## INSTALLATION GUIDE

### MUST READ BEFORE INSTALLATION

Before installing your visor, go to:

[www.nxtrndusa.com/pages/warranty](http://www.nxtrndusa.com/pages/warranty)

To activate your Unlimited Defective Warranty. This warranty ensures that if for any reason your visor cannot be installed or does not function as it should, we will either refund you or replace it free of charge.

Once the visor is attached to the helmet and used it can potentially be damaged and will no longer be covered by the Unlimited Defective Warranty.

\*A Phillips screwdriver will be needed\*

#### STEP 1

Stick your decals of choice on the visor.

#### STEP 2

Find your hardware bag and push the T-Nuts into their respective plastic T-Nut inserts. (Already assembled on certain models.)

#### STEP 3

Press your clips onto your facemask from the top down with the clip tabs pointing to the back of your facemask.

#### STEP 4

Slide your visor into your helmet from bottom up. Once complete, pinch the facemask and visor together until there is no gap.

#### STEP 4

Place the T-Nuts behind the visor and tighten the screws through the visor and into the T-Nuts from the front of the clip. **DO NOT OVERTIGHTEN.** If your visor does not properly fit onto your helmet please contact us: [support@nxtrndusa.com](mailto:support@nxtrndusa.com)
