

“The Elliptical”

EASY, ECONOMICAL and EFFICIENT!

Finally, a PFT Filter designed with *the patient* in mind.

The utmost in ease and comfort for your patients has arrived. Our revolutionary elliptical mouthpiece filter is available in a variety of colors and sizes to fit all major pulmonary function manufacturers.

These American-made filters are an affordable, practical means of protecting both your patients and instrumentation against cross contamination. Single patient use bacterial/viral PFT have gained widespread acceptance when performing lung function testing by eliminating the need for expensive sterilization that can cause premature wear of pneumotachometers and other flow transducers. This alone conservatively **saves thousands of dollars** in maintenance costs over the life of your equipment.

Specifications

- * Inspiratory Resistance
.45cm/H2O/L/S
- * Expiratory Resistance
.45cm/H2O/L/S
- * Filter Efficiency:
Bacteria > 99.98%
Virus > 99.92%
- * Dead Space = 53ml
- * Single patient use only

Available in Kit form also plus choose the ridged style!
(Available in some sizes, call us to learn more)

Furthermore, **the need for expensive and uncomfortable rubber flanged mouth seals is significantly reduced offering additional cost savings and shorter testing times.** All the benefits without sacrificing quality or filter efficiency. Our filters are well within the ATS/ERS recommendations for resistance, dead space and efficiency. Call today...your patients will thank you!

Solutions to Your testing needs!
