both excellent comfort and mobility. Not suitable on uneven ground and is sensitive to small stones. (For that we recommend the Gaiter.)

The Boots conform to the requirement set out in BGR 191.

PART NO.	30/30 BOOTS 3000
97-5052080-10	TST 30/30 BOOT 3000 (SIZE 10)
97-5052080-11	TST 30/30 BOOT 3000 (SIZE 11)
97-5052080-12	TST 30/30 BOOT 3000 (SIZE 12)

TST-SWEDEN® BALACLAVA

The Balaclava, which is made of neoprene, is designed to keep the body dry. The breast lap is made of Cordura fitted with adjustable straps to hold it in place.

The Balaclava offers no protection against water jets.

PART NO.	BALACLAVA
97-5010000	TST BALACLAVA (ONE SIZE)

TST-SWEDEN® HEAD PROTECTION HELMET W/ VISOR & HEARING PROTECTORS

All Helmet with Visor and Hearing Protectors parts are tested and certified for protection against liquids with pressure up to 3000 bar / 43,500 psi. Helmet also meets the requirements for Industrial safety helmets.

The interior is comfortable and can be adjusted to a very good fit. The Visor meets the requirements for Eye protection, and it is replaceable and can be set in either the folded or up position.

Hearing Protectors are classified. They can be adjusted vertically and set in different positions against the head for optimal protection and fit. A three-point chin strap is provided in the Head Protection Kit.

PART NO.	HEAD PROTECTION HELMET
97-51K0216890	TST 20/30, 3000 BAR / 43,500 PSI HEAD PROTECTION HELMET WITH VISOR AND HEARING PROTECTORS

TST-SWEDEN® HOSE PROTECTION

To further improve the safety of the operator, it is recommended to use a Hose Protection / Shroud. The Hose Protection is placed on the hose at the connection to the lance, closest to the lance, where the hose is likely to break. There is 250mm / 9.8" solid steel collar.

This provides effective protection for the operator as it has been tested for 3000 bar / 43,500 psi. An adjustable strap holds the Hose Protection / Shroud to the lance. The Hose Protection / Shroud is smooth and flexible.

PART NO.	HOSE PROTECTION

METATARSAL BOOTS

Features:

- Specialized compound prevents ozone deterioration for longer life of your footwear
- SAFE-STEP puncture resistant steel midsoles for maximum puncture protection
- Heavy Trac Tread™ sole and heel and knurled protective overlays are tough and durable providing longer life to your footwear to help reduce purchasing spend
- Ultra composite shank is longer, wider and positioned for optimal support to help prevent foot pain when standing all day
- SAFE-TOE steel toe protects worker from crush and impact hazards
- Removable Foot Form contour cushion insoles provide support and wick away moisture to keep workers feet dry

FACE SHIELDS

Lightweight economical visor provides superior protection, without the big price tag.

- Easy-to-attach impact-resistant visor provides full face protection
- Complies with ANSI Z87.1 standards when used with headgear item# 20124, or hard hat visor carrier item# 24245, both sold separately
- 0.040 clear polycarbonate construction
- 8" x 15"
- Please Note: Visors must be worn with the appropriate visor headgear or hard hat visor carrier, and ANSI approved eyewear for complete OSHA compliance

PART NO.	FACE SHIELDS
97-001-131	BRACKET, FACE SHIELD, MODEL H
97-001-132	FACE SHIELD, UNIVERSAL

SAFETY GLASSES

- Lightweight frameless protection
- Scratch resistant polycarbonate lens provides 99% UVA/B/C protection
- Anti-fog coated lens reduces fogging

PART NO.	SAFETY GLASSES
97-001-161	HARMONY 3550-C-C SAFETY GLASSES, GRAY
97-001-162	CLEAR CHEMICAL SPLASH GOGGLES

HARD HATS

Provide workers with head protection that's easy to adjust and comfortable to wear.

