	AROMATIC WOODS	woods	eucalyptus siberian fir camphor	camphoraceous, herbaceous, bracing, pine, forest, balsamic, clearing

F A Q'S

Q: What are Accords?

A: Just as there are notes in music, there are notes in perfumery: the individual raw materials that make up all blends. In perfumery, a grouping of notes creates an Accord. An accord can be any collection of notes (bergamot, jasmine, sandalwood), or an accord can be by olfactive family. For example, a Citrus accord (all citrus notes) or a Green Accord (all green notes).

Palette Naturals is a collection of 100% natural perfumery blending accords, created by olfactive family, that serve as the building blocks in the creation of sophisticated natural perfumery compositions.

Q: What is ISO 9235?

A: ISO is the acronym for the International Organization for Standardization, "a worldwide federation of national standards bodies." www.iso.org "The ISO 9235 standard specifies the terms and definitions, in English & French, relating to aromatic natural raw materials." The complete Palette Naturals range is created in strict compliance with the ISO 9235 definition of natural raw materials.

Q: How many accords are in the Collection? Will there be more?

A: The line is launching with 14 Accords, representing 10 major olfactive fragrance families. These are the primary building blocks of perfumery, but by no means complete. In fact, we are already underway developing future collections & accords. If you are interested in a specific olfactive family or have a need for a specific accord, please drop us a line! We support your creativity.

Q: Are all of the Signature Notes in the blends?

A: Signature Notes refer to the primary olfactive signature of each blend, in just a few words. In some cases, these descriptors reflect the use of eo's or absolutes. In other cases, the olfactive effect comes from natural molecules, isolates or fractions that create a Signature Note. This is the complexity and artistry of natural perfumery.

Q: What does 'neat' mean?

A: Pure, undiluted, fully-concentrated oils are referred to as "neat" oils. Once the oil is put into an alcoholic solution, lotion, gel, (or other base), it is in dilution. Each of the Palette Naturals Accords are fully concentrated, undiluted, neat oils and should be handled with care.

Q: Are there safety considerations?

A: Yes. As with all neat oils (volatile compounds), natural perfumery oils must be kept away from children, must not be ingested, and washed from hands. Avoid contact with face and eyes. Please see the SDS (safety data sheets) that accompany each blend.

Q: Are there samples?

A: Yes! Because fragrance is nothing until experienced personally, the entire collection is offered as a Sample Kit for purchase. Each accord is presented in a 5ml amber glass bottle.
