

TRACEABLE MIN/MAX ALARM THERMOMETER

Model: PharmaCold S-80

TEMPERATURE MONITORING

- Monitors refrigerator and room temperature at the same time
- Monitors current and high/low interior temperature
- Switch between room and interior temperature with the push of a button
- All temperatures can be displayed in Celsius or Fahrenheit

ALARM FUNCTIONS

- Visual low battery alert and alarm
- High/Low temperature alarm

TEMPERATURE BUFFERED SENSOR

- Enclosed in a bottle of glycol solution
- Ensures accurate measurements, not impacted by rapid temperature fluctuations (ie: refrigerator door openings)
- Glycol solution is non-toxic and safe to use in any environment
- Glycol solution mimics temperature readings in mediums similar to common fluids stored in laboratory refrigerators.

STANDARD FEATURES

- Large, easy to read LCD screen, with back light
- Magnetic back for easy placement on refrigerator
- Fold-away stand on the back
- Manufacturer Certificate of Compliance

PRODUCT SPECIFICATIONS

Temperature range -50 to 70 Celcius

Min/Max temperature recording

Accuracy +/- 1 Celcius

Display resolution 0.1

Power Supply 1.5 volt AAA battery

Sampling period 30 seconds

Size 71.5x65x21mm

Net weight 100 grams