- Lightweight high-density polyethylene shell ensures extra durability
- Fas-Trac® III 4-point ratchet suspension offers absorbent sweatband that fully covers the headband and wearer's forehead, provides 3 levels of nape strap adjustment, lower nape strap cradles the head, and smooth ratchet rotation for easy adjustability
- Compatible with welding helmets, faceshields, and ear muffs
- Fits hat sizes 6.5 to 8
- Complies with ANSI Z89.1, Type I, Class E and G standards
- Easy to adjust
- SEI certified

PART NO.	HARD HATS
97-001-171	HARD HAT, FULL BRIM W/ RATCHET MSA - WHITE
97-001-172	HARD HAT, FULL BRIM W/ RATCHET MSA - BLUE

EAR PLUGS

- Soft, slow recovery foam seals ear canal for effective hearing protection
- Bell shape offers easy fitting and removal
- NRR 33 dB provides excellent protection
- Convenient dispenser box assures easy access
- 1 pair per polybag, 100 pair per dispenser box

PART NO.	EAR PLUGS
97-001-181	EAR PLUG W/ CORD, MAX 30

PVC GLOVES

These gloves come in handy for a multitude of projects and daily chores. Whether you're doing yard work, cleaning up around the house or working on the car you'll always find a time where these gloves make your everyday duties a lot easier. Protect your hands from dirt and harsh chemicals that can damage your skin and hands.

CAUTION & SAFETY TAPE

Made of high strength 2 mm polyethylene, caution tape provides the durability and premium thickness you need to be visible and safe - and with 1,000 feet there is plenty to use.

PART NO.	PVC GLOVES
97-001-151	12" PVC GLOVE

PART NO.	CAUTION & SAFETY TAPE
97-001-141	RED & BLACK DANGER TAPE
97-001-142	YELLOW & BLACK CAUTION TAPE - 3 INCHES X 1000 FT

Banshee tube cleaning nozzles use high pressure water as a liquid bearing, thereby eliminating ball bearings, seals or lubricant used in conventional rotary tools. Each tool is easily configured to suit any application by choosing from a variety of replaceable heads and inlet options.

Tool Model	Tube I.D. Range	Max Pressure	Max Pressure (BSPP Inlet)	Flow Range	Inlet Connections	Diameter	Length

BARRACUDA®

Rotary Shotgun Tools

Barracuda self-rotary tools are the industry standard for rotary shotgunning. Excellent for irregular surfaces where an operator using a hand-held tool can more efficiently maneuver. Also used on automated and hands-free equipment.

Features:

- Effective shotgunning for a wide range of pressure
- Jet reaction creates rotation - no need for compressed air
- Light weight eases operator fatigue
- Field maintainable and easily rebuilt at a low cost
- Four port heads for tin, harder deposits can be configured to two port applications for thicker, softer deposits

Tool Model	Pressure Range	Flow Range	Inlet Connections	Weight	Max Water Temperature
BC-K	2 - 22K psi 140 - 1500 bar	4.40 - 11 GPM 17 - 42 l/min	9/16" MP	2.70 lb 1.20 kg	160° F 70° C
BC-K-P2	5 - 22K psi 340 - 1500 bar	4 - 13 GPM 16 - 49 l/min	9/16" MP	2.70 lb 1.20 kg	160° F 70° C

2" BADGER®*Self-Rotary Swivel*

The 2" Badger is a self-rotating swivel designed for cleaning 2–4 in. (51–102 mm) pipes with bends and long radius elbows, such as U-Tubes and process lines. The latest design includes a spring-loaded pin that ratchets the head to machined edges on the shaft. Therefore, the head can only be removed with a special head removal tool and not while in operation.

