

## LEGEND FOR LIFE VEST PART NUMBERS

**S-12345-6789-ABCDEF**

**S-12345-6789-ABCDEF**

- Only the full 16-Digit part number is considered a valid assembly
- Without the full part number, you will be unable to determine the airline, bag assembly, or TBO
- The full part number is available on the 8130-3, or printed on the label found on the life vest bag.

**When inspecting and certifying Switlik life vests, the full 16-Digit part number must appear on the new 8130-3 (or other airworthiness release) and on the label on the outside of the life vest bag/pouch**

**S-12345-6789-ABCDEF**

This portion of the part number refers to the Model (AV-200, AV-35, ILV-20, Etc.) of life vest contained in the bag/pouch

- You may also see and “ALT. P/N” printed on the 8130-3 or on the label. The “S” and “-” will be deleted for the benefit of certain customers.

**S-12345-6789-ABCDEF**

This portion of the part number refers to the fabric and accessories of life vest contained in the bag/pouch

- Generally, a this portion beginning with “6” denotes a PAX vest (yellow fabric), while a “7” denotes CREW (orange fabric).
- You may also see this portion of the P/N followed by “DEMO” – indicating that the vest is for airline demonstration purposes only.

**S-12345-6789-ABCDEF**

This portion of the part number is the Airline Identifier Code  
(Assigned by Switlik)

- An airline identifier code of "999" denotes a generic vest, without a specific airline customer

**S-12345-6789-ABCDEF**

This portion of the part number identifies the bag assembly into which the vest is packed.  
(Style, dimensions, material, TBO)

- After inspection and recertification, Switlik life vests should always be packed into the same bag assembly in which they were originally manufactured

**S-12345-6789-ABCDEF**

- Switlik does not authorize any Repair Station to modify Part Numbers, or Recommended TBOs
  - Switlik does not authorize any Repair Station to create or modify an Airline Identifier Code

## LEGEND FOR LIFE VEST SERIAL NUMBERS

**XX-YY-####**

- “1660” is not part of the Serial Number, but rather an internal marking denoting the type of light to be used. **Do not include it in your certification.**

## LEGEND FOR LIFE VEST SERIAL NUMBERS

**XX-YY-#####**

A red bracket is drawn under the 'XX-YY' portion of the serial number format, indicating that this part represents the month of manufacture.

This portion of the Serial Number is the MONTH in which the vest was manufactured

## LEGEND FOR LIFE VEST SERIAL NUMBERS

**XX-YY-#####**

A red bracket is positioned below the "YY" portion of the serial number format "XX-YY-#####", indicating that this two-digit portion represents the year of manufacture.

This portion of the Serial Number is the YEAR in which the vest was manufactured

## LEGEND FOR LIFE VEST SERIAL NUMBERS

**XX-YY-#####**

This portion of the Serial Number is the SEQUENCE in which the vest was manufactured

- This portion may also contain 3 or 5 digits

## LEGEND FOR LIFE VEST SERIAL NUMBERS

**XX-YY-####**

The Serial Number, in this sequence only, without “-1660”, should appear on the 8130-3 (or other airworthiness release) and on the label on the outside of the life vest bag/pouch
