Attn: Mr. Kevin Dickert, Acting ACO Manager
Subject: CPR-1140-(), Model CPR Life Raft, Minor Change Request

Dear Mr. Dickert,

The life raft drawing CPR-1140-() has had a minor change to it. Revision G and this letter are being submitted to bring our records up to date.

Revision G dated 8/18, updated Note 8 (on sheet 1) as to which survival kit, valise and owner's manual is included with the various valise-packed rafts. Non-FAA rafts are supplied with a standard kit, a standard owner's manual and a valise with a standard data card. FAA rafts are supplied with a Part 91 kit, an FAA owner's manual and a valise with an FAA data card. The Bill of Materials (BOM), was updated for items 2, 4 and 12, replacing their original quantities with a callout for Note 8.

Note 10 was added to designate which raft assemblies are FAA-approved. Additionally, the weight of the Part 91 survival kit was added to the "Design Specifications" Table.

Switlik has reviewed the design change, and all applicable data, and consider this a minor change per 14 CFR Part 21, Subpart O, §21.619 and as defined in our quality control manual. As no changes were made to the raft assembly itself, this change does not require a substantially complete investigation to determine compliance with TSO-C70a. Nor does it have any effect on its ability to meet the minimum performance standards of TSO-C70a, Appendix 1.

We hereby certify that this life raft meets or exceeds all the requirements of TSO C70a, complies with 14 CFR Part 21, Subpart O, and will be manufactured under the strict quality control procedures on file with your Saddle Brook, New Jersey office.

Should you have any questions regarding this application, please don't hesitate to contact us.