Features:

- The only self-rotary tool on the market that can navigate 2 in. (50 mm) pipes with bends
 - The only tool in the industry with head locking technology for increased safety
 - Unique compact design allows the tool to easily navigate pipe bends
- Multiple jetting options allow the tool to be optimized for a variety of pump pressure and flows - unplug, polish, or run longer lines based on jetting
 - Optional fairing available to streamline tool during retrieval
 - Pair with the ABX-PRO for hands-free mole lining

Tool Model	Pressure Range	Flow Range	Inlet Connections	Weight	Max Water Temperature
BA-LK-P4 BA-LK-BSPP4	2 - 15K psi 140 - 1000 bar	3 - 20 GPM 11 - 76 l/min	1/4" NPT or 1/4" BSPP	0.45 lb 0.20 kg	250° F 120° C
BA-LK-MP9L BA-LK-MP9R	12 - 22K psi 830 - 1500 bar	3 - 15 GPM 11 - 57 l/min	9/16" MP or M24	0.45 lb 0.20 kg	250° F 120° C

4" BADGER®

Self-Rotary Swivel

The 4" Badger self-rotary tool makes cleaning pipes with elbows easy, navigating 4 in. (102 mm) bends with controlled rotation which is important for efficiently cleaning larger pipes. The operator can choose between two rotation speeds by selecting fast or slow viscous fluid.

Features:

- Different jetting configurations allow for increased or decreased pull and forward hitting power
- Designed to pair with the AutoBox ABX-500 hose handling system for hands-free pipe cleaning
- Navigates elbows as small as 4 in. (102 mm)
- Self-rotary, speed control provides complete internal coverage, while speed control provides optimum jet delivery
- Two speeds to choose from to maximize cleaning: slower speeds for hard to clean or plugged pipes, and faster speeds for polishing easy to clean pipes with a single tool
- Multiple jetting options optimize the tool for a variety of pumps pressures and flows - unplug, polish, or run longer lines based on jetting

Tool Model	Pressure Range	Flow Range	Inlet Connections	Rotation Speed	Weight
BA-P6 BA-BSPP6	2 - 15K psi 140 - 1000 bar	13 - 30 GPM 49 - 110 l/min	3/8" NPT or 3/8" BSPP	20 - 100 RPM (Slow Fluid) 75 - 250 RPM (Fast Fluid)	3.00 lb 1.40 kg
BA-TM12	12 - 22K psi 830 - 1500 bar	12 - 25 GPM 45 - 95 l/min	3/4" Type M Male	20 - 100 RPM (Slow Fluid) 75 - 250 RPM (Fast Fluid)	3.00 lb 1.40 kg
BA-H6	43.5K psi 3000 bar	4.5 - 12 GPM 17 - 45.5 l/min	3/8" HP Female	100 - 400 RPM	4.00 lb 1.80 kg

6" BADGER®*Self-Rotary Swivel*

The 6" Badger features adjustable speed control which allows operators to meet the demands of the task at hand – slower speeds for tough deposits and plugs, faster rotation for easier jobs or polishing.

Features:

- Only rotary pipe cleaning tool on the market with adjustable speed control for fine-tuning to specific requirements
 - Different jetting configurations allow for more or less pull and forward hitting power
 - Navigates elbows as small as 6 in. (152 mm)
- Speed controlled rotary tools provide complete internal coverage, while providing optimum jet delivery
- Maximize cleaning by choosing slower speeds for hard to clean or plugged pipes and faster speeds for polishing easy to clean pipes with a single tool
 - Optimize the tool for a variety of pumps pressure and flows with multiple jetting options
 - Pair with the ABX-500 for hands-free pipe cleaning

Tool Model	Pressure Range	Flow Range	Rotation Speed	Inlet Connections	Weight	Max Operating Temperature
BA-P8	2 - 15K psi 140 - 1000 bar	15 - 55 GPM 57 - 208 l/min	50 - 300 RPM (Adjustable)	1/2" NPT	8.00 lbs 3.60 kg	250° F 120° C
BA-MP9 BA-M24	12 - 22K psi 840 - 1500 bar	14 - 43 GPM 53 - 163 l/min	50 - 300 RPM (Adjustable)	9/16" MP or M24	8.00 lbs 3.60 kg	250° F 120° C

GOPHER™

Self-Rotary Swivel

The Gopher self-rotary tool is ideal for cleaning evaporator tubes and a variety of process lines. It is ideal for cutting through coke, polymers, coatings and latex. The Gopher is offered in two pressure ranges up to 40K psi (2800 bar).

