ATHLETE GUIDE

WARNING

DO NOT USE WITH BRACES / DO NOT CHEW YOUR MOUTH GUARD

In order for your mouth guard to protect, fit, and last, it must be worn properly. If your mouth guard is chewed or incorrectly worn, its protection and durability will diminish.

YOU WILL NEED

1 pot with water / 1 slotted metal spoon / 1 cup of ice water / 1 mirror / 1 timer

STEP

Fill a pot with approximately 3 inches of water and bring the water to a boil.

Remove the boiling water from the heat source and let the water cool for 30 seconds.

STEP

Submerge the mouth guard with its liner facing down in the settled water for 30-40 seconds or until the walls start deforming.

STFP A

Remove the mouth guard from the hot water and run under cold water for 1-2 seconds.

uuuuu

uuuuu

Repeat the steps 3 through 8 if the fit is not accurate.
*Only if necessary, carefully use a pair of scissors to trim off excess pieces
of the mouthguard.*

STEP 5

Using a mirror, gently insert the mouth guard into your mouth by aligning it with the centerline of your front teeth. Once in position, quickly press down on your molars using your thumbs and proceed to the next step.

Bring your lower jaw forward and lightly bite down on the mouth guard while pushing the front of the mouth guard in against your teeth and up towards your gums.

STEP 7

Continue the process of pressing against the edges of the mouth guard while sucking in strongly for 60 seconds.

STEP 8

uuuuu

Place the molded mouth guard in ice water and wait 5 minutes. After removing it from the ice water make sure the mouth guard fits tightly around your teeth.

You're geared up and pumped to kick things off with a boom. You're hearts racing and your body is ready for war.

It's time for you to dominate the competition and show everyone what you came for.

Take a big breath of fresh air and put in your rush mouth guard because things are about to get real.

Footballers, Boxers, and MMA fighters respect it - You will too

Make sure to read the following safety instructions

- For full details of fitting, please see the fitting instructions.
- 2. Do not chew your mouth guard.
- 3. For those whos jaw is still in growth, he /she should check the fitting of the mouth guard regularly. Replacing the mouth guard is necessary when it does not fit properlty anymore.