The Gopher can be paired with StoneAge® automated tube cleaning systems to facilitate hands-free lancing of large diameter tubes such as those found in industrial evaporators and condensers.

Features:

- Self-rotary, speed control provides complete internal coverage, while speed control provides optimum jet delivery
- Two head options available: 7-port unplugging option for maximum forward hitting power, and a 6-port polishing head for IRIS inspection polishing
- Multiple jetting configurations means the same tool can be re-jetted to match a wide variety of cleaning applications - great for when you need more pulling force or forward hitting power

Tool Model	Pressure Range	Flow Range	Rotation Speed	Inlet Connections	Weight	Max Operating Temperature
GO-MP9	2 - 22K psi 140 - 1500 bar	18 - 25 GPM 30 - 95 l/min	600 - 1000 RPM	9/16" MP	3.00 lbs 1.36 kg	160° F 70° C
GO-H9-C	22 - 40K psi 1500 - 2800 bar	4 - 10 GPM 15 - 40 l/min	600 - 1000 RPM	9/16" HP	3.30 lbs 1.50 kg	160° F 70° C

BJV™ SERIES*Self-Rotary Swivel*

The BJV family is our most versatile line of pipe cleaning tools, designed for the widest range of configurations. A variety of head choices allow for pulling ring connections, customized porting, and multiple jetting options. Different viscous fluid options give operators the ability to change the rotation speed for hard or easy applications. BJV tools can be used with a wide range of centralizers and back-out preventers for added safety, and they are also highly effective tank and stack cleaners.

Features:

- Clean 6 in. (152 mm) pipes to 15 ft (4.5 m) diameter tanks with simple modifications
 - Interchangeable heads allow the tool to be used on any type of pump
- Multiple head options to allow for flush mounted nozzles, extension arms, plugs, and pulling rings
 - Simple nozzle changes allow operators to configure for many cleaning applications
 - Easy to pair with AutoBox ABX-500 for hands-free pipe cleaning

Tool Model	Pressure Range	Flow Range	Rotation Speed	Inlet Connections	Weight	Max Water Temperature
BJV-P16	2 - 10K psi 140 - 700 bar	20 - 200 GPM 76 - 757 l/min	20 - 80 RPM (Slow Fluid) 50 - 200 RPM (Fast Fluid)	1" NPT	9.20 lbs 4.20 kg	160° F 70° C

RAPTOR™

Self-Rotary Swivel

The Raptor 2-D self-rotating tool is used to clean process drains, totes, closed head drums, water well screens, ducts, and exhaust stacks. Combined with a centralizer, it cleans pipes from 3–12 in. (76–305 mm) in diameter and can clean straight tubes as small as 2.25 in. (57 mm) in diameter.

The Raptor uses viscous fluid speed control and operates with 2, 4, or 6 jets in balance. We recommend using a centralizer to protect the head and improve jet action on the wall being cleaned.

Features:

- High flow range aids in removing thick, tough deposits
- Controlled rotation for longer jet dwell times for difficult deposits
- Multiple jetting options allows for fine tuning heads to optimize cleaning
- Optional pull ring connection aids in jobs where tool needs to be pulled through the pipe
- Multiple head options available
- Optional entering devices available

Tool Model	Pressure Range	Flow Range	Rotation Speed	Inlet Connections	Length	Weight
RPT	Up to 22K psi 1500 bar	Up to 60 GPM 230 l/min	15 - 60 RPM (Slow Fluid) 50 - 250 RPM (Fast Fluid)	1/2" NPT, 9/16" MP or M24	9.5 in. 240 mm	5.50 lb 2.50 kg

SPITFIRE®*Shotgun Swivel*

The Spitfire rotary shotgun tool is designed for cleaning difficult and irregular surfaces where manual shotgun cleaning is required. The extra lightweight Spitfire requires little maintenance, reducing down time and increasing productivity.

Features:

- Handles a wide range of pressure rating from 2 - 22K psi (140 - 1500 bar)
- Fewer tools to buy to cover all applications and less downtime changing or rebuilding tools
 - High speed rotation is excellent for removing thin coatings
- Angled jets allow for broader impact for quicker, more effective cleaning of large surfaces and odd shapes
 - Fewer parts and no seals to stock or replace - reduced costs and maintenance downtime
- Short overall tool length and light weight makes for easy handling, reducing operator fatigue
 - External shield option protects the tool from damage caused by lateral impacts

ATTACK TIPS™

Waterblast Accessories

StoneAge Attack Tips are the highest quality, longest lasting nozzles available for low and medium pressure applications up to 22K psi (1500 bar). Flow straighteners correct turbulence, ensuring excellent jetting results.

Pressure Range:

- 2 - 22K psi (140 - 1500 bar)

Flow Range:

- 0.60 - 46.00 gpm (2.27 - 174 l/min)

OC8 CARBIDE INSERTS*Waterblast Accessories*

We recommend using our OC8 Holders and OC8 Carbide Inserts where filtration is poor, abrasive solids are present or very high flows. Replaceable carbide inserts are available in large orifice diameters to handle high flows and contain a long taper to provide excellent jet quality.

Pressure Range:

- 2 - 22K psi (140 - 1500 bar)

Flow Range:

- 7 - 106 gpm (26.50 - 401 l/min)

SAPPHIRE NOZZLES

Waterblast Accessories

These nozzles are used for high pressure jetting applications where water filtration of 10 micron or better is required. Jeweled orifices make the best quality, longest lasting jets possible, especially for ultra-high pressures.

Pressure Range:

- 20 - 40K psi (1400 - 2800 bar)

Flow Range:

- 0.20 - 4.80 gpm (0.75 - 18 l/min)

TYPICAL TUBE NOZZLE DRILL PATTERNS

Conditions of Sale & Warranty

You are responsible for your own safety. Advanced Pressure Systems (APS) publishes guides for the safe use of water blasting equipment. Please read them.

We also strongly advise that all personnel are fully conversant with the “*Recommended Practices for the Use of Manually Operated High Pressure Water Jetting Equipment*”, published by the Water Jet Technology Association. These may be obtained free of charge by contacting Advanced Pressure Systems, LLC.

General: These terms and conditions, the terms and conditions included in the quotations or order acknowledgment (if any) are applicable to all products offered for sale by APS Pressure Systems, LLC (“APS”), constitute the “Agreement” between APS and the Purchaser and may not be varied, except as agreed in writing by APS.

Terms of Sale:

1. The Purchaser agrees to hold APS harmless for any and all claims arising from the misuse or misapplication of any product manufactured or supplied by APS.
2. Products returned for credit will be subject to 15% restocking charge. Only standard Products will be accepted for restocking. All sales of non-standard items are final.
3. Payment may be made by credit cards issued by VISA or MASTERCARD. Payment by credit cards issued by AMERICAN EXPRESS will be subject to 3% service or charge.

Delivery: Unless otherwise specified by APS, delivery will be made DAP (Delivery at Place, Incoterms® 2010), at the Purchaser’s location or facility. Title and risk of loss or damage passes to Purchaser on delivery.

Warranty: The following classes of products carry the warranty indicated. Any component included in an assembled product which is subject to wear is not warranted. Products which have been subject to abuse including misapplication, corrosion, excessive pressure, over-tightening and galling screw threads will not be accepted for replacement under warranty.

Products not manufactured by APS will carry the warranty of the respective manufacturer.

1. **Hoses:** Not warranted. Coupling may be warranted by manufacturer.
2. **Rigid Lances:** Ninety (90) days from date of shipment.
3. **Plungers & Pump Packing:** Not warranted.
4. **Control Guns, Flow Divider Valves & Flow Control Valves:** Ninety (90) days from date of shipment.
5. **Relief Valves:** One-hundred eighty (180) days from date of shipment.
6. **Nozzles & Nozzle Inserts / Orifices:** Not warranted.
7. **Fittings, Connectors & Couplings:** One-hundred eighty (180) days from date of shipment.

Limitation of Warranties: EXCEPT AS PROVIDED IN THE WARRANTY SECTION ABOVE, APS MAKES NO OTHER WARRANTIES TO PURCHASER, EXPRESSED OR IMPLIED, AND HEREBY EXPRESSLY DISCLAIMS ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

Shipping Costs: Orders may be shipped prepaid by any regularly available means, and the cost will be paid by the Purchaser. Other costs, including but not limited to: insurance for the full retail value of the products, packaging, crating and any other handling costs will be billed to the Purchaser. If the Purchaser collects the products from APS' Houston plant there will not be any shipping charges.

Payment: All invoices are due net 30 days from date of shipment. Any invoices which are more than 30 days past due will result in the account of the Purchaser to be placed on hold.

Taxes: In addition to any prices specified by APS in the Agreement, Purchaser shall bear, pay and be responsible for the gross amount of any present or future taxes, duties or levies, of a sales, use, excise, value added, goods and services or other similar nature, applicable to or assessable on the price, sale or delivery of any products or services furnished under the Agreement or to their use by APS or Purchaser or otherwise applicable to the transactions under the Agreement, or Purchaser shall furnish APS with evidence of exemption acceptable to the taxing authorities.

Limitation of Damages: APS SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFITS, LOSS OF USE, LOSS OF PRODUCTION, DAMAGE TO OTHER EQUIPMENT, COST OF CAPITAL OR INTEREST. APS' LIABILITY IS LIMITED TO REPAIR OR REPLACEMENT OF THE EQUIPMENT AND THE DETERMINATION, REGARDING WHICH OF THESE IS APPROPRIATE, SHALL BE AT APS' SOLE DISCRETION. THE PARTIES AGREE THAT THE FOREGOING REMEDY IS REASONABLE AND DOES NOT CAUSE THE AGREEMENT TO FAIL IN ITS ESSENTIAL PURPOSE.

Intellectual Property: No ownership of any patent, copyright, trade secret, technical data or other industrial or intellectual property is transferred to Purchaser under this Agreement. No products sale is to be construed as the grant by APS to the Purchaser of any license to copy, modify, revise or reconstruct anything falling within the scope of patents, copyrights, trade secrets, technical data, or other industrial property of APS or third parties.

Applicable Law: Any question concerning the validity, construction, or performance of this Agreement will be governed by the laws of the State of Texas, USA.

We place a high degree of emphasis on Quality Assurance for our products. Our inspection processes for in-house manufactured components follow industry best practices for machine shops. First article, in process and final inspections are carried out using cutting edge technology as well as the traditional and time-tested equipment and methods.

Inspection Equipment:

- OPTIV 3 Classic Optical Coordinate Measuring Machine (CMM)
- Keyence IM-6020 Image Dimension Measuring System (IM)
- Thermo Scientific Niton XRF Analyzer
- Mitutoyo PH-A14 Optical Comparator
- Wilson Rockwell Tester
- Faro Arm
- Mitutoyo SJ0201 Profilometer
- Sunnen Precision Bore Gauges PG-810 and PG-700
- Mitutoyo Linear Height 600
- *And a full complement of precision micrometers, calipers, surface plates, digital height indicators, standard plug, ring & thread gauges*
